# **OFFICE OF PUBLIC SECURITY**

## MISSION

The Office of Public Security is responsible for the development and implementation of a comprehensive statewide counter-terrorism strategy designed to detect, protect against and respond to terrorist threats and events. The Office of Public Security directs and coordinates public security matters on behalf of the Governor among relevant State and local agencies, federal security-related agencies including the new Department of Homeland Security and other State homeland security offices.

## ORGANIZATION AND STAFFING

The Office of Public Security is headquartered in New York City with a satellite office in Albany. The Office is headed by a Director who is appointed by the Governor and counsels the Governor on counter-terrorism affairs. The Office will have a workforce of 95 during the 2003-04 fiscal year.

## **PROGRAM HIGHLIGHTS**

Since its creation in October 2001, the Office of Public Security has implemented a comprehensive, coordinated strategy for domestic counter-terrorism preparedness in the State of New York, bringing together agencies, organizations and associations representing all disciplines in order to better prevent and recover from possible future terrorist events.

The Office of Public Security has already implemented a new Counter-Terrorism Network in each of New York State's 62 counties. The first of its kind in the nation, the network is used to notify local law enforcement and other government agencies of terrorism and security-related alerts. The Office has also spearheaded a security assessment of infrastructure in New York State, including the power grid, banking, transportation, fuel, electric, water and port industries. Internal assessments of State agency security measures and protocols have been conducted as well, including first responder preparedness levels. State and local public health systems preparedness protocols have been evaluated and recommendations advanced to enhance early warning systems designed to detect potential threats, and ensure that adequate public health resources would be available in the case of a future domestic terrorism incident.

## OFFICE OF CYBER SECURITY AND CRITICAL INFRASTRUCTURE COORDINATION

In September 2002, Governor Pataki determined a single entity was needed to focus upon the security and disaster-readiness of the State's data and communications systems, and he created the Cyber Security and Critical Infrastructure Coordination (CSCIC) Office to address this need. Reporting to the State's Director of Disaster Preparedness and Response, CSCIC is responsible for leading and coordinating New York State's efforts regarding cyber readiness and resilience, coordinating the process by which State critical infrastructure data is collected and maintained, monitoring the State's networks for malicious cyber activities and leading and coordinating geographic information technologies.

CSCIC is also charged with reducing redundancy between the private sector and State/Federal government initiatives, coordinating with critical industry sectors to examine potential vulnerabilities to catastrophic cyber attack, developing New York State teams to respond to cyber incidents and improving geographic information analysis capabilities for emergency response.
