Annual Information Statement of the State of New York

Introduction

This Annual Information Statement ("AIS") is dated May 15, 2009 and contains information only through that date. This AIS constitutes the official disclosure information regarding the financial condition of the State of New York (the "State") and replaces the Annual Information Statement dated May 12, 2008 and all updates and supplements thereto. This AIS is scheduled to be updated on a quarterly basis (in August 2009, November 2009, and February 2010) and may be supplemented from time to time as developments may warrant. This AIS, including the Exhibits attached hereto, should be read in its entirety, together with any update or supplement issued during the fiscal year.

In this AIS, readers will find:

1. A section entitled the "Current Fiscal Year" that contains (a) extracts from the 2009-10 Enacted Budget Financial Plan, dated April 28, 2009 (the "Financial Plan"), prepared by the Division of the Budget ("DOB"), including the State's official Financial Plan projections, and (b) a discussion of potential risks that may affect the Financial Plan during the State's current fiscal year under the heading "Special Considerations." The first part of the section entitled "Current Fiscal Year" summarizes the major components of the 2009-10 Enacted Budget and the projected impact on operations, annual spending growth, and the magnitude of future potential budget gaps; the second part provides detailed information on projected total receipts and disbursements in the State's governmental funds in 2009-10.

2. Information on other subjects relevant to the State's fiscal condition, including: (a) operating results for the three prior fiscal years, (b) the State's revised economic forecast and a profile of the State economy, (c) debt and other financing activities, (d) governmental organization, and (e) activities of public authorities and localities.

3. The status of significant litigation that has the potential to adversely affect the State's finances.

DOB is responsible for preparing the State's Financial Plan and presenting the information that appears in this AIS on behalf of the State. In preparing this AIS, DOB relies on information drawn from other sources, including the Office of the State Comptroller ("OSC"), that DOB believes to be reliable. Information relating to matters described in the section entitled "Litigation" is furnished by the State Office of the Attorney General.

During the fiscal year, the Governor, the State Comptroller, State legislators, and others may issue statements or reports that contain predictions, projections or other information relating to the State's financial condition, including potential operating results for the current fiscal year and projected baseline gaps for future fiscal years, that may vary materially from the information provided in this AIS, as updated or supplemented. Investors and other market participants should, however, refer to this AIS, as updated or supplemented, for the most current official information regarding the financial condition of the State.

The economic and financial condition of the State may be affected by various financial, social, economic, environmental, and political factors. These factors can be very complex, may vary from fiscal year to fiscal year, and are frequently the result of actions taken or not taken, not only by the State and its agencies and instrumentalities, but also by entities, such as the federal government or other nations, that are not under the control of the State. Because of the uncertainty and unpredictability of these factors, their impact cannot, as a practical matter, be quantified or incorporated into the assumptions underlying the State's projections.

This Annual Information Statement contains statements which, to the extent they are not recitations of historical fact, constitute "forward-looking statements." In this respect, the words "estimate," "project," "anticipate," "expect," "intend," "believe," and similar expressions are intended to identify forward-looking statements. A number of important factors affecting the State's financial results could cause actual results to differ materially from those stated in the forward-looking statements.

The State may issue AIS supplements or other disclosure notices to this AIS as events warrant. The State intends to announce publicly whenever an update or a supplement is issued. The State may choose to incorporate by reference all or a portion of this AIS in Official Statements or related disclosure documents for State or State-supported debt issuance. The State has filed this AIS with the Nationally Recognized Municipal Securities Information Repositories (NRMSIRs). An official copy of this AIS may be obtained by contacting the New York State Division of the Budget, State Capitol, Albany, NY 12224, Tel: (518) 474-8282 or from any NRMSIR. OSC expects to issue the Basic Financial Statements for the 2008-09 fiscal year in July 2009. Copies may be obtained by contacting the Office of the State Comptroller, 110 State Street, Albany, NY 12236 and will be available on its website at www.osc.state.ny.us.

Usage Notice

The AIS has been supplied by the State pursuant to its contractual obligations under various continuing disclosure agreements (each, a "CDA") entered into by the State in connection with financings of certain issuers, including public authorities of the State, that may depend in whole or in part on State appropriations as sources of payments of their respective bonds, notes or other obligations.

An informational copy of this AIS is available on the DOB website (www.budget.state.ny.us). The availability of this AIS in electronic form at DOB's website is being provided solely as a matter of convenience to readers and does not create any implication that there have been no changes in the financial condition of the State at any time subsequent to its release date. Maintenance of the AIS on the website is not intended as a republication of the information therein on any date subsequent to its release date.

Neither this AIS nor any portion thereof may be (i) included in a Preliminary Official Statement, Official Statement, or other offering document, or incorporated by reference therein, unless DOB has expressly consented thereto following a written request to the State of New York, Division of the Budget, State Capitol, Albany, NY 12224 or (ii) considered to be continuing disclosure in connection with any offering unless a CDA relating to the series of bonds or notes has been executed by DOB. Any such use, or incorporation by reference, of this AIS or any portion thereof in a Preliminary Official Statement, Official Statement, or other offering document or continuing disclosure filing without such consent and agreement by DOB is unauthorized and the State expressly disclaims any responsibility with respect to the inclusion, intended use, and updating of this AIS if so misused.

Current Fiscal Year

The 2009-10 Enacted Budget Financial Plan, extracts of which are set forth below, was prepared by the DOB and reflects the actions of the Legislature and Governor.

The Financial Plan contains estimates for the 2009-10 fiscal year and projections for the 2010-11 through 2012-13 fiscal years. As such, it contains estimates and projections of future results that should not be construed as statements of fact. These estimates and projections are based upon various assumptions that may be affected by numerous factors, including future economic conditions in the State and nation and potential litigation. There can be no assurance that actual results will not differ materially and adversely from the estimates and projections contained in the Financial Plan set forth below.

The State accounts for all of its spending and revenues by the fund in which the activity takes place (such as the General Fund), and the broad category or purpose of that activity (such as Grants to Local Governments). The Financial Plan tables sort all State projections and results by fund and category. The State Constitution requires the Governor to submit an Executive Budget that is balanced on a cash basis in the General Fund — the fund that receives the majority of State taxes, and all income not earmarked for a particular program or activity. Since this is the fund that is statutorily required to be balanced, the focus of the State's budget discussion is often weighted toward the General Fund.

The State also reports disbursements and receipts activity by other broad measures: State Operating Funds, which includes the General Fund and funds specified for dedicated purposes, but excludes capital project funds and Federal Funds; and All Governmental Funds ("All Funds"), which includes both State and Federal Funds and provides the most comprehensive view of the financial operations of the State.

Fund types of the State include: the General Fund; State special revenue funds (SRFs), which receive certain dedicated taxes, fees and other revenues that are used for a specified purpose; Federal SRFs, which receive Federal grants; State and Federal Capital Projects Funds, which account for costs incurred in the construction and reconstruction of roads, bridges, prisons, and other infrastructure projects; and Debt Service Funds, which pay principal, interest and related expenses on long-term bonds issued by the State and its public authorities.

2009-10 Enacted Budget Financial Plan Overview[1]

The Enacted Budget for 2009-10 closes the largest budget gap ever faced by the State. The combined current services budget gap[2] for 2008-09 and 2009-10 totaled $20.1 billion (2008-09: $2.2 billion; 2009-10: $17.9 billion), before the gap-closing actions approved by the Governor and Legislature and the receipt of extraordinary Federal aid. For perspective, the two-year budget gap that needed to be closed was equal to approximately 37 percent of total General Fund receipts in 2008-09. The cumulative gap for the five-year planning period from 2008-09 through 2012-13, before approved gap-closing actions, totaled $85.2 billion.

[1] Please see Exhibit C Glossary of Acronyms for the definitions of commonly used acronyms and abbreviations that appear in the text.

[2] The current-services gap represented (a) the difference between the General Fund disbursements expected to be needed to maintain current service levels and specific commitments, and the expected level of resources to pay for them, plus (b) the operating deficit projected in HCRA, which helps finance a number of State health care programs including a share of the Medicaid program.

*** Reflects estimated growth/(decline) in tax receipts excluding the impact of Tax Law changes since SFY 1986-87.*

The combined current-services gap for 2008-09 and 2009-10 grew steadily over the past year, increasing four-fold since May 2008. The $15 billion increase in the combined gap, to $20.1 billion, was due almost exclusively to the precipitous decline in projected receipts, reflecting the severity of the current economic downturn and dislocation in the financial markets. The current recession has been characterized by a loss of vast sums of wealth from depressed equity and real estate markets. As of the fourth quarter of 2008, an unprecedented $12.8 trillion in net wealth had been destroyed nationwide since the third quarter of calendar year 2007. This is expected to have a substantial impact on taxable income and, by extension, State tax receipts. To understand the impact of the downturn on income, a comparison to the last recession is instructive: New York State adjusted gross income fell by $28 billion in 2001 and another $21 billion in 2002, following the collapse of the high-tech/Internet bubble and the attacks of September 11. In contrast, gross income losses of $52 billion in 2008-09 and $53 billion in 2009-10 – or more than twice the last recession – are projected.

Addressing the Budget Gaps

The gap-closing plan for 2008-09 and 2009-10 was enacted in two parts. First, in early February 2009, the Governor and Legislature approved a deficit reduction plan (DRP) for 2008-09. The DRP provided approximately $2.4 billion in savings over the two-year period, reducing the combined gap from $20.1 to $17.7 billion. Second, in March 2009, the Governor and Legislature reached final agreement on a budget for 2009-10, with the Legislature completing action on all appropriations and enabling legislation to implement the budget on April 3, 2009 (all debt service appropriations for 2009-10 were enacted on March 5, 2009). The Enacted Budget Financial Plan includes $11.5 billion in gap-closing actions, beyond the $2.4 billion approved in the DRP, for a total of $13.9 billion in gap-closing actions.[3]

To close the two-year budget gap in 2008-09 and 2009-10, the Governor and Legislature approved a total of $13.9 billion in gap-closing actions, including $6.5 billion in actions to restrain spending, $5.4 billion in actions to increase receipts, and $2 billion in non-recurring actions (more than half of which were used in 2008-09 to close a gap that opened in the last half of the fiscal year). The most significant actions include freezing the foundation aid and Universal Prekindergarten education aid programs at 2008-09 levels; eliminating the Middle-Class STAR rebate program (but maintaining the STAR exemption program that will provide $3.5 billion in property tax relief); instituting Medicaid cost-containment; reducing the size of the State workforce; and increasing personal income tax rates on high-income earners.

In addition, the gap-closing plan includes $6.15 billion in direct fiscal relief that the Federal government is providing to the State under the American Recovery and Reinvestment Act of 2009 (ARRA) to stabilize State finances and help prevent reductions in essential services. This extraordinary aid consists of $5 billion in State savings resulting from a temporary increase in the amount of Medicaid spending that is paid for by the Federal government (known as FMAP) and $1.15 billion in Federal aid provided by the ARRA State Fiscal Stabilization Fund (SFSF) to restore proposed reductions in education, higher education, and other essential government services.

The following table summarizes the gap-closing plan by major function and activity.

[3] The gap-closing plan described herein refers to the combined actions taken in the DRP and the Enacted Budget for 2009-10, unless otherwise noted.

Budget Outcomes

DOB estimates that, after gap-closing actions and Federal aid, the General Fund and HCRA Financial Plan for 2009-10 is balanced, and leaves budget gaps of $2.2 billion in fiscal year 2010-11, $8.8 billion in fiscal year 2011-12, and $13.7 billion in 2012-13. As required by law, the State ended the 2008-09 fiscal year in balance in the General Fund and HCRA.[4] As shown in the table above, the State received $1.3 billion in Federal aid under ARRA in 2008-09, of which it used $624 million to eliminate the 2008-09 gap, and $675 million that it applied to close a portion of the 2009-10 gap. Based on DOB's current estimates, the cumulative budget gap for the five-year period (2008-09 through 2012-13) has been reduced from $85.2 billion to $24.6 billion, a reduction of approximately $60.6 billion – or over 70 percent – from the current-services forecast.[5]

Annual growth of the State-financed portion of the budget – that is, spending financed directly by State residents through State taxes, fees, and other revenues – is held nearly flat. General Fund disbursements, including transfers to other funds, are expected to total $54.9 billion in 2009-10, an increase of $301 million (0.6 percent) from 2008-09 results. Projected General Fund spending for 2009-10 has been reduced by $8.7 billion compared to the current services forecast. State Operating Funds spending, which excludes Federal operating aid and capital spending, is projected to total $78.7 billion in 2009-10, an increase of $574 million (0.7 percent) over 2008-09 results. State Operating Funds spending in the Enacted Budget Financial Plan has been reduced by $9.4 billion compared to the current services forecast.

Elements of the Gap-Closing Plan

Before the dramatic economic events of 2008, the sustained growth in spending commitments since the last economic recovery was the principal contributor to the State's growing budget gaps. Over the last year, however, the precipitous decline in actual and projected receipts caused by the economic downturn has been the dominant cause of the extraordinary increase in the budget gaps. This is illustrated by looking at the combined budget gap for 2008-09 and 2009-10. In May 2008, the projected gap of $5 billion was driven almost exclusively by expected spending growth. In contrast, the $15 billion incremental <u>increase</u> to the combined gap since that time is almost entirely due to the worsening outlook for receipts.

Accordingly, the gap-closing plan under the State's control (that is, excluding Federal aid) is weighted toward spending restraint, but also relies on substantial tax and fee increases. Actions to restrain spending constitute approximately 46 percent of the State portion of the gap-closing plan. Actions to increase receipts constitute approximately 39 percent of the plan. Non-recurring resources make up the remainder.

The section below provides a summary of the actions under each category that have been approved for 2009-10.

Spending Restraint

Actions to restrain General Fund spending affect most activities funded by the State. General Fund spending in the Enacted Budget Financial Plan is projected to total $54.9 billion in 2009-10, an increase of $301 million over 2008-09 results. General Fund spending was reduced by $8.7 billion from current services levels.

---

[4] See "Prior Fiscal Years - Cash Basis Results for Prior Fiscal Years" in this AIS for more information.

[5] The estimates beyond 2009-10 are meant to provide a general perspective on the State's long-term operating forecast, and will be revised and updated quarterly.

All Other	147	50	197	25	15	11

The most significant actions in the Enacted Budget Financial Plan that restrain General Fund spending include the following:

- **Health Care ($2.0 billion):** Enacts cost-containment measures, including rate reductions; updating the base year on which rates are calculated; re-establishing certain industry assessments; financing a greater share of Medicaid spending through HCRA; eliminating a planned human services COLA in 2009-10; and other targeted public health and aging reductions. In addition, the Enacted Budget authorizes savings actions to fully eliminate the HCRA operating deficit, including an increase in the Covered Lives Assessment, instituting a tax on for-profit HMOs, and increasing certain surcharges;

- **STAR ($1.7 billion):** Eliminates the Middle-class STAR rebate program (but maintains the STAR exemption program that will continue to provide tax relief); reduces the PIT credit for New York City taxpayers; and adjusts the timing of reimbursement to New York City;

- **School Aid ($948 million on a State fiscal year basis):** Maintains selected aids at 2008-09 school year levels; extends the phase-in of foundation aid and the UPK program from four to seven years; and authorizes additional lottery games that would increase projected resources available to education;

- **Mental Hygiene ($392 million):** Eliminates a cost-of-living increase for providers; institutes programmatic reforms to align reimbursement with actual costs (including closing, consolidating, and restructuring facility operations, thereby reducing the planned workforce by 865 positions); maximizes available Federal aid; and other measures;

- **Higher Education ($252 million):** Includes tuition increases at public universities approved by the SUNY and CUNY Boards of Trustees; reductions in support for the four statutory colleges at Cornell University and the College of Ceramics at Alfred University; an assessment on the SUNY and CUNY research foundations; inclusion of public sector pension income in TAP determinations; and other savings;

- **Public Safety ($217 million):** Closes three prison camps and various annexes in correctional facilities; improves parolee release and violation processes; eliminates farm operations at correctional facilities; reduces programs for inmates; and other operational changes;
- **Human Services ($192 million):** Increases the level of Federal funding that local districts are required to spend on child welfare services; eliminates the human services COLA; lowers reimbursement for optional, community-based preventive services; closes or downsizes 11 underutilized facilities (8 residential facilities and 3 non-residential facilities), and other measures;
- **Transportation ($152 million):** Reduces the General Fund subsidy to the DHBTF (which is made possible by an increase in certain fees) and to transit systems; and lowers spending on DOT operations consistent with the overall reduction in planned capital activities;
- **Member item funding ($134 million):** Eliminates deposits into the Community Projects Fund for the Governor and Assembly that had been authorized in prior years. The Enacted Budget includes $170 million in new member item deposits split equally between the Senate and Assembly. The new legislative deposits are scheduled to be made in 2010-11 and 2011-12. The Governor did not accept any new member-item funding;
- **Local Government Aid ($97 million):** Holds aid and incentive payments for cities, towns, and villages outside of New York City at 2008-09 levels; reduces VLT aid; and other measures; and
- **Other Education Aid ($28 million):** Reduces funding for, among other things, attendance-taking requirements at non-public schools, library aid, prior-year claims, and supplemental funding for certain after-school programs.

The gap-closing plan counts on savings from instituting a workforce reduction plan (WRP). The WRP would reduce the State Executive Branch workforce by approximately 8,700 unionized employees through attritions, layoffs, and abolitions of funded vacancies. These reductions are in addition to those that are expected to result from the facility closures and other actions affecting the workforce that were approved in this budget.

The Executive Budget had proposed achieving workforce savings without a substantial reduction in force through, among other things, the elimination of a planned 3 percent general salary increase for State employees in 2009-10 and a one-week wage deferral payable upon separation from State service. The State's public employee unions rejected the proposals. Pursuant to the Governor's directive, most non-unionized "management/confidential" employees in 2009-10 will not receive the planned general salary increase, merit awards, longevity payments, and performance advances and therefore will not be subject to the layoffs required in the WRP. See "State Workforce Reductions" herein for more information.

The Enacted Budget Financial Plan will finance a larger share of economic development projects with ongoing resources rather than with long-term debt, starting in fiscal year 2010-11. This will help relieve pressure on the State's statutory debt cap and realize debt service savings in future years. The determination to allocate the "pay-as-you-go resources" to economic development takes into account that projects in this area typically have above-average financing costs. See "Bond Market Issues" herein for more information.

The Enacted Budget Financial Plan includes a modest level of new initiatives in 2009-10, the costs of which are counted against the savings actions presented in this Financial Plan. The most significant initiatives include a new low-cost student loan program to which the State will make an initial contribution of $50 million in 2009-10; extension of a program to assist homeowners facing foreclosure; an increase in the basic public assistance grant of 10 percent annually over the next three years; and additional funding for HEAL-NY, quality incentive pools for nursing homes and home care agencies, and other health initiatives.

Revenue Actions

Balancing the budget exclusively through spending reductions in 2009-10 would have required an extraordinary retrenchment in State services. Absent any actions to raise receipts, DOB estimates that General Fund spending would have had to be reduced by nearly $18 billion from the level required to meet existing commitments – and by almost $9 billion from 2008-09 results – to achieve a balanced budget in 2009-10. Spending reductions of this magnitude would be in direct conflict with Federal efforts to stimulate the economy during a severe recession, raise grave health and public safety concerns, and place additional pressure on local property taxes. Therefore, to maintain essential services and assist residents affected by the economic downturn, the Enacted Budget includes a package of tax increases and other revenue enhancements to help close the budget gap and address the further deterioration in the revenue base.

COMBINED GENERAL FUND AND HCRA GAP-CLOSING PLAN FOR 2009-10 - REVENUE ACTIONS
(millions of dollars)

	2008-09	2009-10	Two-Year Total	2010-11	2011-12	2012-13
Revenue Actions	**118**	**5,279**	**5,397**	**6,443**	**4,974**	**1,110**

Increase Beer/Wine Tax	0	14	14	14	14	14
Film Credit Restructuring	0	0	0	192	(180)	(228)
Reissue License Plates	0	0	0	129	129	20
All Other Revenue Actions	118	339	457	273	272	272

The most significant actions include:

- **Temporary PIT Increase ($3.9 billion):** The State PIT rate will temporarily increase for higher-income filers for a three-year period from tax year 2009 through tax year 2011. The rate for married couples filing jointly will increase from 6.85 percent to 7.85 percent with incomes above $300,000 and to 8.97 percent for filers with incomes above $500,000;
- **Increase Utility Assessment ($557 million):** Increases the current regulatory fee on public utilities, including electric, gas, and water. The action will pay for State regulatory and management oversight by raising the fee from 1/3 of 1 percent to 1 percent of intrastate revenues, expanding the fee to include energy service companies, and establishing an additional 1 percent State energy and utility service conservation assessment, which will expire on March 31, 2014. In recognition of the competitive nature of the telecommunications industry, telecommunications utilities regulated under Public Service Law Section 18-A are exempted from this temporary assessment;

- **Bottle Bill ($115 million):** Expands the 5-cent deposit on carbonated beverages to include bottled water, and mandates that the State retain 80 percent of all unclaimed bottle deposits;
- **High-Income Itemized Deductions ($140 million):** Limits the ability of taxpayers with incomes over $1 million to reduce their tax liability by claiming itemized deductions ($140 million). Currently, taxpayers with incomes over $525,000 are allowed to claim 50 percent of the value of itemized deductions. To sustain philanthropic giving, charitable deductions are excluded from this provision and may still be claimed as itemized deductions for the purposes of State income taxes;
- **Empire Zones ($90 million):** Decertifies "shirt-changers" (that is, firms that change their names to maximize Zone benefits without providing any economic benefit) and firms producing less than $1 in actual investment and wages for every $1 in State tax incentives. The Empire Zone program will sunset on June 30, 2010 – one year earlier than in current law;
- **Non-LLC Partnerships ($50 million):** Imposes a new fee on non-LLC partnerships equal to fee amounts that currently apply to LLCs. Fee amounts will range from $1,900 to $4,500. Unlike the current LLC fee, partnerships with New York-source gross income under $1 million are exempt;
- **Transportation Services ($26 million):** Broadens the sales tax base to cover certain transportation-related services, such as limousine and black car services, but excludes taxis;
- **Beer/Wine Tax ($14 million):** Increases the excise tax on wine and beer. The tax on wine would increase from 18.9 cents per gallon to 30 cents per gallon, and the beer tax would increase from 11 cents per gallon to 14 cents per gallon. This translates into approximately 2 cents per bottle of wine and one and one-half cents per six pack of beer. These taxes were last increased in 1991, and are still among the lowest in the nation; and
- **License Plates ($129 million starting in 2010-11):** Effective April 1, 2010, the license plate reissuance fee is increased from $15 to $25, with revenues directed to the General Fund. License plates were last reissued in 2001.

Other revenue actions include increases in the bond issuance charge for public authorities and industrial development agencies; fines related to certain motor vehicle violations; real property transfer fees paid whenever a deed is recorded; and fees for license suspension. The Financial Plan also includes a potential franchise payment in 2011-12 related to the development of a new VLT facility. In addition, the Enacted Budget includes $350 million in new authorization for the State's film tax and television production credit, which is intended to help keep entertainment industry jobs in New York State.

The Enacted Budget Financial Plan does not include approximately $1.2 billion in tax and fee proposals that had been proposed in the Executive Budget. Extraordinary Federal aid was used to eliminate these tax proposals. See "2009-10 All Funds Financial Plan Forecast" herein for more information on tax receipt projections included in the Enacted Budget.

Non-Recurring Resources

The two-year gap-closing plan included approximately $1 billion in non-recurring resources in 2008-09 and a comparable amount in 2009-10. The 2008-09 gap had to be closed within a three-month period, which severely limited the types of savings measures that were possible.

COMBINED GENERAL FUND AND HCRA GAP-CLOSING PLAN FOR 2009-10 - NON-RECURRING RESOURCES (millions of dollars)						
	2008-09	2009-10	Two-Year Total	2010-11	2011-12	2012-13
Non-Recurring Resources	**1,064**	**1,006**	**2,070**	**(9)**	**(64)**	**(34)**
Delay extra MA Cycle (two years)	0	400	400	0	(400)	0
Increase Business Tax Prepayment to 40 Percent	0	333	333	0	0	0
NYPA Transfers	306	170	476	0	(25)	(25)
Equipment Financing	0	104	104	(4)	(4)	(4)
Finance CUNY Payments with Jan-Mar '09 MA Savings	300	(300)	0	0	0	0
EPF Sweep/Capital Bonding	75	50	125	0	0	0
School Aid Overpayment Recoveries	0	80	80	0	0	0
Medicaid Reimbursement of Education Costs	0	20	20	0	0	0
Recoup Overpayments to NYC (General Public Health Works)	11	15	26	0	0	0
Increase Pre-Paid Sales Tax on Cigarettes	0	14	14	0	0	0
Recoup Overpayments to NYC (Early Intervention)	0	9	9	0	0	0
Continue TADA software bonding	0	3	3	0	0	0
VLT Franchise Payment	0	0	0	0	370	0
Fund Sweeps/Other	372	108	480	(5)	(5)	(5)

The largest non-recurring actions over the two year period include:

- **Delay of the 53rd Medicaid Cycle Payment ($400 million):** The 2009-10 fiscal year included 53 weekly cycle payments, compared to the typical 52 payments. This action delays the payment of a 53rd cycle until fiscal year 2011-12;

- **Increase Business Tax Prepayment ($333 million):** Increases the mandatory first installment of tax due from certain business taxpayers from 30 percent to 40 percent of the previous year's tax liability. For most taxpayers, this installment is due in March with the filing of the previous year's tax return. This will not change the amount of tax liability, but simply the timing of payments;

- **New York Power Authority Excess Resources ($476 million):** Authorizes the transfer of $476 million to the General Fund (of which $306 million was received in 2008-09 and $170 million is planned in 2009-10). Of this amount, $215 million represents funds that were reserved by NYPA to pay for the disposal of waste at a Federal repository. It is anticipated that NYPA will not need these funds for several years. The remaining transfer represents assets not necessary to meet NYPA's short term operating, capital or debt service costs;

- **Equipment Financing ($104 million):** Authorizes the use of bond financing for eligible capital projects that were originally planned to be paid for with cash resources. DOB will make an annual determination on the financing for equipment, depending on Financial Plan needs, market conditions and debt management considerations; and

- **City University (no net impact):** To realize the benefit of health care savings in the DRP that were applicable to the final quarter of the 2008-09 fiscal year, but where the cash savings would occur in 2009-10, the State adjusted its reimbursement schedule to New York City related to the City University. Certain payments that were due in the first quarter of 2009-10, but that had been budgeted in 2008-09, will be made on their statutory due dates, not ahead of schedule. There is no net impact over the two fiscal years.

Other non-recurring resources consist of transfers of existing fund balances, cost-recoveries for overpayments in prior years, and other routine transactions.

Extraordinary Federal Aid

The gap-closing plan included $6.15 billion in fiscal relief that the Federal government is providing to the State under ARRA to stabilize State finances and help prevent reductions in essential services. Direct Federal aid for fiscal relief consists of the increase in the Federal matching rate for eligible State Medicaid expenditures and funds provided through the SFSF to restore proposed reductions in education and higher education and to maintain other essential government services. By law, the direct Federal fiscal relief must be used effectively and expeditiously to promote economic recovery, and may not be allocated for other purposes, such as funding reserves or paying down debt.

The ARRA increased the Federal government contribution, or matching rate, on eligible State Medicaid expenditures for the period from October 1, 2008 through December 31, 2010. The FMAP benefit to the State in 2008-09 totaled $1.3 billion, and is projected at $3.7 billion in 2009-10. In the Financial Plan, every $1 increase in the Federal matching rate corresponds to a $1 decrease in required State support for Medicaid, thus creating General Fund fiscal relief. In addition, since all Federal Medicaid payments must flow through the State's Financial Plan, the increase in FMAP results in an increase in the "pass-through" of more Federal aid to counties and New York City, which contribute to the financing of the State's Medicaid program. This pass-through amount totaled $440 million in 2008-09 and is projected at $1.4 billion in 2009-10. See "Spending Levels" herein for a discussion of the impact of Federal aid on State All Funds spending in 2009-10.

The SFSF is expected to provide $1.15 billion in fiscal relief in 2009-10. The SFSF consists of two parts: an Education Fund, which must be used to restore proposed reductions in education and higher education, and an Other Governmental Services Fund, which must be used to maintain essential government services. Direct Federal fiscal relief from the Education Fund is projected to total $876 million in 2009-10. Fiscal relief from the other Governmental Services Fund is expected to total $274 million in 2009-10. This aid adds $1.15 billion in spending to the All Funds budget.

Lastly, a substantial amount of Federal aid will flow to the State – and through the State Financial Plan to end recipients – that has no direct impact on the State's budget gaps. In addition, Federal spending is affected by the timing of certain transactions, including the approval of State health care initiatives, and the Federal match on spending restorations authorized in the Enacted Budget. In 2009-10, the State expects to receive extraordinary Federal aid of approximately $4.6 billion. Extraordinary Federal aid increases the State's All Funds budget, but has no relationship to the gap-closing plan. In addition, a substantial amount of other Federal aid that affects spending from Federal funds, but which has no impact on the budget gaps, will pass through the State's All Funds Financial Plan in 2009-10 and 2010-11. Most of this is related to the ARRA, but also reflects the timing of Federal aid payments, changes in distribution patterns, and other factors.

Spending Levels

General Fund disbursements, including transfers to other funds, are expected to total $54.9 billion, an increase of $301 million (0.6 percent) from 2008-09 results. Projected General Fund spending has been reduced by $8.7 billion compared to the current services forecast. State Operating Funds spending, which excludes Federal operating aid and capital spending, is projected to total $78.7 billion in 2009-10, an increase of $574 million (0.7 percent) over 2008-09 results. State Operating Funds spending in the Enacted Budget Financial Plan has been reduced by $9.4 billion compared to the current services forecast.

TOTAL DISBURSEMENTS (millions of dollars)							
			Before Actions **			After Actions	
	2008-09 Results **	2009-10 Base	Annual $ Change	Annual % Change	2009-10 Enacted	Annual $ Change	Annual % Change

General Fund, including Transfers	**54,607**	**63,565**	**8,958**	**16.4%**	**54,908**	**301**	**0.6%**

** Excludes transfers.*
*** Unaudited Results.*

The Federal ARRA and other Federal aid substantially increase All Funds spending in 2009-10. In total, Federal aid is responsible for $7.2 billion of the projected All Funds increase above the Executive Budget proposal. In addition, growing costs in Medicaid caseload and utilization trends, which are directly related to the economic downturn, add an additional $1.4 billion in projected costs on an All Funds basis. Therefore, extraordinary Federal aid and accelerating Medicaid entitlement costs together comprise $8.6 billion of the total increase in All Funds spending.

General Fund Balances

The State ended 2008-09 with a General Fund balance of $1.9 billion. The State expects to use approximately $570 million in available balances to finance operations in 2009-10, resulting in a projected year-end balance of $1.4 billion on March 31, 2010. Funds reserved by DOB for debt management purposes may also be spent during the 2009-10 fiscal year, depending on market conditions.

GENERAL FUND ESTIMATED CLOSING BALANCE (millions of dollars)			
	2008-09 Results*	2009-10 Enacted	Change
Projected Year-End Fund Balance	**1,948**	**1,378**	**(570)**
Tax Stabilization Reserve Fund	1,031	1,031	0
Rainy Day Reserve Fund	175	175	0
Contingency Reserve Fund	21	21	0
Reserved for Debt Reduction	73	73	0
Community Projects Fund	145	78	(67)
Remaining Reserve for 2009-10 Use	340	0	(340)
2008-09 Timing Related Changes	163	0	(163)

The timing of payments reflects differences between planned and actual disbursements that occur in any fiscal year. Approximately $163 million in payments that were planned to occur in 2008-09 are now budgeted in 2009-10. The State manages its cash balances to meet these payments. The table below summarizes the General Fund payments budgeted in 2008-09 but now expected to be made in the 2009-10 fiscal year.

2008-09 YEAR-END RESULTS GENERAL FUND TIMING RELATED CHANGES DECREASE/(INCREASE) (millions of dollars)	
Timing Related Changes	**163**
Non-public School Aid	51
Other Education programs, including school aid	45
PBA labor settlement	44
Lower Medicaid spending	23
Taxes on State Owned Lands	27
Higher capital spending	(44)
All Other	17

HCRA ended the 2008-09 fiscal year with a balance of $240 million. It is expected that HCRA will use this balance to finance spending in 2009-10, including $205 million in payments that were originally planned to occur in 2008-09. See the “HCRA Financial Plan” herein for more information.

2009-10 General Fund Financial Plan and OutYear Projections

DOB projects that the Enacted Budget Financial Plan is balanced in the General Fund in 2009-10 and projects outyear budget gaps of $2.2 billion in 2010-11, $8.8 billion in 2011-12, and $13.7 billion in 2012-13.

After actions, General Fund spending is projected to grow at an average annual rate of 7.2 percent from 2008-09 through 2012-13. Spending growth in the General Fund is projected to increase sharply in 2011-12, reflecting a return to a lower Federal match rate for Medicaid expenditures on January 1, 2010, which will increase General Fund costs. The spending is driven by Medicaid growth, rising costs for education, the State-financed cap on local Medicaid spending, employee and retiree health benefits, and child welfare programs. The receipts growth is consistent with DOB’s economic forecast for the recession and recovery. The temporary PIT increase, which covers calendar years 2009 through 2011, is expected to provide substantial additional receipts through fiscal year 2011-12. The following table summarizes the General Fund projections by major tax and Financial Plan category.

OUTYEAR GENERAL FUND PROJECTIONS

In evaluating the State's outyear operating forecast, it should be noted that the reliability of the estimates as a predictor of the State's future fiscal condition is likely to diminish as one moves further from the current year and budget year estimates. Accordingly, in terms of the outyear projections, 2010-11 is perhaps the most relevant from a planning perspective, since any gap in that year must be closed with the next budget and the variability of the estimates is likely to be less than in later years. The State will provide quarterly revisions to its multi-year estimates.

The following table provides a "zero-based" look at the causes of the 2010-11 General Fund budget gap. Detailed explanations of the assumptions underlying the outyear revenue and spending projections appear below.

2010-11 GENERAL FUND ANNUAL CHANGE
SAVINGS/(COSTS)

"CURRENT SERVICES" BUDGET GAP FOR 2010-11 *			**(2,181)**	

** Excludes HCRA balance, which is projected to remain positive over the multi-year Financial Plan.*

The outyear forecast for 2010-11 is based on assumptions of economic performance, revenue collections, spending patterns, and projections for the current services costs of program activities. DOB believes the estimates of annual change in receipts and disbursements that constitute the current services gap forecast are based on reasonable assumptions and methodologies.

General Fund Outyear Receipts/Projections

Overall, tax receipts growth in the two fiscal years following 2009-10 is expected to grow within a range of 2 to 8 percent. This reflects an economic forecast of a national recovery beginning in the third quarter of 2009 with many aspects of New York State's recovery lagging into 2010. The receipts growth is supported significantly by revenue actions in the Budget, including the three-year temporary increase in PIT rates. Tax receipts in 2012-13 are expected to decline slightly, primarily due to the expiration of the temporary rate increase.

- Total General Fund receipts are projected to reach $56.9 billion in 2010-11, $58.4 billion in 2011-12 and $58.2 billion in 2012-13.
- Total State Funds receipts are projected to be approximately $85.9 billion in 2010-11, $89.0 billion in 2011-12 and $88.6 billion in 2012-13.
- Total All Funds receipts in 2010-11 are projected to reach $134.6 billion, an increase of $4.0 billion, or 3 percent over 2009-10 estimates. All Funds receipts in 2011-12 are expected to decrease by $2.4 billion (1.7 percent) over the prior year. In 2012-13, receipts are expected to decrease by $1.1 billion (0.8 percent) from 2011-12 projections.
- All Funds tax receipts are expected to increase by 6.2 percent in 2010-11, 3.3 percent in 2011-12, and 0.3 percent in 2012-13.

General Fund Outyear Disbursement Projections

DOB forecasts General Fund spending of $59 billion in 2010-11, an increase of $4.1 billion (7.5 percent) over estimated 2009-10 levels. Growth in 2011-12 is projected at $8.2 billion (13.9 percent) and in 2012-13 at $4.8 billion (7.1 percent). The growth levels are based on current services projections, as modified by the actions contained in the 2009-10 Enacted Budget. They do not incorporate any estimate of potential new actions to control spending in future years.

General Fund Grants to Local Governments

Annual growth in local assistance over the plan period is driven primarily by Medicaid (including administrative costs and local cost sharing), school aid and aid for children and family services. The following table summarizes some of the factors that affect the local assistance projections over the Financial Plan period.

FORECAST FOR SELECTED PROGRAM MEASURES AFFECTING LOCAL ASSISTANCE
(millions of dollars, where applicable)

	Results	Forecast

Medicaid

General Fund spending for Medicaid is expected to grow by $2.2 billion in 2010-11, $4.9 billion in 2011-12, and another $1.1 billion in 2012-13, which includes a reduction in the State share resulting from the enhanced FMAP provided through the Federal ARRA.

MAJOR SOURCES OF ANNUAL CHANGE IN MEDICAID
(millions of dollars)

	2009-10	2010-11	Annual $ Change	Annual % Change	2011-12	Annual % Change	2012-13	Annual % Change

Local Government Relief (incl. above)	961	1,313	*352*	*36.6%*	1,709	*103.4%*	2,165	*106.1%*

** Excludes enhanced FMAP for other state agencies.*

Medicaid growth results, in part, from the combination of projected increases in recipients, service utilization, and medical care cost inflation that affect nearly all categories of service (i.e., hospitals, nursing homes, etc.). The State cap on local Medicaid costs and takeover of local FHP costs, which are included in base categories of service, are projected to increase spending by $352 million in 2010-11, and $396 million in 2011-12. In 2011-12, $2.9 billion of the State Funds spending increase is due to the scheduled cessation of Federal assistance that had been granted to the State in 2009-10 and 2010-11 in accordance with ARRA. In addition, an extra weekly payment to providers deferred from 2009-10 adds $400 million in base spending across all categories of service in 2011-12.

The average number of Medicaid recipients is expected to grow to 4.27 million in 2010-11, an increase of 7.2 percent from the estimated 2009-10 caseload of 3.98 million. FHP enrollment is estimated to grow to approximately 460,600 individuals in 2010-11, an increase of 8.4 percent over projected 2008-09 enrollment of almost 424,800 individuals.

School Aid

** Represents State debt service costs.*

School aid is projected to increase in 2009-10 and beyond. In future years, increases in foundation aid and UPK are also projected primarily due to increases in expense-based aids such as building aid and transportation aid. On a school-year basis, school aid is projected at $22.4 billion in 2010-11, $24.0 billion in 2011-12, and $26.2 billion in 2012-13. On a State fiscal-year basis, General Fund school aid spending is projected to grow by $768 million in 2010-11, $951 million in 2011-12, and $2.2 billion in 2012-13.

Outside the General Fund, revenues from core lottery sales are projected to increase by $27 million in 2010-11, $67 million in 2011-12, and $106 million in 2012-13 (totaling $2.5 billion in 2012-13). Revenues from VLTs are projected to increase by $68 million in 2010-11, $657 million in 2011-12 and decrease by $260 million in 2012-13 (totaling $944 million in 2012-13). VLT estimates for 2011-12 assume the one-time receipt of $370 million in additional revenues from the State's sale of operating rights at a VLT facility, and assume the start of operations at Aqueduct in 2011, and Belmont by 2012.

Mental Hygiene

Mental hygiene spending is projected at $2.3 billion in 2010-11, $2.4 billion in 2011-12, and $2.5 billion in 2012-13. Sources of growth include: increases in the projected State share of Medicaid costs; projected expansion of the various mental hygiene service systems including the OMH's children's services; increases in the NYS-CARES program and in the development of children's beds in OMRDD to bring children back from out-of-state placements; the New York/New York III Supportive Housing agreement and community bed expansion in OMH; and several chemical dependence treatment and prevention initiatives in OASAS, including treatment costs associated with Rockefeller Drug Law reform.

Children and Family Services

Children and Family Services local assistance spending is projected to grow by $145 million in 2010-11, $202 million in 2011-12 and $143 million in 2012-13. The increases are driven primarily by expected growth in local claims-based programs, including child welfare.

Temporary and Disability Assistance

Spending is projected at $1.3 billion in 2010-11, and is expected to increase to $1.4 billion by 2012-13, primarily the result of an expected decrease in Federal offsets, which increases the level of General Fund resources needed to fund existing commitments.

General Fund State Operations

FORECAST OF SELECTED PROGRAM MEASURES AFFECTING STATE OPERATIONS

	Results	Forecast				
	2007-08	**2008-09**	**2009-10**	**2010-11**	**2011-12**	**2012-13**
State Operations						
Prison Population (Corrections)	62,261	61,400	59,500	59,400	59,300	59,300
Negotiated Salary Increases*	3.0%	3.0%	3.0%	4.0%	0.0%	0.0%
Personal Service Inflation	1.0%	1.0%	1.0%	1.0%	1.0%	1.0%
State Workforce	199,754	199,916	190,335	190,195	190,195	190,195

** Negotiated salary increases reflect labor settlements included in the Financial Plan estimates.*

State Operations spending is expected to total $8.9 billion in 2010-11, an annual increase of $266 million (3.1 percent). In 2011-12, spending is projected to grow by another $250 million (2.8 percent) to a total of $9.1 billion, followed by another $137 million (1.5 percent) for a total of $9.3 billion in 2012-13. The personal service portion of these increases reflects both the impact of the settled labor contracts and potential spending for unsettled unions (assuming comparable agreements to currently-settled unions), salary adjustments for performance advances, longevity payments and promotions; and increased staffing levels. Inflationary increases for non-personal service costs result in higher spending in all years. Additional growth is driven by spending for ongoing initiatives, including the civil commitment program for sexual offenders, and medical and pharmacy costs in the areas of mental hygiene and corrections.

The agencies and authorities experiencing the most significant personal service and non-personal service growth are depicted in the charts below, followed by brief descriptions.

Personal Service

GENERAL FUND - PERSONAL SERVICE (millions of dollars)					
	2009-10	2010-11	Annual $ Change	2011-12	2012-13
Total	**6,465**	**6,621**	**156**	**6,801**	**6,870**
Potential Labor Settlements	400	275	(125)	275	275
Workforce Reduction	(191)	(219)	(28)	(219)	(219)
Judiciary	1,500	1,681	181	1,829	1,862
State University	806	876	70	895	913
Correctional Services	1,773	1,807	34	1,803	1,807
Tax and Finance	281	296	15	296	296
State Police	453	420	(33)	420	420
All Other	1,443	1,485	42	1,502	1,516

- **Potential Labor Settlements:** The Financial Plan includes spending for potential settlements with unions that have not yet reached agreement with the State. The spending assumes settlements at the same terms that have been ratified by settled unions.
- **Workforce Reduction:** Reflects the WRP and the elimination of 2009-10 general salary increase, merit awards, longevity payments, and performance advances for most non-unionized employees.
- **Judiciary:** Reflects projections of anticipated needs for OCA.
- **State University:** Primarily reflects negotiated salary increases and increased investment in operations afforded by tuition increases.
- **Correctional Services:** Growth reflects facility closures, reductions in force, and ongoing cost controls.
- **Department of Taxation and Finance:** Changes reflect the annualization of additional full-time employees added for enhanced audit activity and information technology purposes.
- **State Police:** The higher spending in 2009-10 over 2010-11 is driven by the retroactive component of the PBA labor contract settlement expected to be paid in 2009-10.

Non-Personal Service

GENERAL FUND - NON-PERSONAL SERVICE (millions of dollars)					
	2009-10	2010-11	Annual $ Change	2011-12	2012-13
Total	**2,194**	**2,304**	**110**	**2,374**	**2,442**
Correctional Services	615	643	28	666	700
State Police	50	55	5	80	74
Public Health	127	146	19	150	150
State University	364	379	15	397	421
All Other	1,038	1,081	43	1,081	1,097

- **Correctional Services:** Growth is primarily driven by the escalating costs of food, fuel, utilities, and providing health care services and prescription drugs to inmates.
- **State Police:** Spending growth reflects costs previously supported by cellular surcharge revenues in other State funds, that will be supported by General Fund revenues in 2009-10.
- **Public Health:** Growth is largely driven by the annualization of funding for the State to directly enroll individuals into Medicaid, CHP and FHP.
- **State University:** Primarily reflects funding for inflationary increases in non-personal service at SUNY.

General Fund General State Charges

FORECAST OF SELECTED PROGRAM MEASURES AFFECTING GENERAL STATE CHARGES						
	Results	**Forecast**				
	2007-08	**2008-09**	**2009-10**	**2010-11**	**2011-12**	**2012-13**
General State Charges						
Pension Contribution Rate as % of Salary	9.7%	8.8%	7.6%	10.5%	11.4%	11.5%
Rate of Growth Employee/Retiree Health Insurance	5.4%	4.9%	6.6%	10.5%	8.5%	8.5%

GSCs are projected to total $4.0 billion in 2010-11, $4.3 billion in 2011-12 and $4.8 billion in 2012-13. The annual increases are due mainly to anticipated cost increases in pensions and health insurance for State employees and retirees.

The State's pension contribution rate to the New York State and Local Retirement System, which is 7.6 percent for 2009-10, is expected to increase to 10.5 percent for 2010-11, 11.4 percent for 2011-12 and 11.5 percent in 2012-13. Pension costs in 2010-11 are projected to total $1.4 billion, an increase of $264 million over 2009-10. In 2011-12, costs are projected to increase an additional $113 million to total $1.5 billion. In 2012-13, they are expected to increase by $129 million to total $1.7 billion. Growth in all years is driven by anticipated increases in the employer contribution rate.

FORECAST OF NEW YORK STATE EMPLOYEE HEALTH INSURANCE COSTS (millions of dollars)			
	Health Insurance		
Year	**Active Employees**	**Retirees**	**Total State**
2007-08 (Actual)	1,390	1,182	2,572
2008-09 (Unaudited Results)	1,639	1,068	2,707
2009-10 (Projected)	1,712	1,123	2,835
2010-11 (Projected)	1,906	1,247	3,153
2011-12 (Projected)	2,056	1,348	3,404
2012-13 (Projected)	2,217	1,456	3,673

All numbers reflect the cost of health insurance for General State Charges (Executive and Legislative branches) and the Office of Court Administration.

Spending for employee and retiree health care costs is expected to increase by $318 million in 2010-11, $251 million in 2011-12, and another $269 million in 2012-13, and assumes an average annual premium increase of approximately 8.0 percent. Health insurance is projected at $3.2 billion in 2010-11 ($1.9 billion for active employees and $1.25 billion for retired employees), $3.4 billion in 2011-12 ($2.1

billion for active employees and $1.3 billion for retired employees), and $3.7 billion in 2012-13 ($2.2 billion for active employees and $1.5 billion for retired employees).

See discussion of the GASB Statement 45 later in this AIS for the valuation of future State health insurance costs for State employees.

General Fund Transfers to Other Funds

OUTYEAR DISBURSEMENT PROJECTIONS - TRANSFERS TO OTHER FUNDS (millions of dollars)	2009-10	2010-11	Annual $ Change	2011-12	2012-13
Transfers to Other Funds:	**5,459**	**6,391**	**932**	**7,265**	**7,690**
Medicaid State Share	2,362	2,388	26	2,887	2,888
Debt Service	1,783	1,762	(21)	1,739	1,725
Capital Projects	551	1,162	611	1,319	1,491
Dedicated Highway and Bridge Trust Fund	383	763	380	842	923
All Other Capital	168	399	231	477	568
All Other Transfers	763	1,079	316	1,320	1,586
Mental Hygiene	12	295	283	494	705
Medicaid Payments for State Facility Patients	193	193	0	193	193
Judiciary Funds	149	150	1	156	161
SUNY- Hospital Operations	135	134	(1)	167	167
Banking Services	66	66	0	66	66
Empire State Stem Cell Trust Fund	16	13	(3)	-	56
Statewide Financial System	0	35	35	50	60
All Other	192	193	1	194	178

In 2010-11, transfers to other funds are estimated at $6.4 billion, an increase of $932 million over 2009-10. This includes increased transfers to the DHBTF (see additional discussion below), capital projects funds, and the mental hygiene system. In addition, transfers are increasing to fund the development of the State's new financial management system.

In 2011-12, transfers to other funds are expected to increase by $874 million. This increase reflects projected Medicaid State Share transfers without the benefit of the Federal ARRA package (or enhanced FMAPs), and expected increases in transfers to supplement resources available for the mental hygiene system. In 2012-13, transfers are expected to increase by $425 million, mainly to supplement resources available to the mental hygiene system and subsidize the DHBTF, as well as funding for stem cell research.

Dedicated Highway and Bridge Trust Fund

A significant portion of the capital and operating expenses of DOT and DMV are funded from the DHBTF. The Fund receives dedicated tax and fee revenue from the Petroleum Business Tax, the Motor Fuel Tax, the Auto Rental Tax, highway use taxes, transmission taxes and motor vehicle fees administered by DMV. The Financial Plan includes transfers from the General Fund that effectively subsidize the expenses of the DHBTF. The subsidy is required because the cumulative expenses of the fund – capital and operating expenses of DOT and DMV, debt service on DHBTF bonds and transfers for debt service on bonds that fund CHIPs and local transportation programs – exceed current and projected revenue deposits and bond proceeds. The AIS presents a revised forecast for the General Fund subsidy to reflect Enacted Budget Financial Plan projections. The subsidy is projected at $763 million for 2010-11 and $842 million for 2011-12, with continued growth thereafter.

Financial Plan Reserves

In January 2007, the State created a new statutory Rainy Day Reserve that has an authorized balance of 3 percent of General Fund spending. The Rainy Day Reserve may be used to respond to an economic downturn or catastrophic event. The State made its first deposit of $175 million in 2007-08. The Tax Stabilization Reserve has an authorized balance of 2 percent of General Fund spending and can be used only to cover unforeseen year-end deficits.

The State projects that General Fund reserves will total $1.4 billion at the end of 2009-10, with $1.2 billion in undesignated reserves available to deal with unforeseen contingencies and $151 million designated for subsequent use.

The $1.2 billion of undesignated reserves includes a balance of $1 billion in the Tax Stabilization Reserve, $175 million in the Rainy Day Reserve, and $21 million in the Contingency Reserve Fund for litigation risks.

The designated reserves consist of $78 million in the Community Projects Fund to finance existing "member-item" initiatives, and $73 million set aside for the debt management purposes.

Cash Flow Forecast

In 2009-10, the General Fund is projected to have quarterly-ending balances of $111 million in June 2009, $2.8 billion in September 2009, $1.2 billion in December 2009, and $1.4 billion at the end of March 2010. The lowest projected month-end cash flow balance is in June 2009. DOB’s detailed monthly cash flow projections for 2009-10 are set forth in the Financial Plan tables.

OSC invests General Fund moneys, bond proceeds, and other funds not immediately required to make payments through the Short-Term Investment Pool (STIP), which is comprised of joint custody funds (Governmental Funds, Internal Service Funds, Enterprise Funds and Private Purpose Trust Funds), as well as several sole custody funds including the Tobacco Settlement Fund.

OSC is authorized to make short-term loans from STIP to cover temporary cash shortfalls in certain funds and accounts resulting from the timing of receipts and disbursements. The Legislature authorizes the funds and accounts that may receive loans each year, based on legislation submitted with the Enacted Budget. Loans may be granted only for amounts that the Director of the Budget certifies are “receivable on account” or can be repaid from the current operating receipts of the fund (i.e., loans cannot be granted in expectation of future revenue enhancements). The Enacted Budget includes new loan authorization for the General Fund, as described above.

The total outstanding loan balance was $1.6 billion on March 31, 2009. This was comprised of advances to finance capital spending that will be reimbursed by bond proceeds or Federal grants ($808 million), activities financed by the State in the first instance that will be reimbursed by Federal aid ($411 million), and loans across several State Special Revenue Funds ($279 million) and Proprietary Funds ($53 million).

The total loan balance typically increases throughout the State fiscal year, reaching its peak between the second and third quarters. The spike mainly reflects the payment of lottery aid for education, which is financed in large part by a loan that is repaid over the course of the year as lottery revenues are received.

2009-10 All Funds Financial Plan Forecast

This section describes the State's Financial Plan projections for receipts and disbursements based on the 2009-10 Enacted Budget agreement. The receipts forecast describes estimates for the State's principal taxes, miscellaneous receipts, and transfers from other funds. The spending projections summarize the annual growth in current-services spending and the impact of the Budget on the State's major areas of spending. Financial Plan projections are presented on an All Funds basis, which encompasses activity in the General Fund, State Operating Funds, Capital Projects Funds, and Federal Operating Funds, thus providing the most comprehensive view of the financial operations of the State.

2009-10 Receipts Forecast

Financial Plan receipts comprise a variety of taxes, fees, charges for State-provided services, Federal grants, and other miscellaneous receipts. The receipts estimates and projections have been prepared by DOB on a multi-year basis with the assistance of the Department of Taxation and Finance and other agencies responsible for the collection of State receipts.

Overview of the Revenue Situation

- The current economic slowdown has broadened to virtually every sector of the New York State economy except for education, health care and social assistance. As a result, DOB anticipates that weaker employment, declining corporate earnings, reduced household spending and lower real estate activity will negatively impact State revenue in 2009-10.
- Base receipt growth over the period 2006-07 to 2008-09, supported by a strong financial services sector and real estate market, averaged 5.3 percent. However, the current decline in economic activity is estimated to negatively impact receipt growth for 2009-10 and 2010-11. As a result, base tax receipts (adjusting for law changes) are expected to fall 6.5 percent in 2009-10 and grow by 4.8 percent in 2010-11.
- The negative impact of the depressed equity and real estate markets on the State's economy in general and the financial services industry in particular is expected to result in major declines in bonus payouts during the current fiscal year (down 20 percent from prior year) and reduced growth in business tax receipts over the remaining years of the Financial Plan.
- The volatile real estate and financial markets represent even greater risks to revenues due to the high concentration of taxable income among a relatively small segment of the taxpaying population.
- The decline in the residential housing market is projected to largely eliminate the surge in taxable capital gains realizations associated with real estate sales that characterized the last few years.
- The economy is expected to continue to decline, and as a result, 2009-10 growth in PIT withholding and sales tax collections will be weak absent the legislation enacted with the Budget.
- The combined impact of the declining real estate and financial markets and the deepening recession results in estimated declines in PIT liability of 9.8 percent in the 2008 tax year, and 11.7 percent in the 2009 tax year, before the impact of the temporary rate increase effective in 2009.
- The broadening impact of the economic slowdown has reduced consumption of durable goods, non-durable goods and taxable services. In addition, the outlook for the nominal value of cars

purchased and disposable income have deteriorated, all negatively impacting growth in the sales tax revenue base.

- The large audit settlements associated with financial service industry firms continued into 2008-09 but are expected to be largely concluded before 2009-10, and this loss of resources must be compensated for by other tax compliance actions included with the Budget.

All Funds receipts are projected to total $130.6 billion, an increase of $11.3 billion over 2008-09 results. The following table summarizes the receipts projections for 2009-10 and 2010-11.

** Unaudited Year-End Results.*

Base growth in tax receipts is estimated to decline 6.5 percent adjusted for law changes for fiscal year 2009-10 and rise by 4.8 percent for 2010-11. Overall base growth in tax receipts is dependent on many factors. For several years prior to fiscal year 2008-09 the most important factors supporting tax receipt growth were related to:

- Improvements in overall economic activity, especially in New York City and surrounding counties;
- Continued profitability and compensation gains of financial services companies;
- Continued growth in the downstate commercial real estate market; and
- Continued positive impact of high-income taxpayers on PIT growth.

*** Excludes Transfers.*

All Funds PIT receipts, which reflect gross payments minus refunds, are estimated at $37.2 billion for 2009-10, a $398 million increase from the prior year. This is primarily attributable to an increase in withholding of $2.9 billion due to the three-year temporary increase in tax rates adopted in the Enacted Budget Plan. The increase is partially offset by decreases in extension payments and final payments for tax year 2008 of $2.5 billion (53 percent) and $565 million (22.6 percent), respectively. The decrease reflects the extraordinary weak settlement in tax year 2008 returns attributable to the declining economy. Estimated payments for tax year 2009 are projected to increase by $50 million (0.6 percent), with the increase entirely due to the impact of the temporary tax rate increase. Receipts from delinquencies are projected to increase $166 million over the prior year while refunds are estimated to decline by $339 million (4.7 percent). The following table summarizes, by component, actual receipts for 2008-09 and forecast amounts through 2012-13.

	Settlement	0	0	348	
	Total	**671**	**3,312**	**348**	**4,331**
2011	Withholding	0	843	1,686	
	Estimated Tax	0	0	1,686	
	Settlement	0	0	0	
	Total	**0**	**843**	**3,372**	**4,215**
	Cash Total	**3,948**	**4,778**	**3,720**	**12,446**

All Funds income tax receipts of $40.1 billion for 2010-11 are projected to increase $2.9 billion or 7.7 percent from the prior year. Gross receipts are projected to grow 7.9 percent, largely reflecting projected increases in tax year 2010, estimated payments of $1.7 billion (21.0 percent), extension payments of $1.2 billion (52.0 percent) and withholding of $437 million (1.4 percent). Most of the increases in estimated payments and withholding are due to the enacted PIT temporary increase. Payments from final returns for tax year 2009 are projected to increase by $157 million (8.1 percent) and receipts from delinquencies are projected to increase $54 million (4.8 percent) over the prior year. Refunds are estimated to grow by $603 million or 8.8 percent, largely reflecting the impact of tax reductions contained in the Federal ARRA that affect the State's tax base.

General Fund income tax receipts are the net of deposits to the STAR Fund, which provides property tax relief, and the RBTF, which supports debt service payments on State PIT revenue bonds. General Fund income tax receipts of $24.4 billion for 2009-10 are expected to increase by $1.2 billion or 5.2 percent from the prior year. This increase reflects a decrease in STAR deposits of $910 million as a result of elimination of both the STAR rebate program and associated enhanced NYC STAR credit for 2009-10, partly offset by an increase in deposits to RBTF of $100 million.

General Fund income tax receipts of $26.6 billion for 2010-11 are projected to grow by $2.2 billion, or 9.0 percent over the current year. Along with the increase in All Funds receipts noted above, there is a marginal decrease of $44 million in STAR deposits. Deposits to the RBTF are expected to increase by 7.7 percent, the same percentage increase as projected for net collections since the deposit equals 25 percent of net collections.

PERSONAL INCOME TAX

** Excludes Transfers.*

All Funds income tax receipts of $41.5 billion for 2011-12 are projected to increase $1.4 billion, or 3.4 percent over the prior year. Gross receipts are projected to increase 3.7 percent and reflect withholding that is projected to grow by 4.1 percent ($1.3 billion). Total estimated taxes on prior and current year liabilities will increase by an estimated 1.9 percent ($252 million). Payments from final returns are expected to increase 7.2 percent ($166 million). Delinquencies are projected to increase $38 million or 3.3 percent over the prior year. Growth in total refunds is projected to increase $369 million or 5.0 percent over the prior year.

General Fund income tax receipts of $27.4 billion for 2011-12 are projected to increase by $835 million, or 3.1 percent from 2010-11. General Fund receipts for 2011-12 reflect a $197 million increase in STAR deposits, and a $342 million increase in deposits to the RBTF.

All Funds income tax receipts for 2012-13 are projected to be $40.6 billion. General Fund receipts are projected at $26.6 billion. Both figures reflect declines from the prior year due to the expiration of the temporary PIT increase after tax year 2011(with the last fiscal impact of the temporary increase occurring in 2011-12).

** Unaudited Year-End Results.*
*** Excludes Transfers.*

All Funds user taxes and fee receipts for 2009-10 are estimated to be approximately $14.4 billion, an increase of $371 million or 2.6 percent from 2008-09. Sales tax receipts are expected to increase by $162 million from the prior year due to a base decline of over 2 percent, which is more than offset by tax law changes. Non-sales tax user taxes and fees are estimated to increase by $209 million from 2008-09 mainly due to tax law changes in motor vehicle fees.

General Fund user taxes and fee receipts are expected to total $8.5 billion in 2009-10, an increase of $159 million or 1.9 percent from 2008-09. The increase largely reflects an increase in receipts due to sales tax receipts ($86 million), motor vehicle fees ($61 million) and alcoholic beverage taxes ($29 million), partially offset by a decrease in cigarette tax collections ($21 million).

All Funds user taxes and fee receipts for 2010-11 are projected to be $14.8 billion, an increase of $418 million, or 2.9 percent from 2009-10. This increase largely reflects fee and tax law changes in sales and use tax collections and motor vehicle fees. General Fund user taxes and fee receipts are projected to total $8.8 billion in 2010-11, an increase of $299 million, or 3.5 percent from 2009-10. This increase largely reflects fee and tax law changes in sales and use tax collections and motor vehicle fees.

USER TAXES AND FEES (millions of dollars)	2010-11 Projected	2011-12 Projected	Annual $ Change	2012-13 Projected	Annual $ Change

ABC License Fees	48	48	0	51	3
Auto Rental Tax	66	67	1	68	1

* *Excludes Transfers.*

All Funds user taxes and fees are projected to increase by $491 million in 2011-12 and then increase by $414 million in 2012-13. This reflects the proposed fee and tax law changes becoming fully effective.

Business Taxes

BUSINESS TAXES (millions of dollars)	2008-09 Results*	2009-10 Estimated	Annual $ Change	Annual % Change	2010-11 Projected	Annual $ Change	Annual % Change

* *Unaudited Year-End Results.*

All Funds business tax receipts for 2009-10 are estimated at $7.7 billion, an increase of $72 million, or 0.9 percent from the prior year. The estimates reflect a net increase in receipts of $585 million resulting from tax law changes. The increase in the prepayment rate from 30 percent to 40 percent for most business taxpayers and the imposition of the insurance premiums tax on for-profit HMOs are the major tax law changes. Absent these provisions, All Funds business tax receipts are expected to decline by $513 million or 6.7 percent. The majority of this decline is in the corporate franchise tax and the bank tax. Corporate profits are expected to decline 22 percent in calendar year 2009 although the related revenue decline will be far less due to a higher proportion of taxpayers filing under non-income tax bases. Bank tax receipts in 2008-09 were bolstered by one-time receipts from the three month reopening of VCI.

This program, which allowed taxpayers to voluntarily report the use of IRS designated tax shelters, accounted for $370 million, or 81 percent of All Funds audit collections of $455 million. Bank tax audit collections are expected to fall to $71 million in 2009-10. Excluding Enacted Budget provisions, corporation and utilities tax receipts are expected to grow 4.6 percent as revenue from the telecommunication sector remains strong and the insurance tax is expected to remain virtually unchanged.

All Funds business tax receipts for 2010-11 of $8.0 billion are projected to increase by $369 million, or 4.8 percent over the prior year, reflecting rebound induced growth rates of 9.8 and 10.7 percent in corporate franchise tax and bank tax receipts respectively.

General Fund business tax receipts for 2009-10 of $5.5 billion are estimated to decrease by $61 million, or 1.1 percent below 2008-09 results. The General Fund decrease in business tax receipts is larger than the All Funds decline because the net revenue from the imposition of the insurance premiums tax on for-profit HMOs is dedicated to HCRA. Aside from this Enacted Budget provision, business tax receipts deposited to the General Fund reflect the All Funds trends discussed above.

General Fund business tax receipts for 2010-11 of $5.8 billion are projected to increase $333 million, or 6.1 percent over the prior year. Corporate franchise tax and bank tax receipts are projected to increase 10.1 percent and 9.9 percent, respectively as the economy begins to recover.

All Funds business tax receipts estimated for 2011-12 and 2012-13 reflect trend growth that is determined in part by the expected levels of corporate profits, taxable insurance premiums, electric utility consumption prices, the consumption of telecommunications services and automobile fuel consumption and fuel prices. Business tax receipts are projected to increase to $8.2 billion (1.6 percent) in 2011-12, and $8.7 billion (6.4 percent) in 2012-13. General Fund business tax receipts over this period are expected to increase to $5.9 billion (1.7 percent) in 2011-12 and $6.4 billion (8.0 percent) in 2012-13.

All Funds other tax receipts for 2009-10 are estimated to be $1.4 billion, down $532 million or 28.2 percent from 2008-09 receipts. This decrease reflects a 17.6 percent decline in the estate tax collections due to declines in equity and home values experienced over the past year, combined with a nearly 47 percent decline in real estate transfer tax collections as a result of current conditions in the real estate and credit markets. General Fund other tax receipts are expected to total $982 million in fiscal year 2009-10, reflecting the $205 million decline in estate tax collections.

All Funds other tax receipts for 2010-11 are projected to be $1.4 billion, up $65 million or 4.8 percent from 2009-10, reflecting growth in the real estate transfer tax of 23.5 percent, reflecting the beginning of a rebound in the residential and commercial markets, partially offset by a 2.4 percent decline in estate tax collections. General Fund other tax receipts are expected to total $959 million in fiscal year 2010-11, an decrease of $23 million which is attributable to a projected decline in the estate tax.

** Excludes Transfers.*

The 2011-12 All Funds receipts projection for other taxes is nearly $1.6 billion, up $144 million or 10.1 percent from 2010-11 receipts. Growth in the estate tax is projected to follow expected increases in household net worth as equity prices begin to rebound. Receipts from the real estate transfer tax are projected to increase, reflecting the continued improvement in the residential and commercial markets.

The 2012-13 All Funds receipts projection for other taxes of $1.7 billion is up $142 million or 9.1 percent from 2011-12 receipts.

** Unaudited Year-End Results.*

All Funds miscellaneous receipts include moneys received from HCRA financing sources, SUNY tuition and patient income, lottery receipts for education, assessments on regulated industries, and a variety of fees and licenses. All Funds miscellaneous receipts are projected to total $22.2 billion in 2009-10, an increase of $2.1 billion from 2008-09 results, largely driven by programs financed with authority bond proceeds ($718 million), including spending in economic development, SUNY and State equipment financing; growth in SUNY tuition, fee, patient, and other income ($459 million), increased lottery receipts, including VLT ($213 million) and growth in HCRA receipts ($470 million).

Federal grants help pay for State spending on Medicaid, temporary and disability assistance, mental hygiene, school aid, public health, and other activities. Annual changes to Federal grants generally correspond to changes in federally-reimbursed spending. Accordingly, DOB typically plans that Federal reimbursement will be received in the State fiscal year in which spending occurs, but timing is often unpredictable. All Funds Federal grants are projected to total $47.7 billion in 2009-10, an increase of $8.9 billion from 2008-09 results driven by receipt of Federal ARRA monies.

General Fund miscellaneous receipts collections are estimated to be approximately $3.4 billion in 2009-10, up $276 million from 2008-09 results. This increase is primarily due to actions taken with the 2009-10 Enacted Budget.

All Funds miscellaneous receipts are projected to total $21.7 billion in 2010-11, a decrease of $532 million from the current year, driven by General Fund changes of $359 million primarily due to the loss of several one-time receipts including payments related to NYPA, augmented by a decline in programs financed with authority bond proceeds ($150 million).

All Funds Federal grants are projected to total $48.5 billion in 2010-11, an increase of $800 million from the current year reflecting an increase in Federal ARRA funding.

MISCELLANEOUS RECEIPTS AND FEDERAL GRANTS
(millions of dollars)

	2010-11 Projected	2011-12 Projected	Annual $ Change	2012-13 Projected	Annual $ Change

Federal Grants	48,518	43,103	(5,415)	42,397	(706)

General Fund miscellaneous receipts and Federal grants are projected to be $3.0 billion in each year beginning in 2010-11.

All funds miscellaneous receipts are projected to increase by $921 million in 2011-12 and decline by $609 million in 2012-13 driven by the one-time receipt of franchise fees related to the development of VLT facilities ($370 million).

The loss of Federal ARRA aid drives the All Funds Federal grant declines of $5.4 billion in 2011-12 and $706 million in 2012-13.

General Fund disbursements, including transfers to other funds, are projected to total $54.9 billion in 2009-10, an increase of $301 million from 2008-09 results. State Operating Funds spending, which includes both the General Fund and spending from other operating funds supported by assessments, tuition, HCRA resources and other non-Federal revenues, is projected to total $78.7 billion in 2009-10. The General Fund and State Operating Funds spending totals are reduced by the increase in FMAP. The projected receipt of extraordinary Federal aid in 2009-10 adds approximately $7.2 billion to the All Funds spending total.

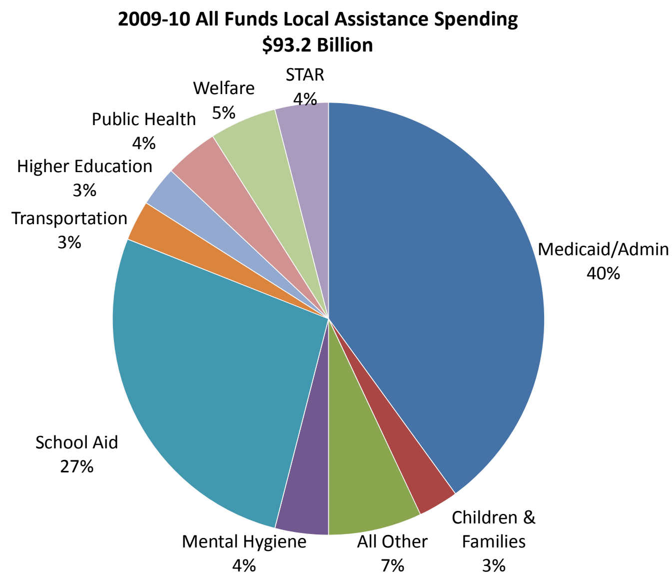
The spending forecast for each of the State's major financial plan categories follows. Projected current services disbursements are based on agency staffing levels, program caseloads, formulas contained in State and Federal law, inflation and other factors. The factors that affect spending estimates vary by program. For example, welfare spending is based primarily on anticipated caseloads that are estimated by analyzing historical trends, projected economic conditions, and changes in Federal law. All projections account for the timing of payments, since not all the amounts appropriated in the Budget are disbursed in the same fiscal year.

Grants to Local Governments

Grants to Local Governments (Local Assistance) include payments to local governments, school districts, health care providers, and other local entities, as well as certain financial assistance to, or on behalf of, individuals, families, and nonprofit organizations. Local Assistance comprises 71 percent of All Funds spending.



In 2009-10, All Funds spending for local assistance is proposed to total $93.2 billion. Total spending is comprised of State aid to medical assistance providers and public health programs ($40.5 billion); State aid for education, including school districts, universities, and tuition assistance ($34.3 billion); temporary and disability assistance ($4.8 billion); mental hygiene programs ($3.9 billion); transportation ($3.1 billion); children and family services ($2.7 billion); and local government assistance ($1.1 billion). Other local assistance programs include criminal justice, economic development, housing, parks and recreation, and environmental quality.

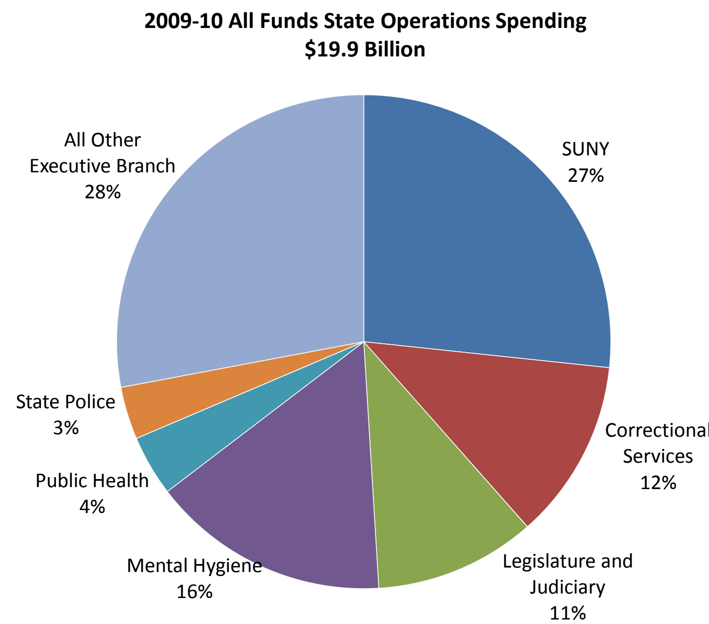
State Operations



State Operations spending is for personal service and non-personal service costs. Personal service costs, which account for approximately two-thirds of State Operations spending, include salaries of State employees of the Executive Branch, Legislature, and Judiciary, as well as overtime payments and costs for temporary employees. Non-personal service costs, which account for the remaining one-third of State Operations, represent other operating costs of State agencies, including real estate rental, utilities, contractual payments (i.e., consultants, information technology, and professional business services), supplies and materials, equipment, telephone service and employee travel.

Approximately 93 percent of the State workforce is unionized. The largest unions include CSEA, which primarily represents office support staff and administrative personnel, machine operators, skilled trade workers, and therapeutic and custodial care staff; PEF, which primarily represents professional and technical personnel (i.e., attorneys, nurses, accountants, social workers, and institution teachers); UUP, which represents faculty and non-teaching professional staff within the State University system; and NYSCOPBA, which represents security personnel (correction officers, safety and security officers).

The State workforce subject to Executive control (i.e., OSC, Law, SUNY/CUNY, and excluding the Legislature, Judiciary, and contractual labor), is projected to total 128,803 FTEs in 2009-10, a decrease of 7,687 from 2008-09 levels. Decreases are expected in nearly all agencies, mainly as a result of facility closures and the WRP.

State Operations spending, which is projected to total $19.9 billion in 2009-10, finances the costs of Executive agencies ($17.8 billion), and the Legislature and Judiciary ($2.1 billion). The largest agencies in dollar terms and staffing levels include SUNY ($5.3 billion; 40,609 FTEs), Correctional Services ($2.4 billion; 29,175 FTEs), Mental Hygiene ($3.1 billion; 38,160 FTEs), DOH ($800 million; 5,441 FTEs), and State Police ($715 million; 5,607 FTEs).

The State Operating Funds spending increase of $373 million (2.4 percent) in State Operations is primarily driven by a reserve to finance potential collective bargaining agreements with unsettled unions ($424 million), SUNY ($300 million), State Police ($86 million), Department of Taxation and Finance ($47 million), and stem cell research ($38 million) offset by a planned workforce reduction and a decline in State share Medicaid payments to State-owned mental hygiene facilities due to increased Federal

Medicaid participation. The annual changes by personal service and non-personal service are summarized in the following tables.

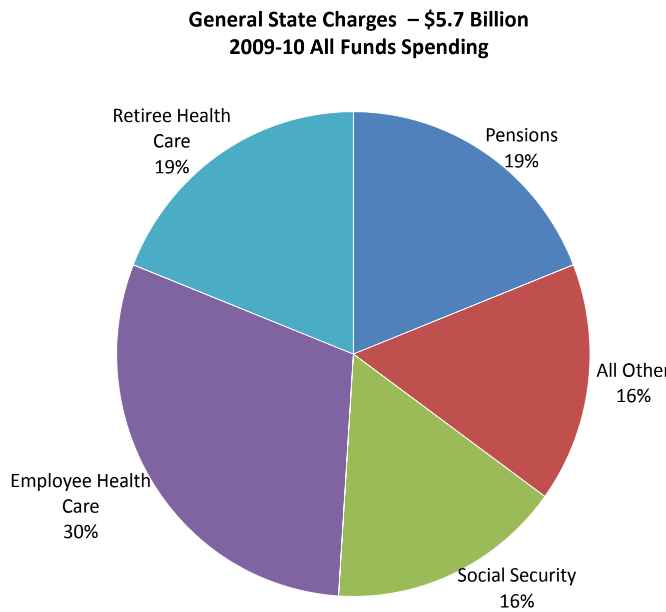
General State Charges

GSCs account for the costs of fringe benefits provided to State employees and retirees of the Executive, Legislative and Judicial branches, and certain fixed costs paid by the State. Fringe benefit payments, many of which are mandated by statute or collective bargaining agreements, include employer contributions for pensions, Social Security, health insurance, workers' compensation and unemployment insurance. Fixed costs include State taxes paid to local governments for certain State-owned lands, and payments related to lawsuits against the State and its public officers.



For most agencies, employee fringe benefit costs are paid centrally from appropriations made to GSCs. These centrally-paid fringe benefit costs represent the majority of GSCs spending. However, certain agencies, such as the Judiciary and SUNY, directly pay all or a portion of their employees' fringe benefit costs from their respective budgets. Employee fringe benefits paid through the GSCs account are paid from the General Fund in the first instance and then partially reimbursed by revenue collected from fringe benefit assessments on Federal funds and other special revenue accounts. The funding source of fringe benefit costs directly paid by certain agencies is dependent on the respective agencies' funding sources. Fixed costs are paid in full by General Fund revenues from the GSCs account.

GENERAL STATE CHARGES SPENDING PROJECTIONS
(millions of dollars)

	2008-09 Results*	2009-10 Enacted	Annual $ Change	Annual % Change
General Fund	3,084	3,704	620	20.1%

Total All Funds	**5,325**	**5,715**	**390**	**7.3%**

** Unaudited Year-End Results.*

All Funds spending on GSCs is expected to total $5.7 billion in 2009-10, and includes health insurance spending for employees ($1.7 billion) and retirees ($1.1 billion), pensions ($1.1 billion) and Social Security ($962 million).

Debt Service

The State pays debt service on all outstanding State-supported bonds. These include general obligation bonds, for which the State is constitutionally obligated to pay debt service, as well as bonds issued by State public authorities (i.e., ESDC, DASNY, and the TA, subject to an appropriation). Depending on the credit structure, debt service is financed through transfers from the General Fund, dedicated taxes and fees, and other resources, such as patient income revenues.

** Unaudited Year-End Results.*

All Funds debt service is projected at $5.1 billion in 2009-10, of which $1.8 billion is paid from the General Fund through transfers and $3.4 billion from other State funds. The General Fund transfer primarily finances debt service payments on general obligation and service contract bonds. Debt service is paid directly from other State funds for the State's revenue bonds, including PIT revenue bonds, DHBTF bonds, and mental health facilities bonds.

The Enacted Budget Financial Plan includes $12 million in savings from debt management actions. Legislation was enacted to provide greater flexibility in administering the PIT Revenue Bond program by permitting DASNY and ESDC to issue bonds for any authorized PIT Revenue Bond purpose. This is expected to result in improved scheduling and sizing for PIT Revenue Bond sales, producing savings through efficiencies in bond pricing and administration. Administrative actions to reduce costs will be continued. These include a goal of selling 25 percent of bonds on a competitive basis, market conditions permitting, and maximizing refunding opportunities, including through consolidated service contract structures.

Capital Projects

Capital Projects account for spending across all functional areas to finance costs related to the acquisition, construction, repair or renovation of fixed assets. Spending from appropriations made from over 30 capital projects funds are financed from four sources: annual State taxes or dedicated miscellaneous receipts, grants from the Federal government, the proceeds of notes or bonds issued pursuant to general obligation bond acts which are approved by the State voters, and the proceeds of notes or bonds issued by public authorities pursuant to legal authorization for State capital spending.

CAPITAL PROJECTS SPENDING PROJECTIONS (millions of dollars)	2008-09 Results*	2009-10 Enacted	Annual $ Change	Annual % Change
General Fund	**473**	**551**	**78**	**16.5%**
Other State Support	4,505	5,364	859	19.1%
State Funds	**4,978**	**5,915**	**937**	**18.8%**
Federal Funds	1,852	2,917	1,065	57.5%
All Funds	**6,830**	**8,832**	**2,002**	**29.3%**

** Unaudited Year-End Results.*

All Funds capital spending is expected to total $8.8 billion in 2009-10. Transportation spending, primarily for improvements and maintenance to the State's highways and bridges, continues to account for the largest share (51 percent) of this total. The balance of projected spending will support capital investments in the areas of economic development (14 percent), education (11 percent), mental hygiene and public protection (7 percent), and parks and the environment (10 percent). The remainder of projected capital projects spending is spread across health and social welfare, general government and other areas (7 percent). State funds are expected to increase by $937 million, or 19 percent, primarily attributable to changes in transportation spending for the Five-Year Capital Plan ($200 million), education spending for SUNY and infrastructure improvements for private colleges and universities ($295 million), and economic development for previously authorized projects ($195 million). Federal ARRA funds represent 98 percent of the annual change in Federal spending. These funds are projected to increase Federal spending by $1.0 billion, providing significant investments in the State's capital infrastructure. Nearly half of this amount will be directed to DOT for infrastructure improvements.

Other Financing Sources/(Uses)

The most significant General Fund transfers to other funds in 2009-10 include transfers for State share Medicaid ($2.4 billion), general debt service ($1.8 billion), and capital projects ($551 million, including $168 million for PAYGO projects and a $383 million subsidy to the DHBTF). Judiciary funding includes money transferred to the Court Facilities Incentive Aid Fund, New York City County Clerks Fund, and Judiciary Data Processing Fund ($149 million). Also included in General Fund transfers to other funds are transfers representing payments for patients residing in State-operated health and SUNY facilities ($193 million), and SUNY hospital subsidy payments ($135 million).

In Special Revenue Funds, transfers to other funds include transfers to the Debt Service Funds representing the Federal share of Medicaid payments for patients residing in State-operated health and mental hygiene facilities and community homes, and patients at SUNY hospitals ($3.5 billion), a transfer from HCRA to the Capital Projects Fund to finance anticipated non-bondable spending for HEAL-NY ($140 million) and transfer of moneys from several Special Revenue accounts in excess of spending requirements ($1.0 billion).

Capital Projects funds transfers include transfers to the General Debt Service Fund from the DHBTF ($1.0 billion), and transfers from the Hazardous Waste Remedial Fund ($27 million), and the Environmental Protection Fund ($95 million), to the General Fund.

Debt Service Fund transfers to the General Fund include tax receipts in excess of debt service requirements for general obligation, LGAC and PIT Revenue Bonds ($10.4 billion). Transfers to Special Revenue Funds represent receipts in excess of lease/purchase obligations that are used to finance a portion of the operating expenses for DOH, mental hygiene, and SUNY ($3.8 billion).

GAAP-Basis Financial Plans/GASB Statement 45

The State Budget is statutorily required to be balanced on a cash basis, which is DOB's primary focus in preparing and implementing the State Financial Plan. State Finance Law also requires the Financial Plan be presented for informational purposes on a GAAP basis, in accordance with standards and regulations set forth by GASB. Thus, the GAAP projections provided herein are intended to supplement, for informational purposes, the cash-basis Financial Plan. The GAAP-basis plans model the accounting principles applied by OSC in preparation of the 2007-08 Financial Statements. OSC will issue the 2008-09 GAAP-basis Financial Statements in July 2009.

In 2009-10, the General Fund GAAP Financial Plan shows total revenues of $46.5 billion, total expenditures of $54.6 billion, and net other financing sources of $8.7 billion, resulting in an operating surplus of $561 million. These results reflect the impact of the Enacted Budget gap-closing actions.

The GAAP-basis results for 2007-08 showed the State in a net positive asset condition of $47.7 billion after reflecting the impact of GASBS 45 "Accounting and Financial Reporting by Employers for Post-Retirement Benefits."

The State used an independent actuarial consulting firm to calculate retiree health care liabilities. The analysis calculated the present value of the actuarial accrued total liability for benefits as of March 31, 2008 at $49.9 billion ($41.4 billion for the State and $8.5 billion for SUNY), using the level percentage of projected payroll approach under the Frozen Entry Age actuarial cost method. The actuarial accrued liability was calculated using a 4.2 percent annual discount rate. DOB expects the present value of the actuarial accrued total liability for benefits as of March 31, 2009 for the State, including SUNY, may increase by as much as $9 billion.

This liability was disclosed in the 2007-08 basic GAAP financial statements issued by the State Comptroller in July 2008. GASB rules indicate the liability may be amortized over a 30-year period; therefore, only the annual amortized liability above the current PAYGO costs is recognized in the financial statements. The 2007-08 liability totaled $3.8 billion ($3.1 billion for the State and $0.7 billion for SUNY) under the Frozen Entry Age actuarial cost method amortized based on a level percent of salary, or roughly $2.7 billion ($2.1 billion for the State and $0.6 billion for SUNY) above the current PAYGO retiree costs. This difference between the State's PAYGO costs and the actuarially determined required annual contribution under GASBS 45 reduced the State's currently positive net asset condition at the end of 2007-08 by $2.7 billion.

GASB does not require the additional costs to be funded on the State's budgetary basis, and no funding is assumed for this purpose in the Financial Plan. On a budgetary (cash) basis, the State continues to finance these costs, along with all other employee health care expenses, on a PAYGO basis. Anticipated increases in these costs are reflected in the State's multi-year Financial Plan as detailed below.

HISTORY AND FORECAST OF NEW YORK STATE EMPLOYEE HEALTH INSURANCE
(millions of dollars)

Year	Health Insurance Active Employees	Retirees	Total State
1999-00	777	466	1,243
2000-01	876	521	1,397
2001-02	937	565	1,502
2002-03	1,023	634	1,657
2003-04	1,072	729	1,801
2004-05	1,216	838	2,054
2005-06	1,331	885	2,216
2006-07	1,518	913	2,431
2007-08	1,390	1,182	2,572
2008-09*	1,639	1,068	2,707
2009-10*	1,712	1,123	2,835
2010-11*	1,906	1,247	3,153
2011-12*	2,056	1,348	3,404
2012-13*	2,217	1,456	3,673

All numbers reflect the cost of Health Insurance for General State Charges (Executive and Legislative branches); actuals through 2007-08.

** Estimated.*

As noted, the current Financial Plan does not assume pre-funding of the GASBS 45 liability. If such liability were pre-funded at this time, the additional cost above the PAYGO amounts would be lowered. The State's Health Insurance Council, which consists of GOER, Civil Service, and DOB will continue to review this matter, and seek input from the State Comptroller, the legislative fiscal committees and other outside parties.

Special Considerations

Complex political, social, environmental and economic forces influence the State's economy and finances, many of which are outside the ability of the State to control. These include, but are not limited to, the performance of the national and State economies; the impact of continuing write-downs and other costs affecting the profitability of the financial services sector, and the concomitant effect on bonus income and capital gains realizations; the impact of calendar year 2008 wage and bonus activity on the State tax settlement in fiscal year 2009-10; access to the capital markets in light of the disruption in the municipal bond market; litigation against the State, including challenges to certain tax actions and other actions authorized in the Enacted Budget; and actions taken by the Federal government, including audits, disallowances, and changes in aid levels. Such forces may affect the State Financial Plan unpredictably from fiscal year to fiscal year.

For example, the State Financial Plan is based upon forecasts of national and State economic activity developed through both internal analysis and review of national and State economic forecasts prepared by commercial forecasting services and other public and private forecasters. Economic forecasts have frequently failed to predict accurately the timing and magnitude of changes in the national and the State economies. Many uncertainties exist in forecasts of both the national and State economies, including consumer attitudes toward spending, the extent of corporate and governmental restructuring, the condition of the financial sector, federal fiscal and monetary policies, the level of interest rates, and the condition of the world economy, which could have an adverse effect on the State. There can be no assurance that the State economy will not experience results in the current fiscal year that are materially worse than predicted, with corresponding material and adverse effects on the State's projections of receipts and disbursements. For more information, see the section entitled "Economics and Demographics" in this AIS.

Projections of total State receipts in the Financial Plan are based on the State tax structure in effect during the fiscal year and on assumptions relating to basic economic factors and their historical relationships to State tax receipts. In preparing projections of State receipts, economic forecasts relating to personal income, wages, consumption, profits and employment have been particularly important. The projections of receipts from most tax or revenue sources is generally made by estimating the change in yield of such tax or revenue source from its estimated tax base.

Projections of total State disbursements are based on assumptions relating to economic and demographic factors, levels of disbursements for various services provided by local governments (where the cost is partially reimbursed by the State), and the results of various administrative and statutory mechanisms in controlling disbursements for State operations. Factors that may affect the level of disbursements in the fiscal year include uncertainties relating to the economy of the nation and the State, the policies of the federal government, and changes in the demand for the use of State services.

An additional risk to the State Financial Plan arises from the potential impact of certain litigation and of federal disallowances now pending against the State, which could adversely affect the State's projections of receipts and disbursements. The State Financial Plan assumes no significant litigation or federal disallowances or other federal actions that could affect State finances. For more information on litigation pending against the State, see the section entitled "Litigation" in this AIS.

DOB believes that its projections of receipts and disbursements relating to the current State Financial Plan, and the assumptions on which they are based, are reasonable. Actual results, however, could differ materially and adversely from the projections set forth in this AIS. In the past, the State has taken management actions to address potential Financial Plan shortfalls, and DOB believes it could take similar actions should variances occur in its projections for the current fiscal year.

Actions affecting the level of receipts and disbursements, the relative strength of the State and regional economy, and actions by the federal government have helped to create projected structural budget gaps for the State. These gaps result in a significant disparity between recurring revenues and the costs of maintaining or increasing the level of support for State programs. To address a potential imbalance in any given fiscal year, the State would be required to take actions to increase receipts and/or reduce disbursements as it enacts the budget for that year, and, under the State Constitution, the Governor is required to propose a balanced budget each year. There can be no assurance however, that the Legislature will enact the Governor's proposals or that the State's actions will be sufficient to preserve budgetary balance in a given fiscal year or to align recurring receipts and disbursements in future fiscal years.

In any year, the Financial Plan is subject to risks that, if they were to materialize, could affect operating results. The most significant current risks include the following:

Risks to the Economic Forecast

DOB's outlook calls for an end to the current recession sometime in the third quarter of calendar year 2009, making it the longest since the Great Depression. However, there are a number of risks to the forecast. The large economic stimulus package passed by Congress in February and a Federal Reserve interest rate target of near zero, along with its massive injections of liquidity into the financial system, are expected to contribute to positive, albeit low growth in real U.S. GDP by the third quarter of 2009. However, the response of the economy to this stimulus depends in part on the normal functioning of credit markets. Further delay in the return of normalcy to markets could in turn delay the onset of the recovery. A weaker labor market than projected could result in even lower incomes and weaker household spending than projected. The global economy could contract further than anticipated, further depressing demand for U.S. exports and putting additional downward pressure on corporate earnings. Improving equity prices as markets look beyond the current crisis have been a recent bright spot, but slower corporate earnings growth than expected could further depress equity markets, delaying their recovery and that of Wall Street. On the other hand, a stronger response to the stimulus package, higher equity prices, or stronger global growth than anticipated could result in stronger economic growth than is reflected in the forecast.

All of the risks to the U.S. forecast apply to the State forecast as well, although as the nation’s financial capital, financial market uncertainty poses a particularly large degree of risk for New York. Lower levels of financial market activity than anticipated could result in a further delay in the recovery of Wall Street profits and bonuses. A more severe national recession than expected could prolong the State's downturn, producing weaker employment and wage growth than projected. Weaker equity and real estate activity than anticipated could negatively affect household spending and taxable capital gains realizations. These effects could ripple though the economy, further depressing both employment and wage growth. In contrast, should the national and world economies grow faster than expected, a stronger upturn in stock prices, along with even stronger activity in mergers and acquisitions and other Wall Street activities, could result in higher wage and bonuses growth than projected.

State Cash Flow Projections

DOB currently projects that each month of the 2009-10 fiscal year will end with a positive cash balance in the General Fund. However, the General Fund’s 2009-10 opening cash position of $1.9 billion was lower than in recent fiscal years and DOB expects extremely tight operating margins, including periodic negative balances in the General Fund, especially in the first quarter of the fiscal year, before the benefit of approved actions in the Enacted Budget are fully realized. The June 2009 closing balance of $111 million is the lowest projected for the fiscal year, based on the current forecast. DOB projects cash balances of $2.8 billion by September 30, 2009, $1.2 billion by December 30, 2009, and $1.4 billion by March 31, 2010. The settlement of tax liabilities for calendar year 2008, which primarily takes place in April and May 2009, has the potential to significantly alter the cash flow position of the State. DOB and the Department of Taxation and Finance are monitoring collections and refund activity closely.

The Enacted Budget authorizes the General Fund to borrow resources temporarily from other funds for a period not to exceed four months. In addition, under existing law, the General Fund is authorized to use resources in the State's Tax Stabilization Reserve for cash flow purposes, but is required to repay the amounts in full by the close of the fiscal year. Technical legislation approved in the Enacted Budget expands this authorization to include funds available in the Rainy Day Reserve and Contingency Reserve.

State Workforce Reductions

On March 24, 2009, the Executive announced that it would implement a WRP. DOB expects that the WRP will result in a State workforce reduction equivalent to approximately 8,700 employees, and will generate savings of approximately $160 million in 2009-10 growing to over $300 million in 2010-11. On April 7, 2009, DOB directed all State agencies to prepare WRPs to be submitted to DOB by April 21, 2009. The State workforce subject to Executive control finished 2008-09 at 136,490 positions compared to the Executive Budget estimate of 137,745, a decline of 1,255. In 2009-10, this portion of the workforce is expected to be reduced to 128,803 positions, a reduction of 7,687. DOB's plans to reflect the impact of the approved plans in the First Quarterly Update to the Financial Plan. There can be no assurance that the WRP will achieve the level of savings projected in the Financial Plan.

Labor Settlements

The State has reached labor settlements with several labor unions, CSEA, PEF, UUP, District Council 37, and the Police Benevolent Association. Under terms of these four-year contracts, which run from April 1, 2007 through April 1, 2011 (July 2, 2007 through July 1, 2011 for UUP), employees will receive pay increases of 3 percent annually in 2007-08 through 2010-11 and 4 percent in 2011-12. Pursuant to the Governor's directive, most non-unionized "management/confidential" will not receive the planned general salary increase, merit awards, longevity payments, and performance advances in 2009-10.

Other unions representing uniformed correctional officers, graduate students, and security/park police have not reached settlements with the State at this time. DOB estimates that if all the unsettled unions were to agree to the same terms that have been ratified by other unions, it would result in added costs of approximately $400 million in 2009-10, assuming a retroactive component for fiscal years 2007-08 and 2008-09, and approximately $275 million in both 2010-11 and 2011-12. The Enacted Budget for 2009-10 assumes spending related to these settlements. There can be no assurance that actual settlements will not exceed the amounts included in the Plan. In addition, no reserve has been set aside for potential pay raises for judges.

School Supportive Health Services

The OIG of the United States Department of Health and Human Services has conducted six audits of aspects of New York State's School Supportive Health Services program with regard to Medicaid reimbursement. The audits cover $1.4 billion in claims submitted between 1990 and 2001. To date, OIG has issued four final audit reports, which cover claims submitted by upstate and New York City school districts for speech pathology and transportation services. The final audits recommend that the CMS disallow $173 million of the $362 million in claims for upstate speech pathology services, $17 million of $72 million for upstate transportation services, $436 million of the $551 million in claims submitted for

New York City speech pathology services, and $96 million of the $123 million for New York City transportation services. New York State disagrees with the audit findings on several grounds and has requested that they be withdrawn. If the recommended disallowances are not withdrawn, the State expects to appeal.

While CMS has not taken any action with regard to the disallowances recommended by OIG, CMS is deferring 25 percent of New York City claims and 9.7 percent of claims submitted by the rest of the State, pending completion of the audits.

Proposed Federal Rule on Medicaid Funding

On May 25, 2007, CMS issued a final rule that, if implemented, would significantly curtail Federal Medicaid funding to public hospitals (including New York City's HHC) and programs operated by both OMRDD and OMH. The rule seeks to restrict State access to Federal Medicaid resources by changing the upper payment limit for certain rates to actual facility reported costs. It is estimated that this rule could result in a loss of $350 million annually in Federal funds for HHC and potentially larger losses in aid for the State Mental Hygiene System. As part of the Federal ARRA, implementation has been delayed until July 1, 2009.

On May 23, 2007, CMS issued another rule that would eliminate Medicaid funding for GME. The proposed rule clarifies that costs and payments associated with GME programs are not expenditures of Medicaid for which Federal reimbursement is available. This rule could result in a Financial Plan impact of up to $600 million since the State would be legally obligated to pay the lost non-Federal share. As part of the Federal ARRA, implementation has been delayed indefinitely.

On February 22, 2008, CMS issued a change to the rules that regulate State taxation of healthcare entities, effective April 22, 2008. The rule affords CMS flexibility in identifying a "linkage" between provider taxes and Medicaid payments rendering the tax invalid. The State currently uses a substantial amount of provider tax receipts to finance various healthcare programs that serve the State's most vulnerable populations. While the State strongly believes that its imposed taxes are in full compliance, the vagueness of the new rules provides no assurance that these funding streams are adequately protected. On May 6, 2009 CMS extended the delayed implementation through June 30, 2010.

CMS has also issued a rule regarding targeted case management which clarifies the definition of covered services. The final rule was issued on December 4, 2007 and made effective March 3, 2008. The State is currently in the process of litigating this issue and has requested a one-year implementation extension. On May 6, 2009, CMS issued a proposed regulation that would partially rescind the revised definitions of services covered and provide states with the necessary flexibility to ensure beneficiary access to case management services.

Further, CMS has proposed to restrict Medicaid coverage for rehabilitative services and reimbursement for school based health services, which could pose a risk to the Financial Plan and result in hundreds of millions of dollars in reduced Federal-share funding. As part of the ARRA, implementation of restrictions for rehabilitation services has been delayed indefinitely, while school based health services has been deferred until July 1, 2009. As a result of issues brought forward by states, the school based regulation was rescinded on May 6, 2009.

On all rules, the State is actively lobbying the Federal government to be held harmless, either through an extension/modification of the current moratorium or through other administrative or statutory means. The State is joined by many other states in challenging the adoption on the basis that CMS is overstepping its authority and ignoring Congressional intent.

New York City Personal Care Audit

The OIG of the United States Department of Health and Human Services released a September 2008 draft audit with regard to Medicaid reimbursement for personal care services in New York City. The draft audit reviewed claims for the period July 1, 2004 through December 31, 2006. Based upon their review, the OIG is calling for the State to repay an estimated $815 million in Federal Medicaid because payments were not supported with required medical exams and social and nursing assessments. Both New York City and DOH disagree with these findings and have since conducted their own claims review. On February 10, 2009, DOH submitted its formal response to OIG contesting the audit findings. To date, OIG has shared no additional comments.

Bond Market Issues

Current projections reflect that the level of State-supported debt outstanding and debt service costs will continue to remain below the limits imposed by the Debt Reform Act of 2000 through 2011-12. However, the State has entered into a period of significantly declining debt capacity. Based on the most recent personal income and debt outstanding forecasts, the State is now expected to exceed the debt outstanding cap in 2012-13 by approximately $300 million. The State expects to propose actions in the 2010-11 Executive Budget in order to stay within the statutory limitations.

Other Financial Plan Risks

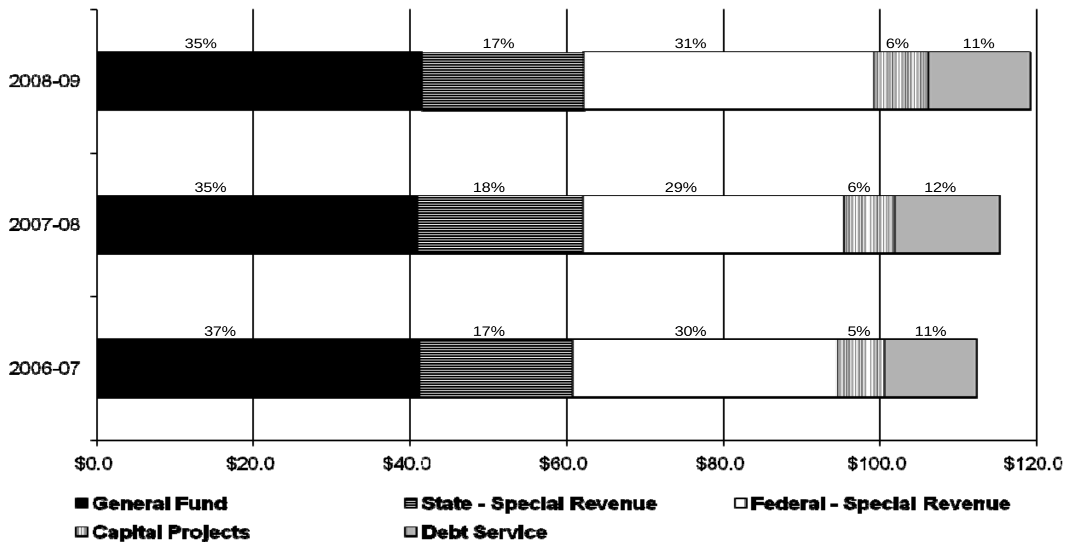
The Financial Plan forecast also contains specific transaction risks and other uncertainties including, but not limited to, the development of new VLT facilities; the receipt of certain payments from public authorities; the receipt of miscellaneous revenues at the levels expected in the Financial Plan; the enforcement of certain tax regulations on Native American reservations; the timing and value of proceeds from the sale of Wellpoint stock expected to finance certain health care spending; and the achievement of cost-saving measures, including, but not limited to, administrative savings in State agencies through the WRP and the transfer of available fund balances to the General Fund, at the levels currently projected. Such risks and uncertainties, if they were to materialize, could have an adverse impact on the Financial Plan.

Finally, there can be no assurance that (1) receipts will not fall below current projections, requiring additional budget-balancing actions in the current year, and (2) the gaps projected for future years will not increase materially from the projections set forth in this AIS.

Prior Fiscal Years

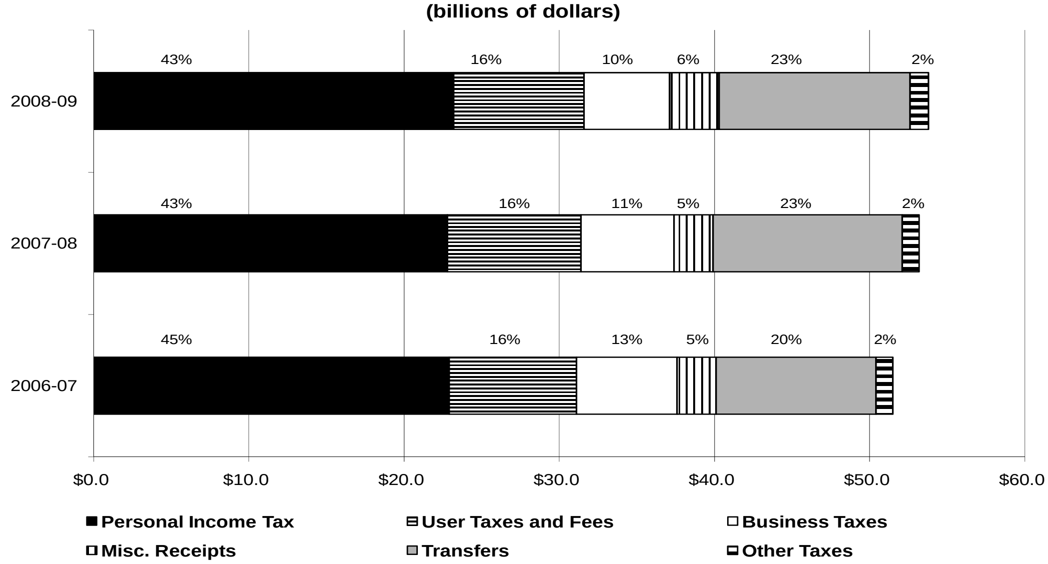
The following four tables show the composition of the State's governmental funds and its General Fund. Following the tables is a summary of the cash-basis results for the State's three most recent fiscal years.

Governmental Funds Receipts
State Fiscal Years 2006-07, 2007-08 and 2008-09
(billions of dollars)

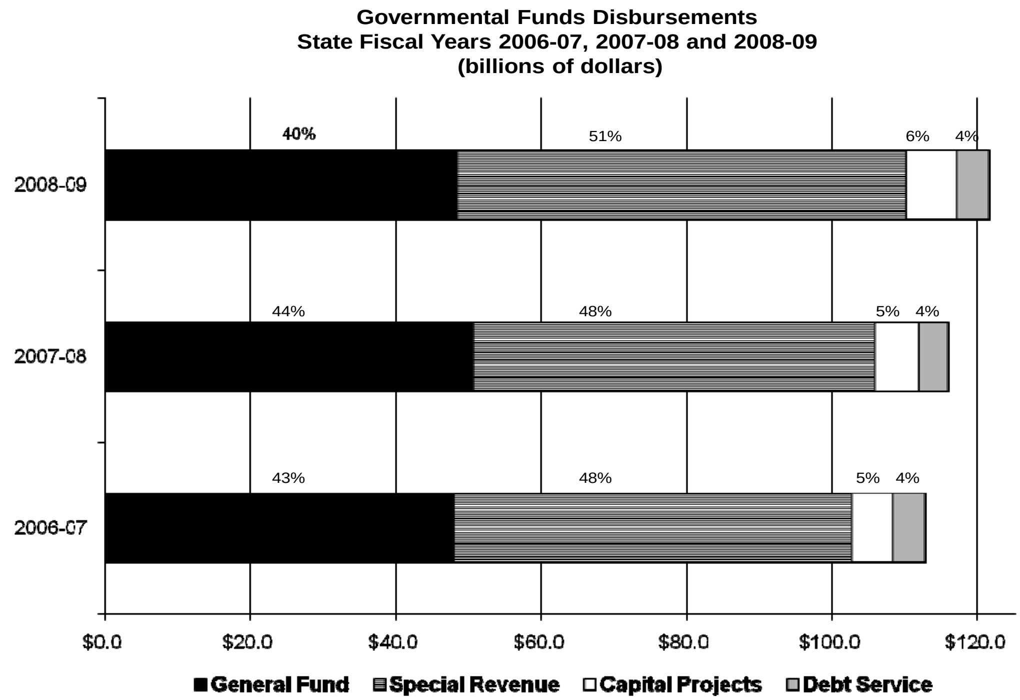


Note: Percentage total may not add due to rounding.

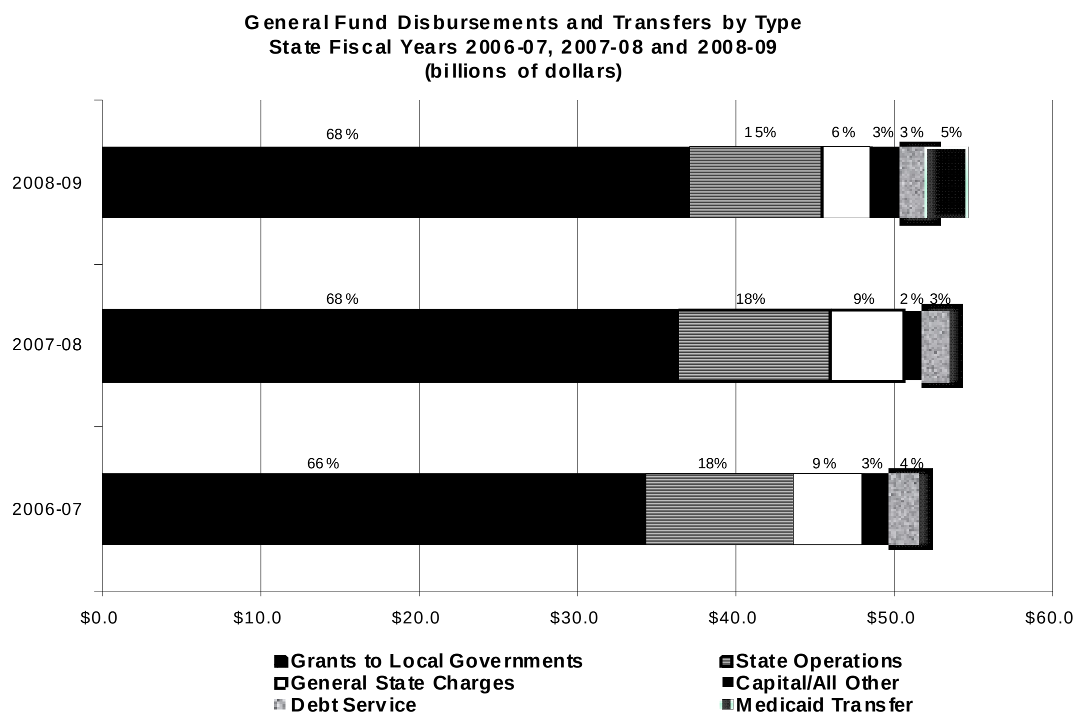
General Fund Receipts and Transfers by Source
State Fiscal Years 2006-07, 2007-08 and 2008-09
(billions of dollars)



Note: Percentage total may not add due to rounding.



Note: Percentage total may not add due to rounding.



Note: Percentage total may not add due to rounding.

Cash-Basis Results for Prior Fiscal Years

The State reports its financial results on two bases of accounting: the cash basis, showing receipts and disbursements; and the modified accrual basis, prescribed by GAAP, showing revenues and expenditures. With the exception of 2008-09 results, the State's financial results set forth in this section of the AIS have been audited.

General Fund 2006-07 through 2008-09

The General Fund is the principal operating fund of the State and is used to account for all financial transactions, except those required to be accounted for in another fund. It is the State's largest single fund and receives most State taxes and other resources not dedicated to particular purposes. General Fund moneys are also transferred to other funds, primarily to support certain capital projects and debt service payments in other fund types. In some cases, the fiscal year results provided below may exclude certain timing-related transactions which have no net impact on operations.

Recent Trends

Following a period of solid operating results from 2003-04 through 2006-07, State finances began to lose momentum during 2007-08, preceding the State economy's contraction and concomitant decline in revenues during 2008-09. As a result, the State's General Fund closing balance has declined by more than $1 billion over the last three years, from $3.0 billion in 2006-07, to $2.8 billion in 2007-08, and to $1.9 billion in 2008-09.

2008-09 Fiscal Year

The State ended 2008-09 in balance on a cash basis in the General Fund. General Fund receipts, including transfers from other funds, were $1.84 billion lower than the State's initial projections for 2008-09. Disbursements for the year, including transfers to other funds, finished at $1.75 billion lower than initially expected. This resulted in $83 million less available in cash reserves than was planned when the budget was enacted.

The General Fund ended the 2008-09 fiscal year with a balance of $1.9 billion, which included dedicated balance of $1.2 billion in the State's rainy day reserve funds that can only be used for unforeseen mid-year shortfalls, the contingency reserve fund to guard against litigation risks ($21 million), the Community Projects Fund ($145 million) and $503 million in general reserves, $163 million of which DOB expects to use for payments initially planned for 2008-09 that were delayed until 2009-10. As described more fully under the section on "Extraordinary Federal Aid" in this AIS, the year-end balance was substantially improved by the receipt of $1.3 billion in unplanned General Fund relief from the temporary increase in the Federal matching rate for Medicaid expenditures under ARRA.

General Fund receipts, including transfers from other funds and the impact of the tax refund reserve transaction, totaled $53.8 billion in 2008-09, an increase of $707 million from 2007-08 results. While tax receipts decreased by $94 million, miscellaneous receipts increased by $623 million and transfers increased by $178 million. The decline in tax receipts was primarily attributable to a decline in business taxes.

General Fund spending, including transfers to other funds, totaled $54.6 billion in 2008-09, an increase of $1.2 billion from 2007-08. The main source of annual growth was School Aid.

2007-08 Fiscal Year

The State ended 2007-08 in balance. Receipts in 2007-08 were $578 million lower than the State's initial projections while disbursements for the year finished at $299 million lower than expectations. The result was a $279 million decrease in cash reserves. The reserves were used to finance the costs of labor settlements ($138 million), debt management actions, including defeasing certain auction rate bonds ($128 million), and to finance discretionary grants from the Community Projects Fund ($13 million).

The General Fund ended the 2007-08 fiscal year with a balance of $2.8 billion, which included dedicated balances of $1.2 billion in the State's rainy day reserve funds that can only be used for unforeseen mid-year shortfalls (after a $175 million deposit to the new Rainy Day Reserve Fund at the close of 2007-08), the Contingency Reserve Fund ($21 million), the Community Projects Fund ($340 million) and $1.2 billion in general reserves, $122 million of which DOB expects to use for debt management.

General Fund receipts, including transfers from other funds and the impact of the tax refund reserve transaction, totaled $53.1 billion in 2007-08, an increase of $1.7 billion from 2006-07 results. While tax receipts decreased by $273 million, transfers increased by $1.9 billion and miscellaneous receipts increased by $191 million. The decline in tax receipts was primarily attributable to a decline in business taxes and in personal income taxes.

General Fund spending, including transfers to other funds, totaled $53.4 billion in 2007-08, an increase of $1.8 billion from 2006-07. The main sources of annual growth were School Aid, Children and Family Services, and public assistance.

2006-07 Fiscal Year

DOB reported a 2006-07 General Fund surplus of $1.5 billion. Results for 2006-07 were $1.5 billion higher than the balanced Enacted Budget as a result of receipts revisions over initial projections ($1.4 billion) and changes to reserve fund balances ($767 million), partly offset by higher than initially projected disbursements ($607 million). Total receipts, including transfers from other funds, were $51.4 billion. Disbursements, including transfers to other funds, totaled $51.6 billion.

The General Fund ended the 2006-07 fiscal year with a balance of $3.0 billion, which included dedicated balances of $1.0 billion in the State's rainy day reserve fund (after an $87 million deposit at the close of 2006-07), the Contingency Reserve Fund ($21 million), and the Community Projects Fund ($278 million). The closing balance also included $1.7 billion in general reserves.

General Fund receipts, including transfers from other funds and the impact of the tax refund reserve transaction, totaled $51.4 billion in 2006-07, an increase of $4.2 billion from 2005-06 results. Tax receipts increased by $3.4 billion, transfers increased by $419 million, and miscellaneous receipts increased by $239 million.

General Fund spending, including transfers to other funds, totaled $51.6 billion in 2006-07, an increase of $5.1 billion from 2005-06. The main sources of annual growth were School Aid, Medicaid, and higher education programs.

State Operating Funds 2006-07 through 2008-09

The State Operating Funds portion of the Enacted Budget Financial Plan is comprised of the General Fund and funds specified for dedicated purposes, but excludes capital project funds and Federal Funds.

Recent Trends

State Operating Funds spending increased from $77.0 billion in 2007-08 to $78.2 billion in 2008-09, an increase of $1.2 billion or 1.5 percent. Excluding transfers to other funds, the General Fund portion of State Operating Funds decreased by $2.2 billion. At the same time, there was higher annual spending for programs supported by special revenues ($2.9 billion) and debt service funds ($450 million), more than offsetting the General Fund decline. The largest contributors to the spending increase include additional School Aid ($1.7 billion) and additional debt service payments ($426 million), partly offset by reduced Medicaid spending ($800 million) which is primarily attributable to the State's receipt of Federal ARRA funds at the end of 2008-09 that offset State Operating Funds spending for Medicaid.

Over the three-year period beginning in 2006-07, State Operating Funds spending has grown by an average 3.1 percent annually. Historically, the State has financed an increasing share of its operations outside of the General Fund. Major programmatic changes that have increased activity outside the General Fund include the financing of certain Medicaid and other health care costs under HCRA and through the use of Federal ARRA funds, and the creation of the STAR program that is funded by directing PIT receipts to a special revenue fund.

2008-09 Fiscal Year

State Operating Funds receipts totaled $75.2 billion in 2008-09, a decrease of $371 million from the 2007-08 results. Apart from the growth in General Fund receipts described above, tax receipts to other State Operating Funds decreased. Actual State Operating Funds disbursements totaled $78.2 billion in 2008-09, an increase of $1.2 billion from the 2007-08 results. School aid was the largest source of annual program growth.

The State ended the 2008-09 fiscal year with a State Operating Funds cash balance of $4.7 billion. In addition to the $1.9 billion General Fund balance, the State's special revenue funds has a closing balance of $2.5 billion and the debt service funds had a closing balance of $298 million. The fund balance in the special revenue funds largely reflects the timing of receipts and disbursements (e.g. dedicated monies received for a specified purpose prior to disbursement). The largest fund balances are dedicated to finance the operations and activities of SUNY campuses and hospitals ($742 million) and ongoing HCRA programs ($240 million). The remaining special revenue fund balances are held in numerous funds and accounts that support a variety of programs including industry regulation, public health, and public safety. The fund balance in the debt service funds reflects the timing of bond sales.

2007-08 Fiscal Year

State Operating Funds receipts totaled $75.6 billion in 2007-08, an increase of $3.0 billion from the 2006-07 results. In addition to the growth in General Fund receipts described above, tax receipts to other State Operating Funds also increased. Actual State Operating Funds disbursements totaled $77.0 billion in 2007-08, an increase of $3.5 billion from the 2006-07 results. School aid, STAR, and transportation aid were the main sources of annual program growth.

The State ended the 2007-08 fiscal year with a State Operating Funds cash balance of $6.6 billion. In addition to the $2.8 billion General Fund balance, the State's special revenue funds has a closing balance of $3.5 billion and the debt service funds had a closing balance of $285 million. The fund balance in the special revenue funds largely reflects the timing of receipts and disbursements (e.g.

dedicated monies received for a specified purpose prior to disbursement). The largest fund balances are dedicated to finance the operations and activities of SUNY campuses and hospitals ($838 million) and ongoing HCRA programs ($597 million). The remaining special revenue fund balances are held in numerous funds and accounts that support a variety of programs including industry regulation, public health, and public safety. The fund balance in the debt service funds reflects the timing of bond sales.

2006-07 Fiscal Year

The State ended the 2006-07 fiscal year with a State Operating Funds cash balance of $6.9 billion. In addition to the $3.0 billion General Fund balance, the State's special revenue funds had a closing balance of $3.7 billion and the debt service funds had a closing balance of $233 million. The fund balance in the special revenue funds largely reflects the timing of receipts and disbursements (e.g. dedicated monies received for a specified purpose prior to disbursement). The largest fund balances are dedicated to finance ongoing HCRA programs ($706 million) and the operations and activities of SUNY campuses and hospitals ($685 million). The remaining special revenue fund balances are held in numerous funds and accounts that support a variety of programs including industry regulation, public health, and public safety. The fund balance in the debt service funds reflects the timing of bond sales.

State Operating Funds receipts totaled $72.6 billion in 2006-07, an increase of $4.5 billion from the 2005-06 results. In addition to the growth in General Fund receipts described above, tax receipts to other State Operating funds also increased. Actual State Operating Funds disbursements totaled $73.5 billion in 2006-07, an increase of $7.2 billion from the 2005-06 results. School aid, Medicaid, STAR, and higher education were the main sources of annual program growth.

All Funds 2006-07 through 2008-09

The All Funds Financial Plan includes Federal aid received by the State and capital project funds, making it the broadest measure of the State budget. The All Funds Financial Plan records the operations of the four governmental fund types: the General Fund, Special Revenue Funds, Capital Project Funds, and Debt Service Funds.

Recent Trends

All Funds spending totaled $121.6 billion in 2008-09, $5.5 billion (4.8 percent) higher than in 2007-08. The State Operating Funds component of All Funds spending increased by $1.2 billion, as described above, and was complemented by an increase in capital project disbursements of $699 million (11 percent), which supported economic development and transportation projects. Federal operating funds spending increased by $3.6 billion (11 percent), which is due primarily to growth in Medicaid, welfare, and public health.

2008-09 Fiscal Year

The State ended the 2008-09 fiscal year with an All Funds cash balance of $4.6 billion. Along with the $4.7 billion State Operating Funds balance described above, Federal operating funds had a closing balance of $376 million, offset by a negative capital project funds closing balance of $507 million. The fund balance in the Federal operating funds partly reflects the timing of receipts and disbursements (e.g. dedicated monies received for a specified purpose prior to disbursement). The negative balance in the capital projects fund results from outstanding loans from STIP used to finance capital projects costs prior to the receipt of bond proceeds.

All Funds receipts for 2008-09 totaled $119.2 billion, an increase of $3.8 billion over 2007-08 results. Annual growth in Federal grants ($3.9 billion) and miscellaneous receipts ($421 million) was partially offset by a decline in tax receipts ($534 million), largely attributable to business tax declines.

All Funds disbursements for 2008-09 totaled $121.6 billion, an increase of $5.5 billion over 2007-08 results. The annual change reflects growth in School Aid, Medicaid, transportation aid, economic development aid and other State programs.

2007-08 Fiscal Year

The State ended the 2007-08 fiscal year with an All Funds cash balance of $6.5 billion. Along with the $6.6 billion State Operating Funds balance described above, Federal operating funds had a closing balance of $359 million, offset by a negative capital project funds closing balance of $434 million. The fund balance in the Federal operating funds partly reflects the timing of receipts and disbursements (e.g. dedicated monies received for a specified purpose prior to disbursement). The negative balance in the capital projects fund results from outstanding loans from STIP used to finance capital projects costs prior to the receipt of bond proceeds.

All Funds receipts for 2007-08 totaled $115.4 billion, an increase of $3.0 billion over 2006-07 results. Moderate growth in tax collections and miscellaneous receipts were partially offset by a decline in Federal grants. All Funds disbursements for 2007-08 totaled $116.1 billion, an increase of $3.3 billion over 2006-07 results. The annual change reflects growth in School Aid, school tax relief, transportation aid and other State programs.

2006-07 Fiscal Year

The State ended the 2006-07 fiscal year with an All Funds cash balance of $6.8 billion. Along with the $6.9 billion State Operating Funds balance described above, the Federal operating funds had a closing balance of $336 million, offset by a negative balance in the capital projects funds of $432 million. The fund balance in the Federal operating funds partly reflects the timing of receipts and disbursements (e.g. dedicated monies received for a specified purpose prior to disbursement). The negative balance in the capital projects fund results from outstanding loans from STIP used to finance capital projects costs prior to the receipt of bond proceeds.

All Funds receipts for 2006-07 totaled $112.4 billion, an increase of $5.4 billion over 2005-06 results. Strong growth in tax collections and moderate growth in Federal grants, were partially offset by a decline in miscellaneous receipts. All Funds disbursements for 2006-07 totaled $112.8 billion, an increase of $8.4 billion over 2005-06 results. The annual change reflects growth in Medicaid, School Aid, higher education, school tax relief and other State programs.

GAAP-Basis Results for Prior Fiscal Years

The Comptroller prepares Basic Financial Statements and Other Supplementary Information on a GAAP basis for governments as promulgated by GASB. The Basic Financial Statements, released in July each year, include the Statement of Net Assets and Activities, the Balance Sheet and Statement of Revenues, Expenditures and Changes in Fund Balances for the Governmental Funds, the Statements of Net Assets, Revenues, Expenses and Changes in Fund Net Assets and Cash Flows for the Enterprise Funds, the Statements of Fiduciary Net Assets and Changes in Fiduciary Net Assets and the Combining Statements of Net Assets and Activities for Discretely Presented Component Units. These statements are audited by independent certified public accountants. The Comptroller also prepares and issues a Comprehensive Annual Financial Report, which includes a management discussion and analysis (MD&A), the Basic Financial Statements, other supplementary information which includes individual fund combining statements, and a statistical section. For information regarding the State's accounting and financial reporting requirements, see the section in the AIS entitled "State Organization—Accounting, Financial Reporting and Budgeting."

Both the Basic Financial Statements and Other Supplementary Information and Comprehensive Annual Financial Reports for prior fiscal years can be obtained from the Office of the State Comptroller, 110 State Street, Albany, NY 12236 or at the OSC website at www.osc.state.ny.us. The following table summarizes recent governmental funds results on a GAAP basis.

Comparison of Actual GAAP-Basis Operating Results

March 31, 2006	45,997	3,136	49,133

Economics and Demographics

The following section presents economic information that may be relevant in evaluating the future prospects of the State economy. Additional information on the economic forecast that supports the current financial plan projections appears in this AIS in the section entitled "Current Fiscal Year."

The demographic and statistical data in this section, which have been obtained from the sources indicated, do not represent all of the factors which may have a bearing on the State's fiscal and economic affairs. Further, such information requires economic and demographic analysis in order to assess its significance, and may be interpreted differently by individual experts.

The U.S. Economy

Revised data indicate that national economic conditions deteriorated substantially over the last six months. Revised data indicate that the U.S. economy contracted 6.3 percent in the fourth quarter of 2008, after adjusting for inflation, the largest decline since the first quarter of 1982. The decline was particularly broad-based ranging from a 4.3 percent decline in real household consumption to a 23.6 percent decline in real exports. DOB projects a decline of similar magnitude for the first quarter of this year, with a more modest decline projected for the second quarter. The U.S. economy is now projected to contract 2.9 percent for all of 2009, the largest annual decline of the postwar period and more than twice the rate of decline projected in January. Real GDP growth for 2010 has been revised down to 1.5 percent.

The pace of the economy's contraction is reflected in the accelerated rate of job loss that occurred in the fall of 2008. The U.S. labor market lost an average of 667,000 jobs each month from November 2008 through March 2009, compared with an average loss of 180,000 jobs during the first 10 months of last year. Jobs have been shed from every major sector of the economy except for health care. The nation's unemployment rate rose to 8.5 percent in March 2009, compared with 5.1 percent for the same month of 2008. DOB now projects non-agricultural employment to fall 3.7 percent in 2009, followed by a smaller decline of 0.1 percent in 2010. The unemployment rate is now expected to average 8.9 percent for 2009, followed by 9.4 percent for 2010. In addition to cutting jobs, the most recent data indicate that private sector businesses are cutting even more deeply into investment for equipment, structures, and inventories than projected in January. Total non-residential investment, which includes both plant and equipment, is now projected to fall 12.4 percent in 2009. The size of the inventory correction projected for 2009, as a percentage of GDP, would be the largest since 1949.

There are signs that credit market conditions among banks have improved since the fall of Lehman Brothers and other negative developments in the financial world. But an unknown quantity of asset-backed debt remains on bank balance sheets, causing lending institutions to restrain lending activity. Residential and commercial mortgage-backed debt continues to be of particular concern. In addition, the contracting economy has increased default risk across all other types of debt, also constraining the supply of credit. Lower spending by households and businesses has reduced the demand for borrowed funds as well. The Federal Reserve reports that credit card debt fell 0.8 percent in February, the largest monthly decline since the mid-1970s, likely reflecting both demand and supply conditions. Consequently, the total volume of lending remains subdued, with the uncertainty associated with bank balance sheets continuing to add to equity market volatility.

Economic weakness and a declining labor market are expected to result in declines in wages and several of the non-wage components of personal income. Wages are now projected to fall 1.4 percent for 2009, followed by growth of 2.7 percent for 2010. Total personal income is now expected to fall 0.3 percent for 2009, the first annual decline since 1949. In response to tight credit market conditions and declining employment and income, households are adjusting their balance sheets by increasing their savings and reducing consumption. Consumption fell 3.8 percent in the third quarter of 2008, followed by an even greater decline of 4.3 percent in the fourth. These declines represent the largest since 1980. Auto sales reported for early 2009 are near historic lows. DOB has revised real household consumption growth down to a decline of 1.0 percent for 2009, with growth of only 1.4 percent projected for 2010.

Sources: US Department of Commerce, Bureau of Economic Analysis; US Department of Labor, Bureau of Labor Statistics. Table reflects revisions by source agencies to figures for prior years.

[1] As projected by the NYS DOB, based on National Income and Product Account data through March 2009.

The global recession has only deepened since the January forecast. Real U.S. exports are now projected to fall 15.1 percent for 2009, with a much steeper decline projected for imports as well. Another casualty of the global downturn has been oil prices, which have fallen from their July 2008 peak of $147 per barrel to about $50. Other commodity prices have followed suit, with gasoline prices also way off of their most recent highs. As a result, the general price level, as measured by the Consumer Price Index, is now projected to fall 0.5 percent in 2009, the first annual decline since 1955, followed by consumer price inflation of 1.7 percent for 2010. Consequently, DOB does not expect the Federal Reserve to alter its current federal funds policy target until the middle of 2010.

Led by the nation's troubled financial sector, U.S. corporate profits fell for six consecutive quarters starting in 2007Q3. The 51.4 percent decline for the fourth quarter of 2008 was the largest since the fourth quarter of 1953, with three more declines expected for the first three quarters of 2009. Consequently, DOB has revised down its outlook for profits since the release of the January forecast. DOB projects U.S. corporate profits from current production, including the capital consumption and inventory valuation adjustments, to fall 22.0 percent in 2009, followed by growth of 4.6 percent for 2010. Though equity markets have risen from their recent lows, DOB projects prices, as represented by the S&P 500, to fall 31.2 percent on an annual average basis for 2009, followed by growth of 10.0 percent for 2010.

DOB outlook calls for an end to the current recession sometime in the third quarter, making it the longest since the Great Depression. However, there are a number of risks to the forecast. The large economic stimulus package passed by Congress in February and a Federal Reserve interest rate target of near zero, along with its massive injections of liquidity into the financial system, are expected to contribute to positive, albeit low growth in real U.S. GDP by the third quarter of this year. However, the response of the economy to this stimulus depends in part to the normal functioning of credit markets. Further delay in the return of normalcy to markets could in turn delay the onset of the recovery. A weaker labor market than projected could result in even lower incomes and weaker household spending than projected. The global economy could contract further than anticipated, further depressing demand for U.S. exports and putting additional downward pressure on corporate earnings. Improving equity prices as markets look beyond the current crisis have been a recent bright spot, but slower corporate earnings growth than expected could further depress equity markets, delaying their recovery and that of Wall Street. On the other hand, a stronger response to the stimulus package, higher equity prices, or stronger global growth than anticipated could result in stronger economic growth than is reflected in the forecast.

The New York Economy

DOB estimates that the New York State economy experienced a business cycle peak in August 2008, fully eight months after the nation as a whole. However, as the epicenter of the global financial crisis, it is likely that the State downturn could be deeper than those of the recent past. Data released since January indicate that the fourth quarter of 2008 was a significant turning point for the State economy. The 3-month increase in the State unemployment rate from November to February on a seasonally adjusted basis was the largest, in both absolute and percentage terms, over the history of the series. Although there was no change from February to March, the March rate was fully three percentage points above its year ago value. Initial unemployment benefit claims for March 2009 were up 75.3 percent from the same month in 2008. As a result, State private sector employment is now projected to fall 2.5 percent for 2009, followed by a decline of 0.3 percent for 2010.

The securities industry has seen an unprecedented decline in profitability since the third quarter of 2007. With the investment banking industry as we knew it now gone, the profit levels achieved earlier in the decade may no longer be attainable. Consequently, DOB projects a decline in State wages for 2009 of 4.2 percent, the largest annual decline in the history of the Quarterly Census of Employment and Wage (QCEW) data. Wage growth for 2010 has been revised down to 2.0 percent.

The current downturn has spread far beyond Wall Street. DOB now projects significant declines in every sector of the economy except for education and health care and social assistance. Falling U.S. corporate earnings is reducing the demand for the State's business and professional services, where some of the largest job losses are expected. Large rates of decline are also expected for financial services, manufacturing, and construction. Credit market conditions and rising debt default rates are expected to continue to depress real estate activity, particularly in the commercial sector where high-value transactions contribute significantly to state and local government revenues. The volume of such transactions can be expected to fall as office vacancy rates rise; the downtown New York City office vacancy rate rose 32 percent between the fourth quarter of 2007 and the fourth quarter of 2008, while the midtown rate rose 67 percent.

The current recession has been characterized by a loss of vast sums of wealth from both a depressed equity market and a depressed real estate market. The simultaneous decline of both markets distinguishes current economic conditions from those that existed during the last recession. As of the fourth quarter of 2008, an unprecedented $12.8 trillion in net wealth had been destroyed since its 2007Q3 peak. Consequently, the Budget Division is projecting even larger declines in taxable income than occurred during the last recession. New York State adjusted gross income fell 5.5 percent in 2001 and another 4.4 percent in 2002, following the collapse of the high-tech/Internet bubble and the attacks of September 11. For 2008 and 2009, declines of 7.1 percent and 7.9 percent are projected, respectively. The loss of wealth, along with declining State employment and income, is also having an impact on household spending, depressing taxable sales as well.

Sources: US Department of Commerce, Bureau of Economic Analysis; NYS Department of Labor. Table reflects revisions by source agencies to data for prior years.

[1]As projected by Division of the Budget, based on National Income and Product Account data and employment data available through March 2009.

All of the risks to the U.S. forecast apply to the State forecast as well, although as the nation's financial capital, financial market uncertainty poses a particularly large degree of risk for New York. Lower levels of financial market activity than anticipated could result in a further delay in the recovery of Wall Street profits and bonuses. A more severe national recession than expected could prolong the State's downturn, producing weaker employment and wage growth than projected. Weaker equity and real estate activity than anticipated could negatively affect household spending and taxable capital gains realizations. These effects could ripple though the economy, further depressing both employment and wage growth. In contrast, should the national and world economies grow faster than expected, a stronger upturn in stock prices, along with even stronger activity in mergers and acquisitions and other Wall Street activities, could result in higher wage and bonuses growth than projected.

New York is the third most populous state in the nation and has a relatively high level of personal wealth. The State's economy is diverse, with a comparatively large share of the nation's financial activities, information, education, and health services employment, and a very small share of the nation's farming and mining activity. The State's location and its air transport facilities and natural harbors have made it an important link in international commerce. Travel and tourism constitute an important part of the economy. Like the rest of the nation, New York has a declining proportion of its workforce engaged in manufacturing, and an increasing proportion engaged in service industries. In 2003, Federal and state governments began reporting employment and wage statistics in accordance with the NAICS industrial classification system.

Manufacturing: Manufacturing employment continues to decline in New York, as in most other states, and New York's economy is less reliant on this sector than in the past. However, it remains an important sector of the State economy, particularly for the upstate region, which hosts high concentrations of manufacturers of transportation and other types of equipment.

Trade, Transportation, and Utilities: As defined under NAICS, the trade, transportation, and utilities supersector accounts for the second largest component of State nonagricultural employment, but only the fifth largest when measured by wage share. This sector accounts for less employment and wages for the State than for the nation.

Financial Activities: New York City is the nation's leading center of banking and finance and, as a result, this is a far more important sector in the State than in the nation as a whole. Although this sector accounts for under one-tenth of all nonagricultural jobs in the State, it contributes more than one-fifth of total wages.

Other Service Sectors: The remaining service-producing sectors include information, professional and business services, private education and healthcare, leisure and hospitality services, and other services. These industries combined account for more than four of every ten nonagricultural jobs in New York and, except for leisure and hospitality, each accounts for a higher proportion of total State employment than for the nation as a whole.

Agriculture: Farming is an important part of the economy in rural areas, although it constitutes only about 0.2 percent of total State output. Principal agricultural products of the State include milk and dairy products, greenhouse and nursery products, fruits, and vegetables. New York ranks among the nation's leaders in the production of these commodities.

Government: Federal, State and local governments together comprise the third largest sector in terms of nonagricultural jobs, with the bulk of the employment accounted for by local governments. Public education is the source of nearly one-half of total State and local government employment.

Composition of Nonagricultural Employment and Wages by Major NAICS Sector for 2008
(Percent)

	Employment		Wages	
	State	United States	State	United States
Natural Resources and Mining	0.1	0.6	0.3	1.2
Construction	4.1	5.3	4.1	5.6
Manufacturing	6.1	9.8	5.7	11.4
Trade, Transportation, and Utilities	17.3	19.2	12.3	16.0
Information	3.0	2.2	4.3	3.4
Financial Activities	8.2	5.9	23.4	9.5
Professional and Business Service:	13.2	13.0	16.8	16.3
Educational and Health Services	18.5	13.8	12.6	12.1
Leisure and Hospitality	8.1	9.8	3.8	4.3
Other Services	4.2	4.0	2.7	3.1
Government	17.2	16.4	14.2	17.1

The importance of the different sectors of the State's economy relative to the national economy is shown in the above table, which compares nonagricultural employment and wages by sector for the State and the nation as a whole. Manufacturing and construction account for smaller shares of employment for the State than for the nation, while service industries account for a larger share. The financial activities sector share of total wages is particularly large for the State relative to the nation. Thus, the State is likely to be less affected than the nation as a whole during an economic recession that is concentrated in manufacturing and construction, but likely to be more affected by any economic downturn that is concentrated in the services sector.

Economic and Demographic Trends

In calendar years 1990 through 1998, the State's rate of economic growth was somewhat slower than that of the nation. In particular, during the 1990-91 recession and post-recession period, the economies of the State and much of the rest of the Northeast were more heavily damaged than the nation as a whole and were slower to recover. However, the situation subsequently improved. In 1999, for the first time in 13 years, State employment growth surpassed that of the nation, and in 2000 the rates were essentially the same. In 2001, the September 11th attack resulted in a downturn in New York that was more severe than for the nation as a whole. Although the State unemployment rate was higher than the national rate from 1991 to 2000, the gap between them has since closed.

The following table compares population change in the State and in the United States since 1960.

Comparitive Population Figures

	State			US	
	Total Population (000s)	% Change from Preceding Period	Percentage of U.S. Population	Total Population (000s)	% Change from Preceding Period
1960	16,782	13.2	9.4	179,323	18.5
1970	18,241	8.7	9.0	203,302	13.4
1980	17,558	(3.7)	7.8	226,546	11.4
1990	17,990	2.5	7.2	248,710	9.8
2000	18,976	5.5	6.7	281,422	13.2

Total State nonagricultural employment has declined as a share of national nonagricultural employment. The following historical table compares these levels and the rate of unemployment for the State and the nation.

Nonagricultural Employment and Unemployment Rate for New York and the United States

	Employment (000s)		State as Percent of US Employment	Unemployment Rate (%)	
	State	US		State	US
1960	6,182	54,296	11.4	N/A	5.5
1970	7,156	71,006	10.1	N/A	4.9
1980	7,207	90,528	8.0	7.5	7.1
1990	8,214	109,487	7.5	5.3	5.6
2000	8,638	131,785	6.6	4.5	4.0
2008	8,795	137,066	6.4	5.4	5.8

Source: US Department of Labor and NYS Department of Labor.

Note: Nonagricultural employment and unemployment rates are generated from separate surveys.

State per capita personal income has historically been significantly higher than the national average, although the ratio has varied substantially. Because New York City is an employment center for a multi-state region, State personal income measured on a residence basis understates the relative importance of the State to the national economy and the size of the base to which State taxation applies. The following table compares per capita personal incomes for the State and the nation.

Per Capita Personal Income
(Income in Dollars)

	State	US	State/US
1960	2,821	2,269	1.24
1970	4,874	4,085	1.19
1980	11,015	10,114	1.09
1990	23,523	19,477	1.21
2000	34,898	29,847	1.17
2008	48,076	39,751	1.21

Debt and Other Financing Activities

State Law requires the Governor to submit the five-year Capital Program and Financing Plan (the Plan) with the Executive Budget and to submit an update to the Plan (the "Enacted Plan") by 30 days after the enactment of the State Budget. A copy of the Executive Budget and the Enacted Budget Capital Program and Financing Plan can be obtained, when available, by contacting the Division of the Budget, State Capitol, Albany, NY 12224, (518) 474-8282, or at www.budget.state.ny.us.

State Debt and Other Financings

State-related debt consists of State-supported debt, where the State, subject to an appropriation, is directly responsible for paying debt service, as well as State-guaranteed debt (to which the full faith and credit of the State has been pledged), moral obligation financings and certain contingent-contractual obligation financings, where debt service is expected to be paid from other sources and State appropriations are contingent in that they may be made and used only under certain circumstances (see "State-Related Debt"). *State-supported debt* is a subset of State-related debt. It includes general obligation debt, to which the full faith and credit of the State has been pledged, and lease-purchase and contractual obligations of public authorities and municipalities, where the State's legal obligation to make payments to those public authorities and municipalities is subject to and paid from annual appropriations made by the Legislature (see "State-Supported Debt Outstanding"). Since May 2002, the State has financed its capital program, previously financed through lease-purchase and contractual obligations of public authorities, with State Personal Income Tax Revenue Bonds ("PIT"), issued by Authorized Issuers (defined hereafter).

The State has never defaulted on any of its general obligation indebtedness or its obligations under lease-purchase or contractual obligation financing arrangements and has never been called upon to make any direct payments pursuant to its guarantees.

The table on the following page summarizes State-related debt outstanding for the past three fiscal years.

Source: Data based on the Comprehensive Annual Financial Report (CAFR), specifically DOB's cash estimate of the GAAP numbers contained therein (CAFR Tables 5 and Note 10) for year ending 3/31/07 and 3/31/08. Data provided by DOB for year ending 3/31/09. Presentation of data and composition of State-Related Debt supplied by DOB. Amounts for DASNY/MCFFA-Secured Hospital Program, Moral Obligation Financing and State-Guaranteed Debt are reported as a contingent liability to the State in Note 10 of the CAFR and not counted as debt outstanding in Table 5 of the CAFR.

(1) Amounts outstanding reflect original par amounts or original gross proceeds in the case of capital appreciation bonds. Amounts outstanding do not reflect accretion of capital appreciation bonds or premiums received.

(2) Amount estimated for 3/31/2009.

State-Supported Debt Outstanding

State-supported debt includes general obligation debt, to which the full faith and credit of the State has been pledged, and lease-purchase and contractual obligations of public authorities and municipalities, where the State's legal obligation to make payments to those public authorities and municipalities is subject to and paid from annual appropriations made by the Legislature.

General Obligation Financings

Under the State Constitution, the State may not, with limited exceptions for emergencies, undertake a long-term general obligation borrowing (i.e., borrowing for more than one year) unless the borrowing is authorized in a specific amount for a single work or purpose by the Legislature and approved by the voters. There is no constitutional limitation on the amount of long-term general obligation debt that may be so authorized and subsequently incurred by the State. However, the Debt Reform Act of 2000 (Debt Reform Act) imposed statutory limitations on new State-supported debt issued on and after April 1, 2000. The State Constitution provides that general obligation bonds must be paid in equal annual principal installments or installments that result in substantially level or declining debt service payments, mature within 40 years after issuance, and begin to amortize not more than one year after the issuance of such bonds. However, general obligation housing bonds must be paid within 50 years after issuance, with principal commencing no more than three years after issuance. Regardless, the Debt Reform Act limits the maximum term of State-supported bonds, including general obligation bonds, to thirty years (see "Limitations on State-supported Debt – Debt Reform Act of 2000").

Under the State Constitution, the State may undertake short-term borrowings without voter approval (i) in anticipation of the receipt of taxes and revenues, by issuing tax and revenue anticipation notes (TRANs), and (ii) in anticipation of the receipt of proceeds from the sale of duly authorized but unissued general obligation bonds, by issuing bond anticipation notes (BANs). TRANs must mature within one year from their date of issuance and cannot be refunded or refinanced beyond such period. However, since 1990, the State's ability to issue TRANs has been limited due to the enactment of the fiscal reform program which created LGAC (see "Local Government Assistance Corporation"). BANs may only be issued for the purposes and within the amounts for which bonds may be issued pursuant to voter authorizations, and must be paid from the proceeds of the sale of bonds in anticipation of which they were issued or from other sources within two years of the date of issuance or, in the case of BANs for housing purposes, within five years of the date of issuance. In order to provide flexibility within these maximum term limits, the State had previously utilized the BANs authorization to conduct a commercial paper program to fund disbursements eligible for general obligation bond financing.

General Obligation Bonds Outstanding

General obligation debt is currently authorized for transportation, environment and housing purposes. Transportation-related bonds are issued for State and local highway and bridge improvements, aviation, mass transportation, rail, canal, port and waterway programs and projects. Environmental bonds are issued to fund environmentally-sensitive land acquisitions, air and water quality improvements, municipal non-hazardous waste landfill closures and hazardous waste site cleanup projects. The amount of general obligation bonds issued in the 2008-09 fiscal year (excluding refunding bonds) was $455 million, and as of March 31, 2009, the total amount of general obligation debt outstanding was $3.3 billion. The following table sets forth information regarding the levels of authorized, unissued and outstanding State general obligation debt by purpose as of March 31, 2009. The Enacted Capital Plan projects that approximately $599 million in general obligation bonds will be issued in 2009-10.

(1) Amounts have been rounded to the nearest million.
(2) The Legislature did not provide any limitation on bonds to be issued for specific project categories or programs authorized within the Highway Facilities/Other Transportation (excluding MTA) Purpose.
(3) This amount rounds to zero, but there was an outstanding balance of $126,438.48 at March 31, 2009.
(4) This amount rounds to zero, but there was an outstanding balance of $30,318.00 at March 31, 2009.
(5) This amount rounds to zero, but there was an outstanding balance of $40,224.71 at March 31, 2009.

State Personal Income Tax Revenue Bond Financing

Legislation enacted in 2001 provided for the issuance of State PIT Revenue Bonds by the Dormitory Authority of the State of New York (DASNY), the New York State Environmental Facilities Corporation (EFC), the Housing Finance Agency (HFA), the New York State Thruway Authority (Thruway Authority) and the Urban Development Corporation (UDC), (collectively, the "Authorized Issuers").

The legislation provides that 25 percent of State PIT receipts, excluding refunds owed to taxpayers, be deposited to the Revenue Bond Tax Fund (RBTF) for purposes of making debt service payments on State PIT Revenue Bonds, with excess amounts returned to the General Fund. Legislation enacted in 2007 increased the amount of PIT receipts to be deposited into the RBTF by removing an exclusion for PIT amounts deposited to the STAR Fund. In the event that (i) the State Legislature fails to appropriate amounts required to make all debt service payments on the State PIT Revenue Bonds or (ii) having been appropriated and set aside pursuant to a certificate of the Director of the Budget, financing agreement payments have not been made when due on the State PIT Revenue Bonds, the legislation requires that PIT receipts continue to be deposited to the RBTF until amounts on deposit in the Fund equal the greater of (i) 25 percent of annual PIT receipts or (ii) $6 billion.

The first State PIT Revenue Bonds were issued on May 9, 2002, and since that time, all of the Authorized Issuers have issued State PIT Revenue Bonds. To date, State PIT Revenue Bonds have been issued to support programs related to six general purposes: Education, Economic Development and Housing, Environment, State Facilities and Equipment, Transportation and Health Care. For the first time in 2007-08, State PIT bonds were issued to support the Health Care Efficiency and Affordability Law for New Yorkers (Heal NY) Capital Grant Program. State PIT Revenue Bonds are expected to continue to be the primary financing vehicle for a broad range of existing or new State-supported debt programs authorized to be secured by service contract or lease-purchase payments. The following table shows the amount of State PIT Revenue Bonds outstanding by general purpose. As of March 31, 2009, approximately $13.7 billion of State PIT Revenue Bonds were outstanding. Those outstanding State PIT Revenue Bonds are also included in the respective capital programs in the Outstanding State-related debt table (see "State-related debt"). The 2009-10 Enacted Budget projects that $4.1 billion of State PIT Revenue Bonds will be issued in 2009-10.

Total State Personal Income Tax Revenue Bonds	8,415	10,785	13,739

Source: NYS Division of the Budget

In addition, the 2009-10 Enacted Budget authorizes the use of PIT revenue bonds to finance the mental health facilities program, in response to the turbulence in the credit markets. During the 2008-09 State fiscal year, credit spreads have diverged by more than 100 basis points for highly rated credits like PIT and lower rated credits like Mental Health. If this trend continues, the State may temporarily use State PIT Revenue Bonds to finance its new money needs for the Mental Health program and refund certain variable rate bonds ($560 million) in the 2009-10 fiscal year.

State-Supported Lease-Purchase and Contractual-Obligation Financings

The State utilizes certain long-term financing mechanisms, lease-purchase and contractual obligation financings which involve obligations of public authorities or municipalities where debt service is payable by the State, but which are not general obligations of the State. Under these financing arrangements, certain public authorities and municipalities have issued obligations to finance certain payments to local governments (see "Local Government Assistance Corporation"), various capital programs, including those which finance the State's highway and bridge program, SUNY and CUNY educational facilities, health and mental hygiene facilities, prison construction and rehabilitation, economic development projects, State buildings and housing programs, and equipment acquisitions, and expect to meet their debt service requirements through the receipt of rental or other contractual payments made by the State.

Debt service payable to certain public authorities from State appropriations for such lease-purchase and contractual obligation financings may be paid from general resources of the State or from dedicated tax and other sources (i.e., State personal income taxes, motor vehicle and motor fuel related-taxes, dormitory facility rentals, and patient charges). Although these financing arrangements involve a contractual agreement by the State to make payments to a public authority, municipality or other entity, the State's obligation to make such payments is generally expressly made subject to appropriation by the Legislature and the actual availability of money to the State for making the payments.

2009-10 Enacted Budget Capital Program and Financing Plan

The Enacted Capital Program and Financing Plan ("the Capital Plan") projects that $4.1 billion of State PIT Revenue Bonds, $100 million of SUNY Dormitory Facilities Revenue Bonds, and $520 million of Mental Health Facilities Improvement Revenue Bonds will be issued in 2009-10. The Capital Plan also projects the issuance of $577 million of Dedicated Highway and Bridge Trust Fund Bonds in 2009-10. Some of the major capital programs being financed in the Capital Plan are highlighted below.

Transportation. The State Department of Transportation (DOT) is primarily responsible for maintaining and rehabilitating the State's system of highways and bridges, which includes 40,000 State highway lane miles and 7,500 State bridges. The Department also oversees and funds programs for rail, port, transit and aviation projects and programs that help defray local capital expenses associated with road and bridge projects.

The 2005-2010 Transportation Capital Plan reflects a five-year DOT capital plan of $18.2 billion and a five-year MTA capital plan of $17.9 billion. The Transportation Capital Plan includes the entire DOT plan, but only reflects the portion of the MTA capital plan that is financed by State-supported bonds. The balance of the MTA capital plan is financed by a combination of other State, City and MTA resources (see below). To partially fund the DOT and MTA plans, the voters passed the $2.9 billion Rebuild and Renew New York Transportation General Obligation Bond Act in November 2005. Proceeds from the Bond Act are divided equally between the DOT and the MTA capital programs ($1.45 billion for each program). Additional resources still need to be identified in the out years of the plan to support the MTA capital plans.

DOT's programs are financed by a combination of Federal grants, pay-as-you-go capital and bond proceeds supported by the Dedicated Highway and Bridge Trust Fund, transfers from the General Fund, and revenues from the Dedicated Mass Transportation Trust Fund. Legislation has been periodically adopted to increase the deposit of revenues into the Dedicated Highway and Bridge Trust Fund and the Dedicated Mass Transportation Trust Fund to meet program needs. In addition, general obligation bond acts have been used to support capital transportation spending.

The State has supported the capital plans of the MTA through legislation adopted in 1992 and 1993 which authorized payments, subject to appropriation, of a portion of the petroleum business tax from the State's Dedicated Mass Transportation Trust Fund to the MTA and authorized it to be used as a source of payment for non-State-supported bonds to be sold by the MTA to support its capital program. Legislation adopted in 2000 provided for increases in amounts dedicated to the MTA through the Dedicated Mass Transportation Trust Fund by increasing the portion of the petroleum business tax and other transportation-related taxes and fees that would flow to that Fund between 2000-01 and 2004-05. In 2002, the MTA implemented an overall debt restructuring program. The program simplified and restructured MTA credits, modernized resolutions and restructured existing debt to create new capital capacity and better match the bond maturities with the useful lives of the projects financed.

Education. The State finances the physical infrastructure of SUNY and CUNY, and their respective community colleges and SED through direct State capital spending and through financing arrangements with the Dormitory Authority of the State of New York (DASNY), paying all capital costs of the senior colleges and sharing equally with local governments for the community colleges, except that SUNY dormitories are financed through dormitory fees. Also included in the Enacted Capital Plan is $265 million in new bond issuances to support school construction projects for the Expanding our Children's Education and Learning (EXCEL) program.

SUNY State-operated campuses include nearly 2,300 buildings, encompassing classrooms, dormitories, libraries, research laboratories, athletic and recreation facilities, hospitals and dining halls. Currently 73 percent of these structures exceed 30 years of age. Together with the 30 SUNY community colleges, the SUNY system serves more than 425,000 students. The CUNY system is comprised of 11 senior colleges and 6 community colleges that serve more than 243,000 students.

Mental Hygiene/Health. The State provides care for its citizens with mental illness, mental retardation and developmental disabilities, and for those with chemical dependencies, through the Office of Mental Health (OMH), the Office of Mental Retardation and Developmental Disabilities (OMRDD) and the Office of Alcoholism and Substance Abuse Services (OASAS) and their network of not-for-profit service providers. Capital investments for State-operated programs are primarily supported by patient revenues through financing arrangements with DASNY. Historically, this care has been provided at large State institutions. Beginning in the 1980s, the State adopted policies to provide institutional care to only those most in need of this specialized setting and to expand care in community programs for the vast majority of those served.

OMH's capital program supports an institutional physical plant consisting of 21 campuses with over 450 actively used buildings as well as a State and non-profit operated community network of over 31,500 beds. The overall policy direction of this program has limited institutional capital projects to those that are necessary to ensure the health and safety of clients and staff, retain program accreditation, and maintain the condition of existing facilities. In addition, the program supports the preservation of existing State and community beds and the development of new non-profit operated community beds.

OMRDD's capital program supports a State institutional infrastructure comprising 13 service districts, as well as the Valley Ridge Center for Intensive Treatment and the Institute for Basic Research in Developmental Disabilities, with approximately 272 actively used buildings. Additionally, OMRDD provides capital support for a State and non-profit operated community network of over 35,000 beds. The program continues the recent shift in emphasis from the development of new facilities (primarily in the community) to the improvement and maintenance of existing State and non-profit infrastructure.

As the need for institutional beds has declined over recent years, both OMH and OMRDD have consolidated, reconfigured or closed many of their campuses, permitting the planned development of alternate uses for the surplus facilities.

Various capital programs for DOH facilities have also been financed by DASNY using patient revenues and contractual-obligation financing arrangements.

Public Protection. The State prison system currently houses slightly less than 60,000 inmates in 70 institutional facilities with 3,800 buildings. Continuing declines in the prison population, the closure of several annexes and three minimum security camps, and ongoing consolidation of the system as a result of sentencing reforms negate the need for capital investments to expand general confinement capacity. However, significant investments are anticipated in the creation of specialized units for the treatment of inmates with severe mental illness. The capital program will continue to include major investments in the maintenance of the existing facilities, including projects which promote energy efficiency.

Equipment Acquisitions. Installment purchases represent the State's contractual obligation, subject to annual appropriation by the Legislature and availability of funds, to make installment or lease-purchase payments for the State's acquisition of equipment or real property. The State currently finances these purchases with State PIT Revenue Bonds.

Other Programs. The State will issue financing for the institutional facilities of OCFS (formerly known as the Division for Youth), the State's housing programs, and various environmental, economic development, and State building programs.

Local Government Assistance Corporation (LGAC)

In 1990, as part of a State fiscal reform program, legislation was enacted creating LGAC, a public benefit corporation empowered to issue long-term obligations to fund certain payments to local governments that had been traditionally funded through the State's annual seasonal borrowing. The legislation also dedicated revenues equal to one cent of the State's four cent sales and use tax to pay debt service on these bonds. As of June 1995, LGAC had issued State-supported bonds and notes to provide net proceeds of $4.7 billion, completing the program. The issuance of these long-term obligations are to be amortized over a period of no more than 30 years.

The legislation eliminated annual seasonal borrowing of the State except in cases where the Governor and the legislative leaders have certified the need for additional seasonal borrowing, based on emergency or extraordinary factors or factors unanticipated at the time of adoption of the budget, and provided a schedule for eliminating it over time. Any seasonal borrowing is required by law to be eliminated by the fourth fiscal year after the limit was first exceeded (i.e., no TRANs seasonal borrowing in the fifth year). This provision limiting the State's seasonal borrowing practices was included as a covenant with LGAC's bondholders in the General Bond Resolution and General Subordinate Lien Bond Resolution authorizing such bonds. No restrictions were placed upon the State's ability to issue deficit notes.

The impact of the LGAC reforms, as well as other changes in revenue and spending patterns, is that the State has been able to meet its cash flow needs throughout the fiscal year without relying on short-term seasonal borrowings.

Legislation enacted in 2003 currently requires LGAC to certify, in addition to its own cash needs, $170 million annually to provide an incentive for the State to seek an annual appropriation to provide local assistance payments to New York City or its assignee. In May 2004, LGAC amended its General Bond Resolution and General Subordinate Lien Bond Resolution to make clear that any failure to certify or make payments to the City or its assignee has no impact on LGAC's own bondholders; and that if any such act or omission were to occur with respect to any possible bonds issued by The City of New York or its assignee, that act or omission would not constitute an Event of Default with respect to LGAC bonds. The 2009-10 Enacted Budget includes a local assistance appropriation of $170 million from the Local Government Assistance Tax Fund to the City.

Contingent Contractual-Obligation Financing

The State may also enter into statutorily authorized contingent-contractual obligation financings under which the State may enter into service contracts obligating it to pay debt service on bonds, subject to annual appropriation, in the event there are shortfalls in revenues from other non-State resources pledged or otherwise available, to pay the debt service on the bonds. *The State has never been required to make any payments, and does not expect to make payments, under this financing arrangement in the 2009-10 fiscal year.*

Secured Hospital Program

Pursuant to legislation enacted in 1985, the State entered into service contracts establishing a contingent-contractual obligation under financings related to the Secured Hospital Program for the purpose of enabling certain financially distressed not-for-profit hospitals to gain access to the capital markets. The State service contracts obligate the State to pay debt service, subject to annual appropriations, on bonds issued by the New York State Medical Care Facilities Finance Agency (MCFFA) and by DASNY (all now included as debt of DASNY), in the event there are shortfalls of revenues from other sources, which include hospital payments made under loan agreements between DASNY and the hospitals, and certain reserve funds held by the applicable trustees for the bonds. As of March 31, 2009, there were nine secured hospital borrowers and a total of $682 million in bonds outstanding with annual debt service payments of $77.9 million due during State fiscal year 2009-10. *The State has never been required to make any payments pursuant to the service contracts.*

As of March 31, 2009, four of the nine secured hospital borrowers were not current in making the monthly debt service payments required by their loan agreements, although one of the four made a payment and was no longer in arrears on April 1, 2009. The State anticipates that the annual bond debt service payments due during the State's 2009-10 fiscal year on all outstanding Secured Hospital Program bonds will be paid pursuant to the loan agreements between the hospitals and DASNY or from other sources, other than payments by the State pursuant to the service contracts. *Thus, the State does not anticipate being required to make any payments under the Secured Hospital Program service contracts during the 2009-10 fiscal year.*

Tobacco Settlement Financing Corporation

Legislation enacted in 2003 authorized the State to securitize all of its tobacco settlement payments to the Tobacco Settlement Financing Corporation ("TSFC", a corporation created under the legislation that is a subsidiary of the Municipal Bond Bank Agency) through an asset-backed securitization transaction. To lower costs, the legislation authorized the State to enter into contingency contracts obligating the State to pay debt service, subject to annual appropriations, on the TSFC bonds in the event that tobacco receipts and bond reserves are insufficient. To ensure that State contractual payments will not be required and that tobacco receipts and bond reserves are sufficient to pay debt service, the TSFC bonds were structured to meet or exceed all rating agency tobacco bonds stress tests. The $4.2 billion of upfront payments received by the State from the securitization were used to help restore State budget balance in 2003-04 ($3.8 billion) and 2004-05 ($400 million). As of March 31, 2009, approximately $3.59 billion in TSFC bonds were outstanding.

The bonds carry a final nominal maturity of 19 years and an expected final maturity of 13 years, based on optional redemptions. The expected final maturity may deviate due to the optional nature of the redemptions and adjustments to tobacco settlement payments due from participating manufacturers. Various manufacturers, including the original participating manufacturers, have adjusted payments downward or indicated that they plan on adjusting subsequent payments downward to states and territories, or otherwise have deposited or will deposit payments into a special disputed payments account awaiting determination of entitlement to adjustments.

Moral Obligation Financings

Moral obligation financing generally involves the issuance of debt by a public authority to finance a revenue-producing project or other activity. The debt is secured by project revenues and includes statutory provisions requiring the State, subject to appropriation by the Legislature, to make up any deficiencies which may occur in the issuer's debt service reserve fund. There has never been a payment default on any moral obligation debt of any public authority. The State does not intend to increase statutory authorizations for moral obligation bond programs. From 1976 through 1987, the State was called upon to appropriate and make payments totaling $162.8 million to make up deficiencies in the debt service reserve funds of HFA pursuant to moral obligation provisions. In the same period, the State also expended additional funds to assist the Project Finance Agency, UDC and other public authorities which had moral obligation debt outstanding. *The State has not been called upon to make any payments pursuant to any moral obligations since the 1986-87 fiscal year and no such requirements are anticipated during the 2009-10 fiscal year.*

State-Guaranteed Financings

Pursuant to specific constitutional authorization, the State may also directly guarantee certain public authority obligations. Payments of debt service on State-guaranteed bonds and notes are legally enforceable obligations of the State. The only current authorization provides for the State guarantee of the repayment of certain borrowings for designated projects of the New York State Job Development Authority ("JDA"). *The State has never been called upon to make any direct payments pursuant to any such guarantees.*

Due to concerns regarding the economic viability of its programs, JDA's loan and loan guarantee activities were suspended in 1995. JDA resumed its lending activities in 1997 under a revised set of lending programs and underwriting guidelines. In April 2004, JDA issued approximately $42.4 million of State-guaranteed bonds to refinance certain of its outstanding bonds and notes in order to restructure and improve JDA's capital finances. As of March 31, 2009, JDA had approximately $32.5 million of bonds outstanding. *The State does not anticipate that it will be called upon to make any payments pursuant to the State guarantee in the 2009-10 fiscal year.*

Other State Financings

Other State financings relate to the issuance of debt by a public authority on behalf of a municipality which receives proceeds of the sale. To ensure that debt service payments are made, the municipality assigns specified State and local assistance payments it receives to the issuer or the bond trustee. The State has no legal obligation to make any debt service payments or to continue to appropriate local assistance payments that are subject to the assignment.

State-Related Debt

State Bond Caps and Debt Outstanding by Program

The following table shows the total amount of State-related debt outstanding as of March 31, 2009 by each bond authorization. Also included in the table are the amount of enacted bond caps and bonds authorized but unissued, through April 3, 2009, to include all legislative actions taken in the 2009-10 Enacted Budget. The table includes bond information for general obligation, LGAC, lease-purchase and contractual obligation bonds. The information provided in the table for lease-purchase and contractual obligation debt includes outstanding State PIT Revenue Bonds that have been issued to finance many of the capital programs included therein (see "State Personal Income Tax Revenue Bond Financing"). Debt authorizations for capital programs are either approved or enacted all at one time and are expected to be fully issued over time, or are enacted annually by the Legislature and are usually consistent with bondable capital projects appropriations. Authorization does not, however, indicate intent to sell bonds for the entire amount of those authorizations, because capital appropriations often include projects that do not materialize or are financed from other sources. In general, the amount of bonds authorized may be increased or decreased from time to time by the Legislature. In the case of general obligation debt only, increases in the authorization must be approved by the voters.

(1) Includes only authorized programs that are active at March 31, 2009 or have outstanding program balances or both.

(2) Amounts issued may exceed the stated amount authorized by premiums, by providing for the cost of issuance, reserve fund requirements and, in certain circumstances, refunding bonds. In some cases, Authorized but Unissued bond cap amounts have been reduced by the higher of (i) net bond proceeds available to fund program, or (ii) par amount of bonds issued.

(3) Amounts outstanding reflect original par amounts or original gross proceeds in the case of capital appreciation bonds.

(4) Authorization also includes any amount necessary to refund outstanding Housing Finance Agency (HFA) State University Construction Bonds, all of which have been refunded.

(5) Authorization applies to bonds issued after March 31, 2002, prior to that date there was no limit.

(6) The total amount authorized for CUNY Senior Colleges was unlimited for resolutions prior to 7/1/85 and limited to statutory caps for both CUNY Senior and CUNY Community Colleges for resolutions adopted after 7/1/85. The amount outstanding includes CUNY Community College bonds for which the State pays Debt Service.

(7) Legislation enacted in May 2002 prohibits further issuance of bonds for this purpose, except for refunding purposes.

(8) Includes bonds issued for West Valley, DEC Environmental Infrastructure Projects, Environmental Protection Fund, Onondaga Lake, and the Office of Parks and Recreation and Historic Preservation.

(9) Includes debt outstanding for Office of General Services Buildings: 44 Holland Ave., 50 Wolf Rd., 625 Broadway Ave., Hampton Plaza, and DOT Region 1.

(10)Authorized amounts includes Certificates of Participation, which have been issued as bonds after March 31, 2003.

(11) Includes authorizations for Science and Technology Center (Syracuse), Super Computer Center (Cornell), Center for Telecommunications (Columbia), HEAT, Center for Industrial Innovation (City of Troy), Center for Advanced materials (Clarkson), Center for Electro-Optic (Rochester), Center for Neural Sciences (NYU) and Center for Incubator Facilities.

(12) Includes bonds issued for Community Capital Assistance Program (CCAP), Rebuilding the Empire State Through Opportunities in Regional Economies Program (RESTORE), Empire Opportunity Fund (EOF), Generating Employment Through New York Science Program (Gen*NY*sis), Multi-Modal Transportation Program, and Center of Excellence Program. (Laws of 2002).

(13) Includes bonds issued for the EOF, RESTORE and CCAP.

(14) Includes bonds to be issued for economic development projects outside cities of 1 million or more in population.

(15) Includes bonds to be issued for economic development and environmental projects.

(16) Authorization is limited to $165 million in annual debt service maturing no later than July 1, 2031.

(17) Includes bonds issued for Secured Hospital Program, HFA and MCFFA Moral Obligation Bonds and the JDA State-guaranteed bonds.

State-Related Debt Long-Term Trends

The following table provides an overview of State-related debt trends during the last ten years and an estimate for the current year. The table compares (1) the growth in personal income in the State and (2) the number of State residents. Total outstanding State-related debt increased from $38.8 billion at the end of the 1999-2000 fiscal year to $52.1 billion at the end of the 2008-09 fiscal year, an average annual increase of 3.33 percent. During the first five years of this ten-year period, State-related debt outstanding increased by an annual average rate of 4.93 percent and over the remaining five years of the period the annual average growth in State-related debt outstanding decreased to 2.6 percent. During the ten-year period, annual personal income in the State rose from $619.7 billion to $937.0 billion, an average annual increase of 4.70 percent. Thus, State-related obligations grew at a slower rate than personal income. Expressed in other terms, the total amount of State-related debt outstanding declined from 6.3 percent to 5.6 percent of personal income for the same period. State-related debt is expected to increase slightly in 2009-10 to 6.0 percent of personal income.

State-Related Debt Compared with Personal Income and Population
1999-2000 Through 2009-10

Fiscal Year	NYS Personal Income ($billions)(1)	Total State Population (millions)(1)	State-Related Debt Outstanding ($millions)(2)	State-Related Debt As % of Personal Income	State-Related Debt/Capita (In Dollars)
1999-2000	619.7	18.9	38,782	6.3%	2,043
2000-01	663.0	19.0	38,871	5.9%	2,037
2001-02	679.9	19.1	38,821	5.7%	2,022
2002-03	677.6	19.2	40,759	6.0%	2,115
2003-04	693.5	19.2	47,011	6.8%	2,432
2004-05	740.0	19.3	46,989	6.3%	2,422
2005-06	788.6	19.3	47,357	6.0%	2,427
2006-07	846.8	19.4	48,404	5.7%	2,483
2007-08	900.8	19.4	49,885	5.5%	2,567
2008-09 estimated	937.0	19.5	52,100	5.6%	2,654
2009-10 estimated	915.3	19.5	54,532	6.0%	2,793

Source: NYS Division of the Budget. Debt outstanding data based on: (1) NYS Comprehensive Annual Financial Report (CAFR), specifically DOB's cash estimate and presentation of the GAAP numbers and elements contained therein (on Table 5 and Note 10 of the 2007-08 CAFR) for fiscal years 1999-00 through 2007-08 and (ii) DOB estimates for fiscal years 2008-09 and 2009-10. State-Related debt outstanding includes amounts for DASNY/MCFFA-Secured Hospital Loan Program, Moral Obligation Financing and State-Guaranteed Debt. These amounts are reported as a contingent liability to the State in the CAFR and not counted as debt outstanding.

(1) For calendar year ending in State's fiscal year. Based on US Department of Commerce, Bureau of Economic Analysis (BEA) data through March, 2009. Personal income for 2008-09 estimated by the BEA and for 2009-10 estimated by the Division of the Budget
(2) Starting in 2003-04, debt outstanding includes the issuance of tobacco bonds, which are secured by the assignment of future revenues under the 1998 Master Settlement Agreement with participating cigarette manufacturers, and secondarily secured by a State contingent-contractual obligation.

Debt Service Requirements on State-Related Debt
1999-2000 Through 2009-10

Fiscal Year	Total State-Related Debt Service ($ in millions)*		Total Governmental Funds Receipts ($ in millions)	State-Related Debt Service as a % of Total Governmental Funds Receipts (includes DRRF)	State-Related Debt Service as a % of Total Governmental Funds Receipts (excludes DRRF)

State-Related Debt Service Requirements

The following table presents the current and future debt service (principal and interest) requirements on State-related debt outstanding as of March 31, 2009. The requirements of LGAC and other financing obligations of public authorities are based on the gross amounts due from the authorities to bondholders within the fiscal year when such authorities make the payments. The amounts shown do not reflect other associated costs or revenues anticipated to be available, such as interest earnings, capitalized interest or debt service reserve fund releases. Thus, the requirements shown are generally in excess of the amounts expected to be actually paid by the State during its fiscal year.

Estimated Debt Service Requirements on State-Related Debt (1)
As of March 31, 2009
(millions of dollars)

Fiscal Years Ending March 31	General Obligation	Local Government Assistance Corporation	State Personal Income Tax Financing Obligations	Other State-Supported Financing Obligations	Tobacco (2)	All Other State Related	Total*

Source: NYS Division of the Budget

*Does not include debt service for Capital Leases and Mortgage Loan Commitments.

(1) Reflects debt issued as of March 31, 2009. Estimated debt service requirements are calculated based on swap rates in effect at March 31, 2009 for all bonds that were synthetically fixed under an interest rate exchange agreement. Debt service requirements for variable rate bonds for which there are no related interest rate exchange agreements were calculated at rates ranging from 3.50 percent to 5.38 percent.

(2) Estimated debt service numbers are based on available information as of March 31, 2009. Since 2006 certain monies expected to flow to the State under the Master Settlement Agreement have been withheld and placed in an escrow account. Pending the outcome of a resolution between participating manufactures and the states, the debt service numbers will be adjusted accordingly.

Debt Reduction Reserve Fund

The Debt Reduction Reserve Fund (DRRF) was created in 1998 to set aside resources that could be used to reduce State-supported indebtedness either through the use of DRRF as a pay-as-you-go financing source, reduce debt service costs, or defease outstanding debt. Since 1999-2000, over $1.3 billion has been deposited to the DRRF and used to (i) pay cash for projects that would have otherwise been bond financed, (ii) defease existing high cost debt or (iii) provide resources to redeem existing high-cost State-supported debt. The State spent $49 million of DRRF in 2008-09 to defease high-cost debt.

The 2009-10 Enacted Budget authorizes up to $250 million for the DRRF to deal with uncertain market conditions. This appropriation will only be funded if resources become available, and would give the State the flexibility to react to market conditions and apply additional resources to mitigate risks in the State’s debt portfolio. This appropriation could be used to fund swap termination costs, capital projects, cost of issuance, or to defease high cost debt.

Limitations on State-Supported Debt

Debt Reform Act of 2000

Chapter 59 of the Laws of 2000 enacted the Debt Reform Act, which is intended to improve the State's borrowing practices and applies to all new State-supported debt issued on and after April 1, 2000. The Debt Reform Act imposes phased-in caps on new debt outstanding and new debt service costs, limits the use of debt to capital works and purposes only, and establishes a maximum term of 30 years on such debt.

The cap on new State-supported debt outstanding began at 0.75 percent of personal income in 2000-01 and will gradually increase until it is fully phased-in at 4 percent of personal income in 2010-11. Similarly, the cap on new State-supported debt service costs began at 0.75 percent of total governmental funds receipts in 2000-01 and will gradually increase until it is fully phased in at 5 percent in 2013-14.

The Debt Reform Act requires that the limitations on the issuance of State-supported debt and debt service costs be calculated by October 31 of each year and reported in the quarterly Financial Plan Update most proximate to such date. If the calculations for new State-supported debt outstanding and debt service costs are less than the State-supported debt outstanding and debt service costs permitted under the Debt Reform Act, new State-supported debt may continue to be issued. However, if either of the caps on the debt outstanding or debt service, is met or exceeded, the State would be precluded from contracting new State-supported debt until the next annual cap calculation is made and State-supported debt is found to be within the appropriate limitations. The prohibition on issuing new State-supported debt if the caps are met or exceeded provides a significant incentive to treat the debt caps as absolute limits that should not be reached, and therefore DOB intends to manage subsequent capital plans and issuance schedules under these limits.

Pursuant to the provisions of the Debt Reform Act, the most recent annual calculation of the limitations imposed by the Debt Reform Act was reported in the Financial Plan Update most proximate to October 31, 2008. *On October 30, 2008, the State reported that it was in compliance with both debt caps, with debt issued after March 31, 2000 and outstanding at March 31, 2008 at 2.33 percent of personal income and debt service on such debt at 1.48 percent of total governmental receipts, compared to the caps of 3.32 percent for each.*

Current projections estimate that debt outstanding and debt service costs will continue to remain below the limits imposed by the Act throughout the next several years. However, the State has entered into a period of significantly declining debt capacity. Available cap room, in regards to debt outstanding, is expected to decline from 0.74 percent ($6.8 billion) in 2009-10 to only 0.08 percent ($763 million) in 2011-12, a decrease of 88 percent or $6 billion. In addition, debt outstanding is projected to exceed the cap by 0.03 percent ($314 million) in 2012-13 and by 0.04 percent ($384 million) in 2013-14. The State plans to take actions in future budget cycles before fiscal year 2012-13 in order to stay within the statutory debt limits.

Interest Rate Exchange Agreements and Net Variable Rate Obligations

Chapter 81 of the Laws of 2002 authorized issuers of State-supported debt to issue a limited amount of variable rate debt instruments and to enter into a limited amount of interest rate exchange agreements. The limit on debt instruments which result in a net variable rate exposure (i.e., both variable rate debt and interest rate exchange agreements) is no more than 20 percent of total outstanding State-supported debt. Interest rate exchange agreements are limited to a total notional amount of no more than 20 percent of total outstanding State-supported debt. *As of March 31, 2009, State-supported debt in the amount of $47.0 billion was outstanding, resulting in a variable rate exposure cap and an interest rate exchange agreement cap of about $9.4 billion each.* As discussed below, as of March 31, 2009, both the amount of outstanding variable rate debt instruments and interest rate exchange agreements are less than the authorized totals of 20 percent of total outstanding State-supported debt, and are projected to be below the caps for the entire forecast period through 2012-13 (see "Net Variable Rate Obligations", later in this section, for further discussion on the cap).

Interest Rate Exchange Agreements

As of March 31, 2009 five issuers, DASNY, UDC, HFA, LGAC and the Thruway Authority have entered into a notional amount of $3.99 billion of interest rate exchange agreements that are subject to the interest rate exchange agreement cap, or 8.5 percent of total debt outstanding.

The State is currently repositioning its swaps portfolio to mitigate the negative effects of the ongoing credit crisis in the global markets. From March 2008 through March 2009, the State terminated $2.0 billion notional amount of swaps. Of this amount, the bankruptcy of Lehman Brothers Holdings, Inc. resulted in the automatic termination of approximately $565 million notional amount of swaps. Given the current dislocations in the underlying variable rate markets and recent experience with the existing portfolio of swaps, the State has no plans to increase its swap exposure, and may take further actions to reduce swap exposures commensurate with variable rate restructuring efforts.

The interest rate exchange agreements outstanding at March 31, 2009 involve eight different counterparties. All of the interest rate exchange agreements were part of refunding transactions that resulted in fixed rates (i.e., synthetic fixed rate interest rate exchange agreements) that range between 2.86 percent and 3.66 percent – rates that were significantly lower than the fixed bond rates at the time the refunding bonds were issued. In these transactions, the State issued variable rate bonds and entered into swaps in which it receives a variable rate payment expected to approximate the costs of the variable rate bonds, and pays a fixed rate. As of March 31, 2009, the net mark-to-market value of all the outstanding swaps (the aggregate termination amount) was approximately $577 million – the total amount the State would pay to the counterparties for the collective authorized issuers should all the swaps be terminated. The mark-to-market value of the outstanding interest rate exchange agreements fluctuates with interest rates and other market conditions. Generally, if interest rates rise from levels that existed in March 2009, it is expected the State's termination amounts would decline. The State plans to continue to monitor and manage counterparty risk on a monthly basis.

As of March 31, 2009, the State has also entered into approximately $746 million in swaps to create synthetic variable rate exposure, including $128 million of synthetic variable rate obligations and $618 million of forward starting synthetic variable rate obligations. In these transactions, the State issued fixed rate bonds and entered into swaps in which it receives a fixed rate comparable to the rate it pays on the bonds, and pays the Bond Market Association (BMA) variable rate, resulting in the State paying net variable rates. The net variable rate costs the State incurred with the synthetic variable rate bonds are lower than the net costs of issuing traditional variable rate bonds because they do not require additional support costs (liquidity, insurance, broker-dealer fees, and remarketing fees). Thus, this approach can be a less costly way to achieve additional variable rate exposure. The synthetic variable rate debt also provides the benefit of reducing the State's counterparty exposure under the synthetic fixed rate bonds discussed above (as determined by an independent financial advisor) and, since entered into prior to April 1, 2009, are considered "excluded agreements" under the legislation, and not counted under the swaps cap. As of March 31, 2009, the net mark-to-market value of the State's synthetic variable rate swaps is $30 million -- the total amount the State would receive from the collective authorized issuers should all swaps be terminated. They do, however, count towards the variable rate debt instruments cap.

The interest rate exchange agreements authorized by the legislation are subject to various statutory restrictions, including minimum counterparty ratings that are in at least the two highest investment grade categories from a national rating agency, monthly reporting requirements, the adoption of guidelines by the governing boards of the Authorized Issuers, collateral requirements, an independent finding that swaps reflect a fair market value, and the use of standardized International Swaps and Derivatives Association (ISDA) documents. All of the payments made to counterparties on outstanding State-supported interest rate exchange agreements described above are subordinated to bondholder debt service payments, and the State expects that all such payments on any interest rate exchange agreements the Authorized Issuers may enter into in the future will be similarly subordinated to bondholder debt service payments.

Net Variable Rate Obligations

As of March 31, 2009 the State had about $1.8 billion of outstanding variable rate debt instruments that are subject to the net variable rate exposure cap or 3.8 percent of total debt outstanding. That amount includes $1.65 billion of unhedged variable rate obligations and $128 million of synthetic variable rate obligations described above (see "Interest Rate Exchange Agreements").

The State's current policy is to count 35 percent of the notional amount of outstanding 65 percent of LIBOR fixed rate swaps in its variable rate exposure. This policy reserve accounts for the potential that tax policy or market conditions could result in significant differences between payments owed on the underlying variable rate bonds and the amount received by the State under their 65 percent of LIBOR swaps, and that the factors affecting such payments can be consistent with variable rate exposure. Variable rate bonds that are related to swaps pursuant to which the State pays a fixed rate of interest are excluded from the calculation of variable rate debt instruments outstanding.

VARIABLE RATE OBLIGATIONS	**As of March 31, 2009 ($ millions)**
Variable Rate Exposure Cap	$ 9,396
Current Unhedged Variable Rate Obligations	$1,656
Synthetic Variable Rate Swaps	$128
Total Net Variable Rate Exposure	**$1,784**
Percent of Net Variable Rate Exposure to Debt Outstanding	**3.8%**
Policy Reserve for LIBOR Swaps	$ 1,397
Total Variable Rate Exposure (with Policy Reserve)	**$3,181**
Percent of Variable Rate Exposure to Debt Outstanding	**6.8 %**

In addition to the variable rate obligations described above, the State has $2.4 billion of fixed rate obligations that may convert to variable rate obligations in the future. This includes $1.75 billion in State-supported convertible rate bonds currently outstanding. These bonds bear a fixed rate until future mandatory tender dates in 2011, 2012 and 2013 at which time they can convert to either a fixed or variable rate. Similar to these convertible bonds, the $618 million in forward starting synthetic variable rate obligations described above (see "Interest Rate Exchange Agreements") result in the State paying a fixed rate through 2014, and a variable rate between 2014 and 2030. Legislation enacted in 2005 amended the State Finance Law to clarify that convertible bonds, synthetic variable obligations and similar obligations that were issued on or before July 1, 2005 and which result in the State paying a fixed rate in a fiscal year do not count under the variable rate cap until the fiscal year in which the State may pay a variable rate.

2009-10 State Borrowing Plan

The Enacted Plan reflects the expectation that State PIT Revenue Bonds will continue to be issued to finance certain new programs and programs previously authorized to be secured by service contract or lease-purchase payments. (See "State Personal Income Tax Revenue Bond Financing").

The State's 2009-10 borrowing plan projects new issuance of $599 million in general obligation bonds; $577 million in Dedicated Highway and Bridge Trust Fund Bonds issued by the Thruway Authority to finance capital projects for transportation; $520 million in Mental Health Facilities Improvement Revenue Bonds issued by DASNY to finance capital projects at mental health facilities; $100 million in SUNY Dormitory Facilities Revenue Bonds to finance capital projects related to student dormitories; and $4.1 billion in State PIT Revenue Bonds to finance various capital programs, as described below.

State PIT Revenue Bond borrowings include issuances by: (i) DASNY for school construction (EXCEL), SUNY higher education facilities and community colleges, CUNY senior and community colleges, Higher Education Capital Matching Grants for private colleges, health care grants under the Health Care Efficiency and Affordability Law for New Yorkers (Heal NY) Capital Grant Program, cultural education storage facilities, Judicial Training Academies, and library facilities; (ii) the Thruway Authority for CHIPs; (iii) UDC (doing business as the Empire State Development Corporation) for correctional and youth facilities, sports facilities, State facilities and equipment acquisitions, State Police and Division of Military and Naval Affairs facilities, Office for Technology facility, Office of General Services Capital and Agriculture and Markets; (iv) EFC for State Environmental Infrastructure Projects, including Water Pollution Control, Hazardous Waste Remediation, and West Valley; and (v) HFA for housing programs.

In addition, PIT bonds can be issued by more than one authority for certain State programs, to include: the Community Enhancement Facilities Assistance Program (CEFAP) for economic development purposes which may be issued by DASNY, UDC and HFA; the Strategic Investment Program (SIP) for environmental, historic preservation, economic development, arts, and cultural purposes, which may be issued by DASNY, UDC and EFC; and Regional Economic Development Program, Higher Technology and Development Program, Economic Development Initiatives, and the Regional Economic Growth Program which includes EOF, Gen*NY*sis, CCAP, RESTORE, Multi-Modal Transportation Program and the Center of Excellence Program, which may be issued by DASNY and UDC; and Buffalo Inner Harbor, Roosevelt Island Operating Corporation, International Computer Chip Research and Development Center, and 2008 & 2009 Economic Development Initiatives, which may be issued by DASNY and UDC. For detailed information on the State's projected bond issuances, please refer to the State's 2009-10 Enacted Budget Capital Program and Financing Plan, which can be obtained by contacting the Division of the Budget, State Capitol, Albany, NY 12224, (518) 474-8282, or at www.budget.state.ny.us.

The projections of State borrowings for the 2009-10 fiscal year are subject to change as market conditions, interest rates and other factors vary throughout the fiscal year.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

State Organization

State Government

The State has a centralized administrative system with most executive powers vested in the Governor. The State has four officials elected in statewide elections, the Governor, Lieutenant Governor, Comptroller and Attorney General. These officials serve four-year terms that next expire on December 31, 2010.

Name	Office	Party Affiliation	First Elected
David A. Paterson*	Governor	Democrat	N/A
Vacant	Lieutenant Governor	N/A	N/A
Thomas P. DiNapoli**	Comptroller	Democrat	2007
Andrew M. Cuomo	Attorney General	Democrat	2006

*Sworn in as Governor on March 17, 2008 following resignation of Governor Spitzer.
**Elected by the State Legislature.

The Governor is elected on a single ticket with the Lieutenant Governor; the Comptroller and Attorney General are elected on separate tickets. The Governor appoints the heads of most State departments, including the Director of the Budget (the current Director is Laura L. Anglin). DOB is responsible for preparing the Governor's Executive Budget, negotiating that budget with the State Legislature, and implementing the budget once it is adopted, which includes updating the State's fiscal projections quarterly. DOB is also responsible for coordinating the State's capital program and debt financing activities. The Comptroller is responsible for auditing the disbursements, receipts and accounts of the State, as well as for auditing State departments, agencies, public authorities and municipalities. The Comptroller is also charged with managing the State's general obligation debt and most of its investments (see "Fiscal Controls" and "Investment of State Moneys" below). The Attorney General is the legal advisor to State departments, represents the State and certain public authorities in legal proceedings and opines upon the validity of all State general obligations.

The State Legislature is composed of a 62-member Senate and a 150-member Assembly, all elected from geographical districts for two-year terms, expiring December 31, 2010. Both the Senate and the Assembly operate on a committee system. The Legislature meets annually, generally for about six months, and remains formally in session the entire year. In recent years there have been special sessions, as well. The current majority leaders of the Legislature are Malcolm Smith (Democrat), Temporary President of the Senate, and Sheldon Silver (Democrat), Speaker of the Assembly. The minority leaders are Dean Skelos (Republican) in the Senate and Brian Kolb (Republican) in the Assembly.

State Financial Procedures

The State Budget Process

The requirements of the State budget process are set forth in Article VII of the State Constitution and the State Finance Law. The process begins with the Governor's submission of the Executive Budget to the Legislature each January, in preparation for the start of the fiscal year on April 1. (The submission date is February 1 in years following a gubernatorial election.) The Executive Budget must contain a complete plan of estimated available receipts and projected disbursements for the ensuing fiscal year ("State Financial Plan"). The proposed State Financial Plan must be balanced on a cash basis and must be accompanied by bills that: (i) set forth all proposed appropriations and reappropriations, (ii) provide for any new or modified revenue measures, and (iii) make any other changes to existing law necessary to implement the budget recommended by the Governor.

In acting on the bills submitted by the Governor, the Legislature has certain powers to alter the recommended appropriations and proposed changes to existing law. The Legislature may strike out or reduce an item of appropriation recommended by the Governor. The Legislature may add items of appropriation, provided such additions are stated separately. These additional items are then subject to line-item veto by the Governor. If the Governor vetoes an appropriation or a bill (or a portion thereof) related to the budget, these items can be reconsidered in accordance with the rules of each house of the Legislature. If approved by two-thirds of the members of each house, such items will become law notwithstanding the Governor's veto.

Once the appropriation bills and other bills become law, DOB revises the State Financial Plan to reflect the Legislature's actions, and begins the process of implementing the budget. Throughout the fiscal year, DOB monitors actual receipts and disbursements, and may adjust the estimates in the State Financial Plan. Adjustments may also be made to the State Financial Plan to reflect changes in the economy, as well as new actions taken by the Governor or the Legislature. As required by the State Finance Law, the Governor updates the State Financial Plan within 30 days of the close of each quarter of the fiscal year, generally issuing reports by July 30, October 30, and in January as part of the Executive Budget. The Governor is required to submit these updates to the Legislature and explain any changes from the previous State Financial Plan.

Subject to approval by the Governor, the Legislature may enact additional appropriation bills or revenue measures (including tax reductions) during any regular session or, if called into session for that purpose, any special session. In the event additional appropriation bills or revenue measures are disapproved by the Governor, the Legislature has authority to override the Governor's veto upon the vote of two-thirds of the members of each house of the Legislature. The Governor may present deficiency appropriations to the Legislature near the end of any fiscal year to supplement inadequate appropriations or to provide new appropriations for purposes not covered by the regular and supplemental appropriations.

Recent budget process reforms passed by the Legislature accelerate consensus revenue forecasting, direct the State Comptroller to issue binding revenue forecasts when the Executive and the Legislature cannot agree, require the use of budget conference committees, and require the adoption of a balanced budget by the Legislature.

Fiscal Controls

The State Constitution requires the Comptroller to audit the accrual and collection of State receipts. In addition, the Comptroller is required to audit all official State accounts and all claims against the State before payment. No such payment may be made unless the Comptroller has approved it.

Disbursements from State funds are limited to the level of authorized appropriations. Disbursements from Federal funds must be appropriated in accordance with appropriate legal authority, are limited to the amounts anticipated from Federal programs and may not be made in the absence of appropriate certifications from the Director of the Budget. Contracts for disbursements in excess of $50,000 require the Comptroller's approval (except for OGS expenditure contracts, for which the threshold for Comptroller's approval is $85,000, and for small business and MWBE contracts, for which the threshold is $100,000) and depend in most cases upon the existence of an appropriation and the issuance of a certificate of availability by the Director of the Budget. The Budget Director must review all applications for State participation in continuing grant- or contract-supported programs, with specified exceptions. Certain legislative leaders have the opportunity to make recommendations on the applications.

No appropriation may be increased or decreased by transfer or otherwise, except by (i) the interchange within a fund, among items of a particular program or purpose, of moneys appropriated for such program or purpose in such fund, with limited exceptions, or (ii) the enactment of certain emergency appropriations. Moneys or other financial resources from one fund may also be loaned to another fund, but only if such loan is repaid in full prior to the end of the month in which the loan was made, except as provided by law.

In addition, the Governor has traditionally exercised substantial authority in administering the State Financial Plan by limiting disbursements after the Legislature has enacted appropriation bills and revenue measures. The Governor may, primarily through DOB, limit spending by State departments, or delay construction projects to control disbursements. An important limitation of the Governor's ability to restrict disbursements is that local assistance payments, which typically make up close to 70 percent of General Fund disbursements (including operating transfers to other funds), are generally mandated by statute. The State Court of Appeals has held that, even in an effort to maintain a balanced Financial Plan, neither the Governor nor the Director of the Budget has the authority to refuse to make a local assistance disbursement mandated by law.

In May 2000, the State enacted several statutory provisions designed to restrict the amount of new debt that can be issued in the future. These debt reform provisions are discussed in the section entitled "Debt and Other Financing Activities" in this AIS.

Investment of State Moneys

The Comptroller is responsible for the investment of substantially all State moneys. By law, such moneys may be invested only in obligations issued or guaranteed by the Federal government or the State, obligations of certain Federal agencies that are not guaranteed by the Federal government, certain general obligations of other states, direct obligations of the State's municipalities and obligations of certain public authorities, certain short-term corporate obligations, certain bankers' acceptances, and certificates of deposit secured by legally qualified governmental securities. All securities in which the State invests moneys held by funds administered within the State Treasury must mature within twelve years of the date they are purchased. Money impounded by the Comptroller for payment of TRANs may only be invested, subject to the provisions of the State Finance Law, in (i) obligations of the Federal government, (ii) certificates of deposit secured by such obligations, or (iii) obligations of or obligations guaranteed by agencies of the Federal government as to which the payment of principal and interest is guaranteed by the Federal government.

The Comptroller invests General Fund moneys, bond proceeds, and other funds not immediately required to make payments through STIP, which is comprised of joint custody funds (Governmental Funds, Internal Service Funds, Enterprise Funds and Private Purpose Trust Funds), as well as several sole custody funds including the Tobacco Settlement Fund. The interest earnings accrued are allocated and deposited to the credit of those funds with positive balances that contribute to the overall invested STIP pool.

The Comptroller is authorized to make temporary loans from STIP to cover temporary cash shortfalls in certain funds and accounts resulting from the timing of receipts and disbursements. The Legislature authorizes the funds and accounts that may receive loans each year, based on legislation submitted with the Executive Budget. Loans may be granted only for amounts that the Director of the Budget certifies are "receivable on account" or can be repaid from the current operating receipts of the fund (i.e., loans cannot be granted in expectation of future revenue enhancements).

The State Comptroller repays loans from the first cash receipts into the borrowing fund or account. Fund balances outside the General Fund are presented on a net basis, i.e., they are reduced by the amount of outstanding temporary loans from STIP. The primary sources of this outstanding loan balance include timing-related delays in the receipt from Federal Funds and the sale of bonds used to finance capital projects, a delinquent SUNY hospital loan, and unreimbursed costs related to the Office for Technology Internal Service funds. The total outstanding loan balance at March 31, 2009 was $1.551 billion, a decrease of $310 million from the outstanding loan balance of $1.861 billion at March 31, 2008.

Accounting, Financial Reporting and Budgeting

Historically, the State has accounted for, reported and budgeted its operations on a cash basis. Under this form of accounting, receipts are recorded only at the time money or checks are deposited in the State Treasury, and disbursements are recorded only at the time a check is drawn. As a result, actions and circumstances, including discretionary decisions by certain governmental officials, can affect the timing of payments and deposits and therefore can significantly affect the cash amounts reported in a fiscal year. Under cash-basis accounting, all estimates and projections of State receipts and disbursements relating to a particular fiscal year are of amounts to be deposited in or disbursed from the State Treasury during that fiscal year, regardless of the fiscal period to which particular receipts or disbursements may otherwise be attributable.

The State also has an accounting and financial reporting system based on GAAP and currently formulates a GAAP financial plan. GAAP for governmental entities requires use of the accrual basis of accounting for the government-wide financial statements which includes governmental and business-type activities and component units. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Governmental fund financial statements are prepared using the modified accrual basis of accounting. Under modified accrual procedures, revenues are recorded when they become both measurable and available within 12 months of the end of the current fiscal period to finance expenditures; expenditures are recorded in the accounting period the liability is incurred to the extent it is expected to be paid within the next 12 months with the exception of expenditures such as debt service, compensated absences, and claims and judgments.

Expenditure-driven grants are recognized as revenue when the qualifying expenditures have been incurred and all other grant requirements have been met. Nonexchange grants and subsidies such as local assistance grants and public benefit corporation subsidies are recognized as expenditures when all requirements of the grant and or subsidy have been satisfied.

State Government Employment

As of March 31, 2009, the State had approximately 199,916 full-time equivalent annual salaried employees funded from all funds including some part-time and temporary employees but excluding seasonal, legislative and judicial employees. The workforce is now 13 percent smaller than it was eighteen years ago, when it peaked at 230,600 positions. The State expects to end the 2009-10 fiscal year with a total 190,335 filled positions, after implementation of the WRP described in "Special Considerations".

The State Public Employment Relations Board defines negotiating units for State employees. The Governor's Office of Employee Relations conducts collective bargaining negotiations with the State's unions, with the exception of employees of the Judiciary, public authorities and the Legislature. Such negotiations include terms and conditions of employment, except pension benefits. The State has contracts with four labor unions, the Civil Service Employees Association (CSEA), United University Professions (UUP), PEF, and District Council 37. Under terms of the four-year contracts, which run from April 2, 2007 through April 1, 2011 (July 2, 2007 through July 1, 2011 for UUP), employees received pay increases of 3 percent annually in 2007-08, 2008-09, and 2009-10, and will receive 4 percent in 2010-11. The unions representing corrections officers, graduate students, and supervisory security/park police have not reached settlements with the State at this time.

While approximately 93 percent of the State workforce is unionized, the remainder of the workforce (about 12,750) is designated as "managerial" or "confidential" and is excluded from collective bargaining. In practice, however, the results of collective bargaining negotiations are usually applied to all State employees within the Executive Branch. Under the State's Taylor Law, the general statute governing public employee-employer relations in the State, employees are prohibited from striking. A strike against the State last occurred in 1979 by employees of the Department of Correctional Services.

State Retirement Systems

General

The New York State and Local Retirement Systems (the "Systems") provide coverage for public employees of the State and its localities (except employees of New York City and teachers, who are covered by separate plans). The Systems comprise the New York State and Local Employees' Retirement System and the New York State and Local Police and Fire Retirement System. The Comptroller is the administrative head of the Systems. State employees made up about 33 percent of the membership during the 2007-08 fiscal year. There were 3,020 other public employers participating in the Systems, including all cities and counties (except New York City), most towns, villages and school districts (with respect to non-teaching employees) and a large number of local authorities of the State.

As of March 31, 2008, 677,321 persons were members and 358,109 pensioners or beneficiaries were receiving benefits. The State Constitution considers membership in any State pension or retirement system to be a contractual relationship, the benefits of which shall not be diminished or impaired.

Members cannot be required to begin making contributions or make increased contributions beyond what was required when membership began.

Recent market volatility and the recent decline in the market value of many equity investments have negatively impacted the assets held for the Systems. These or future downturns in financial markets will not affect the State's contributions to the Systems for fiscal year 2009 (which was based on the value of the assets as of April 1, 2007 and has already been paid) or the estimated contribution to the Systems for fiscal year 2010 (which is based on the value of the pension fund and its liabilities as of April 1, 2008). However, such downturns will result in an increase in the amount of the contributions required to be made for fiscal years after fiscal year 2010. The amount of such increases would depend, in part, on the value of the pension fund as of each April 1 as well as on the present value of the anticipated benefits to be paid by the pension fund as of each April 1. For fiscal year 2011, OSC anticipates a significant increase in contributions as compared to fiscal year 2010.

Contributions

Funding is provided in large part by employer and employee contributions. Employers contribute on the basis of the plan or plans they provide for members. Members joining since mid-1976, other than police and fire members, are required to contribute 3 percent of their salaries for their first 10 years of membership.

Legislation enacted in May 2003 realigned the Retirement Systems billing cycle to match governments' budget cycles and also instituted a minimum annual payment. The employer contribution for a given fiscal year will be based on the value of the pension fund and its liabilities on the prior April 1. In addition, employers are required to make a minimum contribution of at least 4.5 percent of payroll every year.

The State paid, in full, its employer contributions for the fiscal year ending March 31, 2009. Payments totaled $1.06 billion. This amount included the Judiciary bill and the amortization payments for the 2005 and 2006 bills.

The State bill for the fiscal year ending March 31, 2010 is estimated to be $959.1 million, assuming a payment on September 1, 2009.

Assets and Liabilities

Assets are held exclusively for the benefit of members, pensioners and beneficiaries. Investments for the Systems are made by the Comptroller as trustee of the Common Retirement Fund, a pooled investment vehicle. OSC reports that the net assets available for benefits as of March 31, 2008 were $155.8 billion (including $2.9 billion in receivables), a decrease of $0.8 billion or 0.5 percent from the 2006-07 level of $156.6 billion, reflecting, in large part, equity market performance[6]. OSC reports that the present value of anticipated benefits for current members, retirees, and beneficiaries increased from $163.1 billion on April 1, 2007 to $170.5 billion (including $66.1 billion for current retirees and beneficiaries) on April 1, 2008. The funding method used by the Systems anticipates that the net assets, plus future actuarially determined contributions, will be sufficient to pay for the anticipated benefits of current members, retirees and beneficiaries. Actuarially determined contributions are calculated using

[6] Audited values for the assets and liabilities of the Systems are not yet available for March 31, 2009. However, OSC has indicated that, as of December 31, 2008, the unaudited value of the Systems' assets had declined approximately 21 percent from their March 31, 2008 value. Initial indications based on unaudited numbers are that, as of March 31, 2009, the value of assets had decreased further.

actuarial assets and the present value of anticipated benefits. Actuarial assets differed from net assets on April 1, 2008 in that amortized cost was used instead of market value for bonds and mortgages and the non-fixed investments utilized a smoothing method which recognized 20 percent of unexpected gain for the 2008 fiscal year, 40 percent of the unexpected gain for the 2007 fiscal year, 60 percent of the unexpected gain for the 2006 fiscal year and 80 percent of the unexpected gain for the 2005 fiscal year. Actuarial assets increased from $142.6 billion on April 1, 2007 to $151.8 billion on April 1, 2008. The funded ratio, as of April 1, 2008, using the entry age normal funding method, was 107 percent. The tables that follow show net assets, benefits paid and the actuarially determined contributions that have been made over the last ten years. See also "Contributions" above.

Net Assets Available for Benefits of the New York State and Local Retirement Systems (1) (millions of dollars)

Fiscal Year Ended March 31	Total Assets(2)	Percent Increase/ (Decrease) From Prior Year
1999	112,723	6.0
2000	128,889	14.3
2001	114,044	(11.5)
2002	112,725	(1.2)
2003	97,373	(13.6)
2004	120,799	24.1
2005	128,038	6.0
2006	142,620	11.4
2007	156,625	9.8
2008	155,846	(0.5)

Authorities and Localities

Public Authorities

For the purposes of this disclosure, public authorities refer to certain of the State's public benefit corporations, created pursuant to State law. Public authorities are not subject to the constitutional restrictions on the incurrence of debt that apply to the State itself and may issue bonds and notes within the amounts and restrictions set forth in legislative authorization. The State's access to the public credit markets could be impaired and the market price of its outstanding debt may be materially and adversely affected if certain of its public authorities were to default on their respective obligations, particularly those using the financing techniques referred to as State-supported or State-related debt under the section entitled "Debt and Other Financing Activities" in this statement. As of December 31, 2008, each of the 19 public authorities below had outstanding debt of $100 million or more, and the aggregate outstanding debt, including refunding bonds, of these public authorities was approximately $140 billion, only a portion of which constitutes State-supported or State-related debt. The table below summarizes the outstanding debt of these public authorities.

Outstanding Debt of Certain Public Authorities (1) (2) (3)
As of December 31, 2008
(millions of dollars)

Source: Office of the State Comptroller. Debt Classifications are estimated by Budget Division.

(1) Includes only certain of the public authorities which have more than $100 million in outstanding debt.

(2) Reflects original par amounts for bonds and financing arrangements or original gross proceeds in the case of capital appreciation bonds. Amounts outstanding do not reflect accretion of capital appreciation bonds or premiums received.

(3) Includes short-term and long-term debt.

(4) Reflects debt for which the primary repayment source is from State appropriations or assigned revenues of the State.

(5) Includes debt previously issued by New York State Medical Care Facilities Finance Agency, which was consolidated with the Dormitory Authority on September 1, 1995.

(6) Includes $155 million in bonds issued by the New York State Energy Research and Development Authority and included in amounts reported for both NYSERDA and LIPA.

The State has numerous public authorities with various responsibilities, including those which finance, construct and/or operate revenue-producing public facilities. Public authorities generally pay their operating expenses and debt service costs from revenues generated by the projects they finance or operate, such as tolls charged for the use of highways, bridges or tunnels, charges for public power, electric and gas utility services, rentals charged for housing units, and charges for occupancy at medical care facilities. In addition, State legislation authorizes several financing techniques for public authorities that are described under the section entitled "Debt and Other Financing Activities" above.

Also, there are statutory arrangements providing for State local assistance payments otherwise payable to localities to be made under certain circumstances to public authorities. Although the State has no obligation to provide additional assistance to localities whose local assistance payments have been paid to public authorities under these arrangements, the affected localities may seek additional State assistance if local assistance payments are diverted. Some authorities also receive moneys from State appropriations to pay for the operating costs of certain of their programs.

The City of New York

The fiscal demands on the State may be affected by the fiscal condition of the City, which relies in part on State aid to balance its budget and meet its cash requirements. It is also possible that the State's finances may be affected by the ability of the City, and certain entities issuing debt for the benefit of the City, to market securities successfully in the public credit markets. The official financial disclosure of The City of New York and the financing entities issuing debt on its behalf is available by contacting Raymond J. Orlando, City Director of Investor Relations, (212) 788-5875 or contacting the City Office of Management and Budget, 75 Park Place, 6th Floor, New York, NY 10007. The State assumes no liability or responsibility for any financial information reported by The City of New York. The following table summarizes the debt of New York City.

Debt of New York City
as of June 30 of each year
(millions of dollars)

Year	General Obligation Bonds	Obligations of TFA (1)		Obligations of MAC	Obligations of STAR Corp. (2)	Obligations of TSASC, Inc.	HYIC (3)	Other(4) Obligations	Treasury Obligations	Total

Source: Office of the State Comptroller.

(1) Includes amounts for Building Aid Revenue Bonds (BARBS), the debt service on which will be funded solely from future State Building Aid payments that are subject to appropriation by the State and have been assigned by the City of New York to the TFA.

(2) A portion of the proceeds of the Sales Tax Asset Receivable Corporation (STARC) Bonds were used to retire outstanding Municipal Assistance Corporation bonds. The debt service on STARC bonds will be funded from annual revenues to be provided by the State, subject to annual appropriation. These revenues have been assigned to the Corporation by the Mayor of The City of New York.

(3) Includes a $100 million obligation to the MTA.

(4) Includes bonds issued by the Fiscal Year 2005 Securitization Corporation, the Industrial Development Agency and the Samurai Funding Corporation. Also included are bonds issued by the Dormitory Authority of the State of New York for education, health, and court capital projects and other long-term leases which will be repaid from revenues of the City or revenues that would otherwise be available to the City if not needed for debt service.

(5) Includes $515 million of bond anticipation notes issued to finance the City's capital expenditures.

(6) Includes $2.2 billion of bond anticipation notes used to finance the City's capital expenditures in the amount of $1.2 billion and Recovery notes for costs related to and arising from events on September 11, 2001 at the World Trade Center in the amount of $1 billion.

(7) Includes $1.11 billion of bond anticipation notes issued to finance the City's capital expenditures.

The staffs of the Financial Control Board for the City of New York (FCB), The Office of the State Deputy Comptroller (OSDC), the City Comptroller and the Independent Budget Office, issue periodic reports on the City's financial plans. Copies of the most recent reports are available by contacting: FCB, 123 William Street, 23rd Floor, New York, NY 10038, Attention: Executive Director; OSDC, 59 Maiden Lane, 29th Floor, New York, NY 10038, Attention: Deputy Comptroller; City Comptroller, Municipal Building, 6th Floor, One Centre Street, New York, NY 10007-2341, Attention: Deputy Comptroller for Budget; and IBO, 110 William Street, 14th Floor, New York, NY 10038, Attention: Director.

Other Localities

Certain localities outside New York City have experienced financial problems and have requested and received additional State assistance during the last several State fiscal years. While a relatively infrequent practice, deficit financing has become more common in recent years. Between 2004 and 2008, the State Legislature authorized 17 bond issuances to finance local government operating deficits. The potential impact on the State of any future requests by localities for additional oversight or financial assistance is not included in the projections of the State's receipts and disbursements for the State's 2009-10 fiscal year or thereafter.

To help resolve persistent fiscal difficulties in the City of Buffalo, the State enacted legislation in July 2003 that created the Buffalo Fiscal Stability Authority (BFSA). To address a deteriorating fiscal situation in Erie County, legislation was enacted in July 2005 that created the Erie County Fiscal Stability Authority (ECFSA). Under these statutes, the City and the County are required to take annual budgetary actions necessary to address increasing percentages of their projected budget gaps and the BFSA as well as the ECFSA are authorized to finance remaining budget gaps through the issuance of deficit bonds and through restructuring or refinancing of outstanding debt. Tax revenues generated by the City and the Buffalo City School District as well as State aid payments are pledged to support any bonds issued by the BFSA. Similarly, the County's sales tax revenues and certain statutorily defined State aid payments are pledged as revenue to support any bonds issued by ECFSA.

The BFSA has instituted a control period for Buffalo since 2003. In 2006, the ECFSA instituted a control period for the county after rejecting its fiscal 2007 budget and financial plan for fiscal years 2007 through 2010. The implementation of a control period grants BFSA and ECFSA significant authority over the financial operations of the county including: the power to approve or reject contracts, settlements, and borrowings in excess of $50,000; to determine expenditure limits for proposed county budgets; and to implement a wage or hiring freeze.

Like the State, local governments must respond to changing political, economic and financial influences over which they have little or no control. Such changes may adversely affect the financial condition of certain local governments. For example, the Federal government may reduce (or in some cases eliminate) Federal funding of some local programs or disallow certain claims which, in turn, may require local governments to fund these expenditures from their own resources. Similarly, State policymakers have expressed interest in implementing a property tax cap for local governments. Adoption of a property tax cap would affect the amount of property tax revenue available for local government purposes and could adversely affect their operations, particularly those that are heavily dependent on property tax revenue such as school districts. Ultimately, localities or any of their respective public authorities may suffer serious financial difficulties that could jeopardize local access to the public credit markets, which may adversely affect the marketability of notes and bonds issued by localities within the State. Localities may also face unanticipated problems resulting from certain pending litigation, judicial decisions and long-range economic trends. Other large-scale potential problems, such as declining urban populations, increasing expenditures, and the loss of skilled manufacturing jobs, may also adversely affect localities and necessitate State assistance.

The following table summarizes the debt of New York City and all localities in the State outside of New York City.

Locality Fiscal Year Ending	Combined New York City Debt (2)(3)		Other Localities Debt(4)		Total Locality Debt(4)	
	Bonds	Notes	Bonds(5)	Notes(5)	Bonds(4)(5)	Notes(5)
1980	12,995	---	6,835	1,793	19,830	1,793
1990	20,027	---	10,253	3,082	30,280	3,082
1995	29,930	---	15,829	3,219	45,759	3,219
1996	31,623	---	16,414	3,590	48,037	3,590

Source: Office of the State Comptroller.

NOTE: For localities other than New York City, the amounts shown for fiscal years ending in 1990 through 1997 may include debt that has been defeased through the issuance of refunding bonds.

(1) Because the State calculates locality debt differently for certain localities (including New York City), the figures above may vary from those reported by such localities. In addition, this table excludes indebtedness of certain local authorities and obligations issued in relation to State lease-purchase arrangements. New York City 2008 data may be found in the Debt of New York City table on page 125.

(2) New York City's debt outstanding has been revised as presented in the FY 2004 City Comptroller's Comprehensive Annual Financial Report.

(3) Includes New York City capital leases obligations which were not reflected in previous years. Includes bonds issued by the Dormitory Authority of the State of New York for education, health and courts capital projects, the Samurai Funding Corporation and other long-term financing leases which will be repaid from revenues of the City or revenues that would otherwise be available to the City if not needed for debt service.

(4) Outstanding bonded debt shown includes bonds issued by the localities and certain debt guaranteed by the localities and excludes capital lease obligations (for localities other than New York City), assets held in sinking funds and certain amounts available at the start of a fiscal year for redemption of debt. Starting in 2001, debt for other localities includes Installment Purchase Contracts.

(5) Does not include the indebtedness of certain localities that did not file annual financial reports with the Comptroller.

Litigation

General

The legal proceedings listed below involve State finances and programs and miscellaneous civil rights, real property, contract and other tort claims in which the State is a defendant and the potential monetary claims against the State are deemed to be material, generally in excess of $100 million. As explained below, these proceedings could adversely affect the State's finances in the 2009-10 fiscal year or thereafter. The State intends to describe newly initiated proceedings which the State deems to be material, as well as any material and adverse developments in the listed proceedings, in quarterly updates and/or supplements to this AIS.

For the purpose of this Litigation section of the AIS, the State defines "material and adverse developments" as rulings or decisions on or directly affecting the merits of a proceeding that have a significant adverse impact upon the State's ultimate legal position, and reversals of rulings or decisions on or directly affecting the merits of a proceeding in a significant manner, whether in favor of or adverse to the State's ultimate legal position. The State intends to discontinue disclosure with respect to any individual case after a final determination on the merits or upon a determination by the State that the case does not meet the materiality threshold described above.

As of the date of this AIS, except as described below, there is no current material litigation involving the State's constitutional or statutory authority to contract indebtedness, issue its obligations, or pay such indebtedness when due, or affects the State's power or ability, as a matter of law, to impose or collect significant amounts of taxes and revenues.

The State is party to other claims and litigation, which either its legal counsel has advised that it is not probable that the State will suffer adverse court decisions or the State has determined do not meet the materiality threshold described in the first paragraph of this section. Although the amounts of potential losses, if any, resulting from this litigation are not presently determinable, it is the State's opinion that its ultimate liability in any of these cases is not expected to have a material and adverse effect on the State's financial position in the 2009-10 fiscal year or thereafter. The Basic Financial Statements for fiscal year 2008-09, which OSC expects to issue in July 2009, will report possible and probable awarded and anticipated unfavorable judgments against the State.

Adverse developments in the proceedings described below, other proceedings for which there are unanticipated, unfavorable and material judgments, or the initiation of new proceedings could affect the ability of the State to maintain a balanced 2009-10 Financial Plan. The State believes that the 2009-10 Enacted Budget Financial Plan includes sufficient reserves to offset the costs associated with the payment of judgments that may be required during the 2009-10 fiscal year. These reserves include (but are not limited to) amounts appropriated for Court of Claims payments and projected fund balances in the General Fund. In addition, any amounts ultimately required to be paid by the State may be subject to settlement or may be paid over a multi-year period. There can be no assurance, however, that adverse decisions in legal proceedings against the State would not exceed the amount of all potential 2009-10 Enacted Budget Financial Plan resources available for the payment of judgments, and could therefore adversely affect the ability of the State to maintain a balanced 2009-10 Enacted Budget Financial Plan.

Real Property Claims

In *Oneida Indian Nation of New York v. State of New York*, 74-CV-187 (NDNY), the alleged successors-in-interest to the historic Oneida Indian Nation seek a declaration that they hold a current possessory interest in approximately 250,000 acres of lands that the tribe sold to the State in a series of transactions that took place beginning in 1795 and ending in 1846, and ejectment of the State and Madison and Oneida Counties from all publicly-held lands in the claim area. This case remained dormant while the Oneidas pursued an earlier action which sought limited relief relating to a single 1795 transaction and the parties engaged in intermittent, but unsuccessful, efforts to reach a settlement. In 1998, the United States filed a complaint in intervention in *Oneida Indian Nation of New York*. In December 1998, both the United States and the tribal plaintiffs moved for leave to amend their complaints to assert claims for 250,000 acres, including both monetary damages and ejectment, to add the State as a defendant, and to certify a class made up of all individuals who currently purport to hold title within the affected 250,000 acre area. On September 25, 2000, the District Court granted the motion to amend the complaint to the extent that it sought to add the State as a defendant and to assert money damages with respect to the 250,000 acres and denied the motion to certify a class of individual landowners and to seek the remedy of ejectment.

In a decision dated March 29, 2002, the District Court granted, in part, plaintiffs' motion to strike the State's defenses and counterclaims. The District Court also denied the State's motion to dismiss for failure to join indispensable parties.

Further efforts at settlement of this action failed to reach a successful outcome. While such discussions were underway, two significant decisions were rendered by the Supreme Court and the Second Circuit Court of Appeals which changed the legal landscape pertaining to ancient land claims: *City of Sherrill v. Oneida Indian Nation of New York,* 544 U.S. 197 (2005), and *Cayuga Indian Nation of New York v. Pataki*, 413 F.3d 266 (2d Cir. 2005), *cert. denied*, 126 S.Ct. 2021, 2022 (2006). Taken together, these cases have made clear that the equitable doctrines of laches, acquiescence, and impossibility can bar ancient land claims. These decisions prompted the District Court to reassess its 2002 decision, which in part had struck such defenses, and to permit the filing of a motion for summary judgment predicated on the *Sherrill* and *Cayuga* holdings. On August 11, 2006, the defendants moved for summary judgment dismissing the action, based on the defenses of laches, acquiescence, and impossibility. By order dated May 21, 2007, the District Court dismissed plaintiffs' claims to the extent that they asserted a possessory interest, but permitted plaintiffs to pursue a claim seeking the difference between the amount paid and the fair market value of the lands at the time of the transaction. The District Court certified the May 21, 2007 order for interlocutory appeal and, on July 13, 2007, the Second Circuit granted motions by both sides seeking leave to pursue interlocutory appeals of that order. The cross-appeals have been fully briefed, and oral argument before the Second Circuit was conducted on June 3, 2008. The case now awaits decision by the Second Circuit.

Other Indian land claims include *Canadian St. Regis Band of Mohawk Indians, et al., v. State of New York, et al.*, and *The Onondaga Nation v. The State of New York, et al.* both in the United States District Court for the Northern District of New York.

In the *Canadian St. Regis Band of Mohawk Indians* case, plaintiffs seek ejectment and monetary damages with respect to their claim that approximately 15,000 acres in Franklin and St. Lawrence Counties were illegally transferred from their predecessors-in-interest. By decision dated July 28, 2003, the District Court granted, in most respects, a motion by plaintiffs to strike defenses and dismiss counterclaims contained in defendants' answers. By decision dated October 20, 2003, the District Court denied the State's motion for reconsideration of that portion of the July 28, 2003 decision which struck a counterclaim against the United States for contribution. On February 10, 2006, after renewed efforts at settlement failed to resolve this action, and recognizing the potential significance of the *Sherrill* and *Cayuga* appeals, the District Court stayed all further proceedings in this case until 45 days after the United States Supreme Court issued a final decision in the *Cayuga Indian Nation of New York* Case. On November 6, 2006, after certiorari was denied in *Cayuga*, the defendants moved for judgment on the pleadings. Although the motion is fully briefed and awaiting decision, on April 16, 2008, the District Court issued an order staying the case until a decision is rendered with respect to the pending appeal in the *Oneida* case.

In *The Onondaga Nation v. The State of New York, et al.*, plaintiff seeks a judgment declaring that certain lands allegedly constituting the aboriginal territory of the Onondaga Nation within the State are the property of the Onondaga Nation and the Haudenosaunee, or "Six Nations Iroquois Confederacy," and that conveyances of portions of that land pursuant to treaties during the period 1788 to 1822 are null and void. The "aboriginal territory" described in the complaint consists of an area or strip of land running generally north and south from the St. Lawrence River in the north, along the east side of Lake Ontario, and south as far as the Pennsylvania border, varying in width from about 10 miles to more than 40 miles, including the area constituting the City of Syracuse. On August 15, 2006, based on *Sherrill* and *Cayuga*, the defendants moved for an order dismissing this action, based on laches. The motion is now fully briefed and awaiting decision.

Cayuga Indian Nation of New York, et al. v Pataki, et al., USDC, NDNY, 80-CV-930 (McCurn, DJ) (2d Cir. [02-6111]) involved approximately 64,000 acres in Seneca and Cayuga Counties surrounding the northern portion of Cayuga Lake that the historic Cayuga Nation sold to the State in 1795 and 1807 in alleged violation of the Nonintercourse Act ("NIA") (first enacted in 1790 and now codified at 25 U.S.C. § 177) because the transactions were not held under federal supervision, and were not formally ratified by the United States Senate and proclaimed by the President. After 2 lengthy trials, in 2001 the District Court denied ejectment as a remedy, and rendered a judgment against the State for damages and prejudgment interest in the net amount of $250 million. The State appealed. The tribal plaintiffs (but not the U.S.) cross-appealed, seeking ejectment of all of the present day occupants of the land in the 64,000 acre claim area and approximately $1.5 billion in additional prejudgment interest.

On June 28, 2005, the Second Circuit reversed and entered judgment dismissing the Cayuga action, based upon the intervening Supreme Court decision in *Oneida Indian Nation v. City of Sherrill*, 544 U.S. 197 (2005) which held (in the context of a property tax dispute involving a parcel that the tribe had purchased in fee within the Oneida claim area) that disruptive claims of Indian sovereignty could be barred by equitable defenses, including laches, acquiescence and impossibility. *Cayuga Indian Nation v. Pataki*, 413 F.3d 266 (2d Cir. 2005). The Second Circuit concluded that the same equitable considerations that the Supreme Court relied on in *City of Sherrill* applied to the Cayugas' possessory claim and required dismissal of the entire lawsuit, including plaintiffs' claim for money damages and their claim for ejectment. The Court also held that the United States' complaint-in-intervention was barred by laches. The Supreme Court denied certiorari in *Cayuga* on May 15, 2006. 126 S. Ct. 2021, 2022.

This case was closed but recently became active when the Cayuga plaintiffs filed a FRCP 60(b)(6) motion to have the judgment vacated. Along with this motion a letter was sent to Judge McCurn's chamber seeking a stay of the 60 (b)(6) motion until after the Second Circuit decides the appeal in the *Oneida* Land Claim case. The motion is premised on Judge Kahn's ruling in *Oneida*, discussed above, that in spite of the Second Circuit decision in *Cayuga*, the tribe may proceed to prove a non-possessory claim for unjust compensation against the State defendant. By stipulation of the parties, so-ordered by

Judge McCurn, further briefing on the Cayugas' motion for relief from judgment has been suspended, pending the outcome of the Oneida appeal that was argued on June 3, 2008.

Tobacco Master Settlement Agreement

In *Freedom Holdings Inc. et al. v. Spitzer et ano*., two cigarette importers brought an action in 2002 challenging portions of laws enacted by the State under the 1998 Tobacco Master Settlement Agreement (MSA) that New York and many other states entered into with the major tobacco manufacturers. The initial complaint alleged: (1) violations of the Commerce Clause of the United States Constitution; (2) the establishment of an "output cartel" in conflict with the Sherman Act; and (3) selective nonenforcement of the laws on Native American reservations in violation of the Equal Protection Clause of the United States Constitution. The United States District Court for the Southern District of New York granted defendants' motion to dismiss the complaint for failure to state a cause of action. Plaintiffs appealed from this dismissal. In an opinion dated January 6, 2004, the United States Court of Appeals for the Second Circuit (1) affirmed the dismissal of the Commerce Clause claim; (2) reversed the dismissal of the Sherman Act claim; and (3) remanded the selective enforcement claim to the District Court for further proceedings. Plaintiffs have filed an amended complaint that also challenges the MSA itself (as well as other related State statutes) primarily on preemption grounds. On September 14, 2004, the District Court denied all aspects of plaintiffs' motion for a preliminary injunction, except that portion of the motion relating to the ability of tobacco manufacturers to obtain the release of certain funds from escrow. Plaintiffs have appealed from the denial of the remainder of the motion to the United States Court of Appeals for the Second Circuit. In May 2005, the Second Circuit affirmed the denial of the preliminary injunction. In December 2006, the motions and cross-motions of the parties for summary judgment were fully submitted to the District Court. By order dated July 7, 2008, the District Court requested updated statistical information and other information needed to resolve certain material questions. Following an evidentiary hearing, by December 15, 2008 order summarizing a preliminary decision, the District Court dismissed all of plaintiff's claims. On January 12, 2009, the Court issued its opinion and order granting judgment dismissing the complaint. Plaintiff has appealed and the appeal is pending.

State Medicaid Program

There are numerous cases in which nursing homes have challenged the statutory provisions setting the reimbursement methodology pursuant to which they receive Medicaid payments, including *New York State Health Facilities Association, et al., v. DeBuono, et al., St. Luke's Nursing Center, et al. v. DeBuono, et al., New York Association of Homes and Services for the Aging v. DeBuono, et al. (six cases); and Matter of Nazareth Home of the Franciscan Sisters, et al. v. Novello*. Plaintiffs allege that the changes in methodologies have been adopted in violation of procedural and substantive requirements of State and Federal law.

In *New York Association of Homes and Services for the Aging v. DeBuono, et al*., the United States District Court for the Northern District of New York dismissed plaintiffs' complaint by order dated May 19, 2004. On April 6, 2006, the Second Circuit Court of Appeals affirmed the order of the District Court. This case is now concluded. Several related State Court cases involving the same parties and issues had been held in abeyance pending the result of the litigation in Federal Court.

West Valley Litigation

In *State of New York, et al. v. The United States of America, et al*., 06-CV-810 (WDNY), the State and the New York State Energy Research and Development Authority have filed suit seeking (1) a declaration that defendants are liable under CERCLA for the State's response costs and for damages to the State's natural resources resulting from releases from the site in Cattaraugus County, New York, and a judgment reimbursing the State for these costs and damages, (2) a declaration of defendants' responsibilities under the West Valley Demonstration Project Act to decontaminate and decommission the site and for future site monitoring and maintenance, and (3) a declaration that the defendants are responsible for paying the fees for disposal of solidified high level radioactive waste at the West Valley site. The parties have agreed to stay the litigation and submit the issues in (1) and (2) to non-binding arbitration and early neutral evaluation. The parties are currently engaged in mediation.

Representative Payees

In *Weaver v. State of New York,* filed in the New York State Court of Claims on July 17, 2008, the claimant alleges that executive directors of Office of Mental Health facilities, acting as representative payees under the Federal Social Security Act, have improperly received benefits due to patients and former patients and improperly applied those benefits to defray the cost of patient care and maintenance. The named claimant seeks benefits on her own behalf as well as certification of a class of claimants.

On September 26, 2008, the State moved to dismiss the claim on the grounds that (i) claimant failed to file a motion to certify the class in a timely manner and (ii) claimant's failure to identify the time and place in which each claim arose violates the provisions of Court of Claims Act §11(b). Claimant has opposed the motion and cross-moved, seeking certification of the class, pre-certification discovery, and partial summary judgment. The State submitted reply papers on April 1, 2009. The State has also opposed Claimant's cross-motions, and has submitted a motion for summary judgment. All papers on Claimant's cross-motions and on the State's summary judgment motion must be submitted by August 17, 2009.

Exhibit A to Annual Information Statement

Glossary of Financial Terms

The following glossary, which is an integral part of this AIS, includes certain terms that are used herein and are intended for use only in connection with the entire AIS.

Appropriation: An appropriation is a statutory authorization against which liabilities may be incurred during a specific year, and from which disbursements may be made, up to a stated amount, for the purposes designated. Appropriations generally are authorizations, rather than mandates, to spend, and disbursements from an appropriation need not, and generally do not, equal the amount of the appropriation. An appropriation represents maximum spending authority. Appropriations may be adopted at any time during the fiscal year.

Bond Anticipation Note or BANs: A bond anticipation note is a short-term obligation, the principal of which is paid from the proceeds of the bonds in anticipation of which such note is issued.

Business-type Activities: Business-type activities describes those operations that are financed in whole or in part by fees charged to external parties for goods or services. These activities are usually reported in enterprise funds and include the Lottery, Unemployment Insurance Benefit, SUNY and CUNY - senior colleges.

Capital Projects Funds: Capital Projects Funds, one of the four GAAP-defined governmental fund types, account for financial resources of the State to be used for the acquisition or construction of major capital facilities (other than those financed by SRFs, Proprietary Funds and Fiduciary Funds).

Cash Basis Accounting: Accounting, budgeting and reporting of financial activity on a cash basis results in the recording of receipts at the time money or checks are deposited in the State Treasury and the recording of disbursements at the time a check is drawn, regardless of the fiscal period to which the receipts or disbursements relate.

Community Projects Fund: The State created this fund within the General Fund in 1996 to finance certain community projects for the Legislature and the Governor. The State transfers moneys from other General Fund accounts into the Community Projects Fund, as provided by law. Spending out of the Community Projects Fund is governed by specific appropriations for each account in the Fund, but cannot exceed the cash balance for that account.

Contingency Reserve Fund or CRF: This fund was established in 1993 to assist the State in financing the costs of any extraordinary known or anticipated litigation. Deposits to this fund are made from the General Fund.

Contractual-Obligation Financing: Contractual-obligation financing is an arrangement pursuant to which the State makes periodic payments to a public benefit corporation under a contract having a term not less than the amortization period of debt obligations issued by the public benefit corporation in connection with such contract. Payments made by the State are used to pay debt service on such obligations and are subject to annual appropriation by the Legislature and the availability of moneys to the State for the purposes of making contractual payments.

Debt Reduction Reserve Fund or DRRF: The State created DRRF in 1998 to accumulate surplus revenues to pay debt service costs on State-supported bonds, retire or defease such bonds, and to finance capital projects. Use of DRRF funds requires an appropriation.

Debt Service: Debt service refers to the payment of principal and interest on bonds, and interest on bond anticipation notes and TRANs, in accordance with the respective terms thereof.

Debt Service Funds: DSFs, one of the four GAAP-defined governmental fund types, account for the accumulation of resources (including receipts from certain taxes, transfers from other funds and miscellaneous revenues, such as dormitory room rental fees, which are dedicated by statute for payment of lease-purchase rentals) for the payment of general long-term debt service and related costs and payments under lease-purchase and contractual-obligation financing arrangements.

Disbursement: A disbursement is a cash outlay and in the General Fund includes transfers to other funds.

Executive Budget: The Executive Budget is the Governor's constitutionally mandated annual submission to the Legislature which contains his recommended program for the forthcoming fiscal year. The Executive Budget is an overall plan of recommended appropriations. It projects disbursements and expenditures needed to carry out the Governor's recommended program and receipts and revenues expected to be available for such purpose. The recommendations contained in the Executive Budget serve as the basis for the State Financial Plan (defined below) which is adjusted after the Legislature acts on the Governor's submission. Under the State Constitution, the Governor is required each year to propose an Executive Budget that is balanced on a cash basis.

Expenditure: An expenditure, in GAAP terminology, is a decrease in net financial resources as measured under the modified accrual basis of accounting. In contexts other than GAAP, the State uses the term expenditure to refer to a cash outlay or disbursement.

Expenses: Expenses, in GAAP terminology, are a decrease in net financial resources as measured in the government-wide financial statements under the accrual basis of accounting.

Fiduciary Funds: Fiduciary Funds refers to a GAAP-defined fund type which accounts for assets held by the State in a trustee capacity or as agent for individuals, private organizations and other governmental units and/or other funds. These funds are custodial in nature and do not involve the measurement of operations. Although the Executive Budget for a fiscal year generally contains operating plans for Fiduciary Funds, and their results are included in the Comptroller's GAAP-based financial statements, they are not included in the State Financial Plan.

Financial Plan: see State Financial Plan.

Fiscal Year: The State's fiscal year commences on April 1 and ends on March 31. The term fiscal year refers to the fiscal year of the State unless the context clearly indicates otherwise.

Fund Accounting: The accounts of the State are presented on the basis of GAAP funds and account groups, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise the fund's assets, liabilities, fund equity, revenues, and expenditures, or expenses, as appropriate. Government resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled.

GAAP: GAAP refers to generally accepted accounting principles for state and local governments, which are the uniform minimum standards of and guidelines for financial accounting and reporting prescribed by GASB. GAAP requires that the government-wide financial statements are prepared using the economic resources measurement focus and the accrual basis of accounting, as are the Enterprise

Funds, Component Units and the Fiduciary Funds financial statements. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Governmental fund financial statements are prepared using the current financial resources measurement focus and the modified accrual basis of accounting. The modified accrual basis of accounting recognizes revenues when they become both measurable and available to finance expenditures. Expenditures and related liabilities are recognized in the accounting period they are incurred to the extent they are expected to be paid within the next 12 months, under the modified accrual basis of accounting.

General Fund: The General Fund, one of the four GAAP-defined governmental fund types, is the major operating fund of the State and receives all receipts that are not required by law to be deposited in another fund, including most State tax receipts and certain fees, transfers from other funds and miscellaneous receipts from other sources.

General obligation bonds: Long-term obligations of the State, used to finance capital projects. These obligations must be authorized by the voters in a general election, are issued by the Comptroller, and are backed by the full faith and credit of the State. Under current provisions of the Constitution, only one bond issue may be put before the voters at each general election, and it must be for a single work or purpose. Debt service must be paid from the first available taxes whether or not the Legislature has enacted the required appropriations for such payments.

General State Charges: Costs mandated by statute or court decree or by agreements negotiated with employee unions for which the State is liable, including: pensions; health, dental and optical benefits; payments on behalf of State employees for Social Security; unemployment insurance benefits; employee benefit programs; court judgments and settlements; assessments for local improvements; and taxes on public lands.

Governmental Activities: Governmental activities describes those operations that are generally financed through taxes, intergovernmental revenues, and other nonexchange revenues and are reported in the governmental funds.

Governmental Funds: Governmental funds refers to a category of GAAP-defined funds which account for most governmental functions and which, for the State, include four GAAP-defined governmental fund types: the General Fund, Special Revenue Funds, Debt Service Funds, and Capital Projects Funds. The State's projections of receipts and disbursements in the governmental funds comprise the State Financial Plan.

Interfund Transfers: Under GAAP fund accounting principles, each fund is treated as a separate fiscal and accounting unit with limitations on the kinds of disbursements to be made. To comply with these limitations, moneys are moved from one fund to another to make them available for use in the proper fund, and are accounted for as "interfund transfers."

Lease-Purchase Financing: Lease-purchase financing is an arrangement pursuant to which the State leases facilities from a public benefit corporation or municipality for a term not less than the amortization period of the debt obligations issued by the public benefit corporation or municipality to finance acquisition and construction, and pays rent which is used to pay debt service on the obligations. At the expiration of the lease, title to the facility vests in the State in most cases. Generally, the State's rental payments are expressly subject to annual appropriation by the Legislature and availability of moneys to the State for the purposes thereof.

Local Assistance: Disbursements of State grants to counties, cities, towns, villages, school districts and other local entities, certain contractual payments to localities, and financial assistance to, or on behalf of, individuals and not-for-profit organizations.

Moral obligation debt: Long-term bonds issued by certain State public benefit corporations which are essentially supported by their own revenues. Moral obligation debt is not incurred pursuant to a referendum, is not State-supported debt, and is not backed by the full faith and credit of the State. However, the authorities selling such obligations have been allowed to establish procedures where, under certain conditions, the State may be requested to meet deficiencies in debt service reserve funds supporting such bonds. An appropriation must be enacted by the Legislature to meet any such request.

Official Statement: A disclosure document prepared to accompany an issuance of bonds, notes and certificates of participation offered for sale by the State or its public authorities. Its primary purpose is to provide prospective bond or note purchasers sufficient information to make informed investment decisions. It describes, among other things, the issuer, the project or program being financed and the security behind the bond issue.

Pay-as-you-go financing: The use of current State resources (as opposed to bonds) to finance capital projects. Also referred to as "hard dollar" financing.

Rainy Day Reserve Fund: This fund was created in 2007 to enhance the State's fiscal reserves. The fund, which may have a maximum balance equal to 3 percent of General Fund spending, may be used to respond to an economic downturn or catastrophic event, as defined by the enabling statute.

Receipts: Receipts consist of cash actually received during the fiscal year and in the General Fund include transfers from other funds.

Revenue Accumulation Fund: This fund holds certain tax receipts temporarily before their deposit into other funds.

Revenues: Revenues, in GAAP terminology, are an increase in net financial resources, as measured for the government-wide financial statements under the accrual basis of accounting and for the governmental funds under the modified accrual basis of accounting. In contexts other than GAAP, the State uses the term revenues to refer to income or receipts.

Short-Term Investment Pool or STIP: The combination of available cash balances in funds within the State Treasury on a daily basis for investment purposes.

Special Revenue Funds: SRFs, one of the four GAAP-defined governmental fund types, account for the proceeds of specific revenue sources (other than expendable trusts or major capital projects), such as Federal grants, that are legally restricted to specified purposes.

State Financial Plan: The State Financial Plan sets forth projections of State receipts and disbursements in the governmental fund types for each fiscal year and is prepared by the Director of the Division of Budget, based initially upon the recommendations contained in the Executive Budget. After the budget is enacted, the State Financial Plan is adjusted to reflect revenue measures, appropriation bills and certain related bills enacted by the Legislature. It serves as the basis for the administration of the State's finances by the Director of the Budget, and is updated quarterly, or more frequently as necessary, during the fiscal year.

State Funds: State funds refers to a category of funds which includes the General Fund and all other State-controlled moneys, excluding Federal grants. This category captures all governmental disbursements except spending financed with Federal grants.

State-guaranteed debt: Debt authorized by the voters to be sold by three public authorities: the Job Development Authority, the New York State Thruway Authority, and the Port Authority of New York and New Jersey. State-guaranteed bonds issued for the Thruway Authority and the Port Authority were fully retired on July 1, 1995 and December 31, 1996, respectively. Such debt is backed by the full faith and credit of the State.

State Operations: Operating costs of State departments and agencies, the Legislature and the Judiciary, including salaries and other compensation for most State employees.

State-related debt: This broad category combines all forms of debt for which the State is liable, either directly or on a contingent basis, including all State-supported debt and State-guaranteed and moral obligation debt.

State-supported debt: This category includes all obligations for which the State appropriates money that is used to pay debt service, including general obligation debt, PIT revenue bonds, lease-purchase and contractual-obligation debt, and certificates of participation. While tax supported debt (obligations supported by State taxes) represents the majority of obligations in this category, obligations supported by other State revenues (such as dormitory fees or patient revenues) are also included.

Tax and Revenue Anticipation Notes or TRANs: Notes issued in anticipation of the receipt of taxes and revenues, direct or indirect, for the purposes and within the amounts of appropriations theretofore made.

Tax Refund Reserve Account: The tax refund reserve account is used to hold moneys available to pay tax refunds. During a given fiscal year, the deposit of moneys in the account reduces receipts and the withdrawal of moneys from the account increases receipts. There is no requirement that moneys withdrawn from this account be replaced.

Tax Stabilization Reserve Fund: This fund was created to hold surplus revenue that can be used in the event of any unanticipated General Fund deficit. Amounts within this fund can be borrowed to cover any year-end deficit and must be repaid within six years in no less than three equal annual installments. The fund balance cannot exceed two percent of General Fund disbursements for the fiscal year; contributions are limited to two-tenths of one percent of General Fund disbursements in that year.

Exhibit B to Annual Information Statement

Principal State Taxes and Fees

Personal income taxes are imposed on the New York source income of individuals, estates and trusts. Personal income taxes are projected to account for roughly 61 percent of estimated All Government Funds tax receipts during the State's 2009-10 fiscal year. The State tax adheres closely to the definitions of adjusted gross income and itemized deductions used for Federal personal income tax purposes, with certain modifications. Receipts from this tax are sensitive to changes in economic conditions in the State. New York allows a standard deduction of $15,000 for married couples filing jointly, with lower deductions for the other types of filers. New York also allows a $1,000 exemption for dependents. For tax years 2009 through 2011, the tax rate schedule has seven tax brackets which, for married couples filing jointly, start at 4 percent for taxable income below $16,000 and increase to 8.97 percent on taxable income over $500,000. There are comparable tax rate schedules for heads of households, single individuals, and married couples filing separately. After 2011, the rate schedule will revert to the pre-2009 schedule of five tax intervals, ranging from 4 percent to 6.85 percent on taxable income over $40,000 for married couples filing jointly. New York also allows several credits against the tax. The most significant are the: Empire State Child Credit (generally equal to one-third of the Federal child tax credit), household credit, credit for taxes paid to other states, the investment tax credit, various Empire Zone credits, child and dependent care credit, real property tax circuit breaker credit, earned income tax credit, long-term care insurance credit, and college tuition credit.

In 2001, legislation was enacted to provide for the issuance of State PIT Revenue Bonds, which has become the primary financing vehicle for a broad range of existing State-supported debt programs previously secured by service contract or lease-purchase payments. The first bonds were issued in May 2002. The legislation provided that 25 percent of PIT receipts (excluding refunds owed to taxpayers and deposits to the STAR Fund) be deposited to the RBTF for purposes of making debt service payments on the bonds, with excess amounts transferred to the General Fund. Legislation enacted with the 2007-08 budget provides that the RBTF will be calculated based on 25 percent of PIT receipts (excluding refunds owed to taxpayers, but before deposits to the STAR fund).

In the event that (i) the State Legislature fails to appropriate amounts required to make all debt service payments on the State PIT Revenue Bonds or (ii) having been appropriated and set aside pursuant to a certificate of the Director of the Budget, financing agreement payments have not been made when due on the bonds, the legislation requires that PIT receipts continue to be deposited to the RBTF until amounts on deposit in the Fund equal the greater of 25 percent of annual PIT receipts or $6 billion.

User taxes and fees consist of several taxes on consumption, the largest of which is the State sales and compensating use tax. The following discussion describes these taxes and summarizes significant revenue actions taken since 2000. The *sales and use tax* is imposed, in general, on the receipts from the sale of all tangible personal property unless exempted, and all services are exempt unless specifically enumerated. Certain charges for meals, admissions, hotel and motel occupancy and dues are also subject to the tax. The current State sales tax rate is 4.0 percent, of which 3.0 percent is deposited in the General Fund and 1.0 percent is deposited in the Local Government Assistance Tax Fund to meet debt service obligations. Receipts in excess of debt service requirements are transferred to the General Fund. Although there are numerous exemptions, the most significant are: food; clothing and footwear costing less than $110; drugs; medicine and medical supplies; residential energy; capital improvements and installation charges; machinery and equipment used in manufacturing; trade-in allowances; and goods sold to Federal, state or local governments. Legislation enacted in 2000 totally or partially exempted receipts from most purchases made by qualifying businesses located in Empire Zones. Legislation enacted in 2003 increased the sales tax rate from 4 percent to 4.25 percent beginning on June 1, 2003, and expiring on May 31, 2005. In addition, the legislation limited the exemption for clothing and footwear costing less than $110 to two one-week periods in the State's 2003-04 and 2004-05 fiscal years. In 2005, legislation was enacted to continue the two one-week exemptions for clothing and footwear costing less than $110 per item until March 31, 2007. Effective April 1, 2006, clothing and footwear costing less than $110 were fully exempted from the State sales tax. The 2006-07 Enacted budget increased the vendor credit. Effective June 1, 2006, the sales tax on motor fuel was capped at 8 cents per gallon. Legislation enacted in 2008 requires non-profit tax-exempt organizations to collect sales tax on additional retail sales and rentals or leases of tangible personal property, includes a vendor registration program (vendors must register and pay a $50 fee except for new registrations or small businesses) and creates an evidentiary presumption that certain sellers using New York residents to solicit sales in the State are vendors required to collect sales and use tax. Legislation enacted as part of the 2009-10 Financial Plan, expanded the definition of "affiliate nexus", imposed the sales tax on certain transportation services, narrowed the exemption for commercial aircraft, narrowed the use tax exemption for motor vehicles and vessels, increased the tax rate on passenger car rentals, and increased the pre-paid sales tax rate on cigarettes.

The State imposes a *tax on cigarettes* at the rate of $2.25 per package of 20 cigarettes and imposes a *tax on other tobacco products* equal to 46 percent of the wholesale price. The tax rate on cigarettes was raised from 39 cents to 56 cents, and the tax rate on tobacco products other than cigarettes was increased from 15 percent to 20 percent in 1993 and from 20 percent to 37 percent on July 3, 2002. The tax on cigarettes was raised from 56 cents to $1.11 per pack on March 1, 2000, to $1.50 per pack on April 3, 2002 and to $2.75 on June 3, 2008. The tobacco products tax was raised from 37 percent to 46 percent in April 2009. The revenue derived from the tax is split, with 29.37 percent of receipts deposited in the General Fund and the balance deposited in the Tobacco Control and Insurance Initiatives Pool established by HCRA of 2000. In 2008, certain tobacco products were converted from price-based taxes to weight-based taxes.

Motor fuel and *diesel motor fuel taxes* are levied at 8 cents per gallon upon the sale, generally for highway use, of gasoline and diesel fuel. The diesel fuel tax was reduced from 10 cents per gallon to 8 cents per gallon on January 1, 1996. The 2000-01 Enacted Budget contained legislation which provided that all motor fuel taxes be deposited in the dedicated transportation funds effective April 1, 2001. Legislation enacted in 2008 allows the Commissioner of Taxation and Finance to work and enter into an agreement with transportation-related agencies to use technology to reduce the bootlegging of fuel.

Motor vehicle fees are derived from a variety of sources, including motor vehicle registration fees and driver licensing fees, which together account for most motor vehicle fee revenue. Legislation enacted in 1997 provided for five-year licenses instead of four-year licenses, and for the retention of refunds. Legislation enacted in 1998 reduced motor vehicle registration fees by 25 percent and re-instituted the prior refund policy and increased the percent of such fees earmarked to the Dedicated Highway and Bridge Trust Fund to 28 percent on April 1, 1998, 34 percent on July 1, 1998, and to 45.5 percent on February 1, 1999. Legislation enacted with the 2000-01 Budget directs the remaining 54.5 percent of registration fees to the dedicated transportation funds pool, of which 63 percent goes to the Dedicated Highway and Bridge Trust Fund. Legislation enacted in 2001 directed the deposit of $169 million in non-registration fees to the Trust Fund in State fiscal year 2001-02. Legislation enacted in 2002 redirected $171.6 million in non-registration fees to the Trust Fund in State fiscal year 2002-03 and $152.7 million in State fiscal year 2003-04. Legislation enacted in 2003 directed $59.9 million in existing non-registration motor vehicle fee revenues, to the Trust Fund effective April 1, 2004. Legislation enacted in 2005 directed all remaining General Fund receipts be moved to the dedicated funds pool. Legislation enacted in 2008 implements the Western Hemisphere Travel Initiative (WHTI) by offering Federally-compliant drivers licenses and non-driver ID cards. Legislation enacted with the 2009-10

Financial Plan included increases of approximately 25 percent for vehicle registrations and drivers' licenses.

The State imposes *alcoholic beverage excise taxes* at various rates on liquor, beer, wine and specialty beverages. Legislation enacted in 1999 reduced the excise tax on beer from 13.5 cents per gallon to 12.5 cents per gallon, and expanded an exemption for small brewers. Legislation enacted with the 2000-01 Budget reduced the tax on a gallon of beer from 12.5 cents to 11 cents on September 1, 2003, and accelerated the current exemption for small brewers to January 1, 2000. In addition, separate *licensing fees* are imposed on those who sell alcoholic beverages in New York. The fees vary depending on the type and location of the establishment or premises operated by the licensee, as well as the class of beverage for which the license is issued. Legislation enacted in 2002, raised fees on the majority of licenses by 28 percent. Legislation was adopted in 2003, which allowed for the option to sell liquor or wine on Sundays provided the establishment closed on one other day. In 2004, legislation was enacted to allow seven day liquor sales. This law was made permanent in 2008. Legislation enacted in 2009 increased the tax rate on beer to 14 cents per gallon and increased the tax rate on wine to 30 cents per gallon.

The *highway use tax* revenue is derived from three sources: the truck mileage tax, related highway use permit fees and the fuel use tax. The truck mileage tax is levied on commercial vehicles, at rates graduated by vehicle weight, based on miles traveled on State highways. Highway use permits are issued triennially at $15 for an initial permit and $4 for a permit renewal. The fuel use tax is an equitable complement to the State's motor fuel tax and sales tax paid by those who purchase fuel outside but consumed in New York. It is levied on commercial vehicles having three or more axles or a gross vehicle weight of more than 26,000 pounds. Currently all collections from the highway use tax are deposited in the Dedicated Highway and Bridge Trust Fund. Legislation enacted with the 2000-01 Budget reduced the supplemental truck mileage tax from 50 percent of the base tax to 40 percent of the base tax and increased the flow of motor vehicle fee receipts to the Dedicated Highway and Bridge Trust Fund to compensate for the revenue loss. Legislation enacted in 2007 replaced the current highway use permit system with a registration system. Legislation enacted in 2009 reauthorized the Commissioner of the Tax Department to require highway use tax decals on the exterior of all vehicles, and increased the decal renewal fee from $4 to $15 per vehicle.

The State imposes an *auto rental tax* on charges for any rental of passenger cars rented or used in the State, subject to certain exceptions including leases covering a period of one year or more. Legislation enacted in 2002 provided that effective April 1, 2002, all auto rental tax receipts be deposited in the dedicated transportation funds. Legislation enacted in 2009 increased the tax rate from 5 percent to 6 percent.

Business taxes include a general business corporation franchise tax as well as specialized franchise taxes on banks, insurance companies, certain transportation and transmission companies, and a cents-per-gallon-based levy on businesses engaged in the sale or importation for sale of various petroleum products. The franchise tax on utilities was eliminated as of January 1, 2000. Utilities now are taxed under the general business tax.

The *corporation franchise tax* is the largest of the business taxes, and the State's third largest source of revenue. It is imposed on all domestic general business corporations and foreign general business corporations which do business or conduct certain other activities in the State. The tax is imposed, generally, at a rate of 7.1 percent of taxable income allocated to New York. Taxable income is defined as Federal taxable income with certain modifications.

Legislation enacted in 1998 reduced the general business tax rate from 9 percent to 7.5 percent in three steps beginning in 1999; reduced the corporate alternative minimum tax rate from 3.5 percent to 3 percent in two steps beginning in 1998; reduced the fixed-dollar minimum corporate tax for most small businesses from $325 to $100 beginning in 1998; reduced the tax rate applied to subchapter S-corporations by 40 percent or more beginning in 1998; and adopted an investment tax credit for investment in securities trading infrastructure and instituted tax benefits for investments and employment in emerging technology companies. Significant statutory changes enacted in 1999 included: reforms to the subsidiary capital tax; a further reduction on the alternative minimum tax rate from 3 percent to 2.5 percent; doubling the Empire Zone and zone equivalent area wage tax credits; and reforms to the apportionment of income for the airline industry. In 2000, legislation was enacted to: shift the taxation of public utilities from taxation under a gross earnings tax to taxation as general business corporations; reduce taxes for small businesses; change the allocation formula for financial services companies; add new credits for "green buildings," low-income housing, alternative fuel vehicles, and certain transportation projects; and eliminate energy taxes paid by industrial and manufacturing businesses. Empire Zones were created which provide various credits and exemptions to qualified companies meeting certain employment criteria. In 2002, legislation was enacted authorizing six new Empire Zones, and increasing the mandatory first installment of estimated business tax payments from 25 percent to 30 percent for businesses. In 2003, legislation was enacted that decoupled New York from the Federal bonus depreciation provisions. This applies to property placed in service on or after June 1, 2003, except for qualified Resurgence Zone and New York Liberty Zone property. The legislation also required the addback of certain expenses and payments related to intangible holding companies. In 2004, legislation was enacted that temporarily created two new fixed dollar minimum tax amounts under the corporate franchise tax; increased the Statewide annual aggregate limit for the low-income housing credit from $4 million to $6 million; extended the Qualified Emerging Technology Company (QETC) credit to biotechnology; and extended the Empire Zones program to March 31, 2005. Legislation enacted in 2005: extended the Empire Zones program until June 30, 2011 and expanded the program to include 12 new zones; adopted a single sales factor formula for corporate franchise taxpayers and banks that provide certain services; adopted tax shelter provisions; reduced the small business tax rate; increased the low income housing tax credit from $6 million to $8 million; expanded and extended the green buildings tax credit program; increased the capital base cap under the corporate franchise tax; and created new tax credits for emerging technology companies.

Legislation enacted in 2006 eliminated the S-corporation differential; extended and increased the Empire State Film Production Credit and authorized a new Empire State Commercial Production Credit and a new credit for the production of alternative bio-fuels; accelerated the authorization of six of the remaining nine Empire Zones initially authorized in 2005, and provided zone benefits to enterprises that make substantial investments in regionally significant projects; and increased the low income housing credit from $8 million to $12 million.

Legislation enacted in 2007 provided that taxpayers operating on a unitary basis file a combined report if substantial inter-corporate transactions occur amongst affiliates; lowered the rate on Entire Net Income (ENI) to 7.1 percent for general businesses and to 6.5 percent for manufacturers; lowered the alternative minimum tax rate to 1.5 percent; increased the low income housing credit from $12 million to $16 million; and closed the real estate investment trust loophole.

Legislation enacted in 2008 restructured minimum taxes on corporations and the capital base tax; extended the MTA surcharge for four additional years; decoupled New York State from the Federal Qualified Production Activity Income (QPAI) deduction provided under Internal Revenue Code section 199; changed the first installment of tax from 25 percent to 30 percent; extended and increased the Empire State film production credit; extended the investment tax credit for financial services for three additional years; increased the low-income housing credit allocation by $4 million; extended tax shelter reporting requirements for two years; and established a voluntary disclosure and compliance initiative program to encourage eligible taxpayers to enter into compliance agreements with the Department of Taxation and Finance.

Legislation enacted in 2009 made changes to the tax treatment of captive insurance companies by providing special rules for overcapitalized captive insurance companies. The legislation requires that an overcapitalized captive insurance company file a combined report with the corporation that directly owns or controls over 50 percent of the voting stock of the captive if that corporation is either an article 9 or an article 32 taxpayer. Additionally, for-profit HMOs are now taxed under the insurance tax. Previously they were taxed under the corporation franchise tax. The mandatory first installment that applies to large taxpayers was increased from 30 percent to 40 percent of the prior year's tax. The empire zones program was reformed requiring a performance review of all companies that have been certified in the program for at least three years. Companies not meeting a 1:1 benefit-cost ratio, or that reincorporated for the purpose of maximizing tax benefits will not be allowed to claim further benefits. An additional $350 million was allocated to the Empire State film production credit program for 2009. In addition, for tax years beginning on or after January 1, 2009 all film tax credit claims will be paid across several years based on the amount of the credit claimed. Two seldom used tax credits, the fuel cell generating equipment credit and the transportation improvement contribution credit were repealed effective with tax year 2009. The low income housing credit authorization was increased by an additional $4 million for a total of $24 million.

Receipts from the *corporation* and *utilities taxes* are primarily attributable to taxes imposed on transportation and transmission companies, utility services and telecommunication services.

Legislation enacted in 1996 provided that as of January 1, 1997 the franchise tax rate imposed on truckers and railroads was reduced from 0.75 percent to 0.6 percent of gross earnings. As of January 1, 1998 truckers and railroads were allowed to choose between taxation under this tax or taxation under the general business corporation tax.

Legislation enacted in 1997 reduced the 3.5 percent gross receipts tax imposed upon gas, electric, and telephone service to 3.25 percent on October 1, 1998, and then to 2.5 percent on January 1, 2000. Local telephone companies and other franchise taxpayers realized an additional rate cut of 0.375 percent in their franchise tax on July 1, 2000. Also, the franchise tax on trucking and railroads was reduced on July 1, 2000, from 0.6 percent to 0.375 percent. Additional 1997 legislation established the Power for Jobs program which made 400 megawatts of low-cost power available for job creation and expansion with the utilities recouping their losses through a tax credit. Legislation enacted in 1998 expanded the low-cost power available to 450 megawatts and accelerated the phase-in of the Power for Jobs program.

In 2000, legislation was enacted which altered the way traditional gas and electric utilities are taxed. The changes included: the shift from a franchise tax imposed on gross earnings to taxation based on net income or the alternative bases under Article 9-A of the Tax Law, phase out of the gas import tax, phase out of the gross receipts tax on gas and electricity for business consumers, and overall reductions in remaining gross receipts taxes. The legislation also provided for an expansion of the Power for Jobs program which allows credits against the gross receipts taxes paid by utilities furnishing low-cost power. In 2002, legislation was enacted increasing the mandatory first installment of estimated business tax payments from 25 percent to 30 percent. In 2003, legislation was enacted that dedicated the remaining 20 percent of section 183 and section 184 revenues to the Dedicated Highway and Bridge Trust Fund. In 2004 and 2005, legislation was enacted that extended and modified the Power for Jobs Program under Article 9. Legislation enacted in 2008 extended the MTA surcharge for four additional years. Legislation enacted in 2009 increased the mandatory first installment payment from 30 percent to 40 percent.

Insurance taxes are imposed on insurance corporations, brokers and certain insurers at a basic rate of 7.1 percent (as of January 1, 2007) of entire net income allocable to New York, based on the level of activity of an insurance company in the State during the taxable year. In addition, there is a franchise tax on net premiums written or received by insurance corporations on risks resident or located within the State, at rates between 0.8 percent and 1.3 percent, depending on policy type, as well as certain taxes imposed under the Insurance Law. Legislation enacted in 1997 provided that on or after January 1, 1998 the overall limit on the combined taxes of 2.6 percent of premiums for life insurance companies is reduced to 2.0 percent and the gross premiums tax on such components is decreased from 0.8 percent to 0.7 percent. Also, the legislation provides preferential premium tax rates to captive insurance companies that insure the primary risks of their parent and affiliated companies. In addition, provisions enacted in 1999 reduced the limitation on tax liability for non-life insurers over a three-year period. Legislation enacted in 2000 extended the investment tax credit for equipment used in the trading of securities by insurance companies and expanded the existing certified capital company program. In 2002, legislation was enacted increasing the mandatory first installment payment from 25 percent to 30 percent. Legislation enacted in 2003 amended the insurance tax to place property and casualty insurance companies solely on a premiums tax base and imposed a minimum tax for life insurance companies. In 2004, legislation was enacted that established a fourth certified capital company program. In 2005, legislation was enacted that established a fifth certified capital company program. Legislation enacted in 2006 amended the method in which life insurance companies calculate their taxes when more than 95 percent of their total premiums consist of annuity premiums. Legislation enacted in 2007 lowered the rate on ENI to 7.1 percent for life insurers. Legislation enacted in 2008 extended the MTA surcharge for four additional years. In 2009, legislation was enacted that increased the mandatory first installment payment from 30 percent to 40 percent, clarified that captive insurance companies receiving 50 percent or less of their gross receipts from insurance premiums must file a combined return with their closest affiliated taxpayer, and imposed a 1.75 percent premiums tax on for-profit health maintenance organizations.

The State imposes a *franchise tax on banking corporations* at a basic tax rate of 7.1 percent (as of January 1, 2007) of entire net income with certain exclusions, and subject to special rates for institutions with low net worth. The 7.1 percent rate represents a gradual reduction from the rate of 12 percent that was in effect until 1985, when the bank tax was restructured. The 1985 changes were extended through taxable years beginning before January 1, 2001. This was extended in 2001 for two more years. Legislation enacted in 1997 allowed banks a net operating loss deduction which can be carried forward against the bank franchise tax. This applied to net operating losses sustained on or after January 1, 2001. The legislation also allowed banks to form subchapter S-corporations which will exempt them from taxation under the bank tax and allow the same tax treatment as other subchapter S-subsidiaries. Legislation enacted in 1998 authorized an investment tax credit for the purchase of tangible personal property used in a bank's normal course of business as a broker or dealer in connection with the purchase or sale of stocks or bonds. In 2002, legislation was enacted increasing the mandatory first installment payment from 25 percent to 30 percent. In 2003, legislation was enacted extending the bank tax provisions concerning the taxation of commercial banks for two years, until December 31, 2004. In 2004, legislation was enacted that extended the bank tax and the Federal Gramm-Leach-Bliley Act transition provisions until 2006. Legislation enacted in 2007 closed the real estate investment trust loophole for banks with assets of more than $8 billion; required certain grandfathered Article 9-A subsidiaries to be taxed under Article 32; lowered the ENI rate to 7.1 percent; and extended certain 1985 provisions and Gramm-Leach-Bliley Act conforming provisions for two years. Legislation enacted in 2008 provided that certain credit card companies doing business in New York State will now be subject to the bank tax; extended the MTA surcharge for four additional years; and established a voluntary disclosure and compliance initiative program to encourage eligible taxpayers to enter into compliance agreements with the Department of Taxation and Finance. In 2009, legislation was enacted that increased the mandatory first installment payment from 30 percent to 40 percent, and reformed the Empire Zones program by decertifying firms that fail a 1:1 benefit-cost ratio or that re-incorporated to maximize tax benefits without making any new investments or creating any new jobs.

The State imposes a *petroleum business tax* on the privilege of operating a petroleum business in the State. This tax is measured by the quantity of various petroleum products imported into the State for sale or use. The tax is imposed at various cents-per-gallon rates depending on the type of petroleum product. The cents-per-gallon tax rates are indexed to reflect petroleum price changes but are limited to changes of no more than 5 percent of the tax rate in any one year. Legislation enacted in 1996, which was fully phased in on April 1, 1999, provided for reductions in the petroleum business taxes on residual petroleum, non-automotive diesel and diesel fuel used by motor vehicles and railroads, utilities, and commercial enterprises, and the elimination of the petroleum business taxes imposed on fuel used in manufacturing. In addition, the legislation also provided reimbursements of the tax paid for aviation gasoline when the fuel is consumed outside New York. Legislation enacted in 1999 cut the tax rate on fuel used for commercial heating, eliminated the tax on fuel used for mining and adjusted the proportions of the tax going to dedicated funds to save-harmless the revenue flowing to those funds. Legislation enacted in 2000 reduced the tax rate on commercial heating by 33 percent. Legislation enacted in 2004 eliminated the tax on fuels used for aircraft overflight and landing. Legislation enacted in 2008 allows the Commissioner of Taxation and Finance to work and enter into an agreement with the DMV, DEC, Thruway Authority, NYS Bridge Authority, and the Port Authority of New York and New Jersey to use technology to reduce the bootlegging of fuel.

Other tax revenues include taxes on pari-mutuel wagering, the estate tax, taxes on real estate transfers, certain other minor taxes, and residual receipts following the repeal of the real property gains tax and the gift tax.

The State imposes an *estate tax* on the estates of deceased New York residents, and on that part of a nonresident's net estate made up of real and tangible personal property located within New York State. Estate tax liability is computed on the basis of the Federal definition of "gross estate" and is set equal to the Federal credit for Federal estate tax liability allowable for State estate taxes paid as it existed on July 22, 1998. Reflecting the composition of many decedents' estates in New York, collections of this tax are heavily influenced by fluctuations in the value of common stock. New York has not conformed to the most recent changes in Federal law and thus the base of the tax is, in general, unaffected by such changes.

The *real estate transfer tax* applies to each real property conveyance, subject to certain exceptions, at a rate of $2 for each $500 of consideration or fraction thereof. Pursuant to statute, beginning in State fiscal year 2007-08, $212 million of real estate transfer tax receipts are deposited in the EPF and the remaining receipts are deposited in the CW/CA Debt Service Fund. In 2008-09, $237 million will be deposited into the EPF, and $199 million will be deposited in 2009-10 and thereafter. Receipts in excess of the debt service requirements are transferred back to the General Fund.

The *real property gains tax* had been levied at the rate of 10 percent on gains derived from certain real property transactions where the consideration is $1 million or more. Legislation adopted in 1996 repealed the real property gains tax on transfers occurring on or after June 15, 1996; however, some receipts continue to flow to the General Fund based on transactions occurring prior to such date.

The State levies *pari-mutuel taxes* on wagering activity conducted at horse racetracks, simulcast theaters and off-track betting parlors throughout the State. In previous years the State temporarily reduced its tax rates and expanded simulcast opportunities and increased purses. Legislation enacted in 1999 and 2000 reduced taxes on races run at non-profit racing association tracks and dedicated the reduction to increasing purses at those tracks and operating the Breeders Cup races. Legislation enacted in 2003 provided for unlimited simulcasting, imposed a regulatory fee of 0.39 percent, allowed racetracks to set the takeout rate, and eliminated minimum balances on telephone betting accounts. Legislation enacted in 2005 revised the fee to 0.5 percent. These actions increased revenue to the General Fund and funded the expenses of regulating the industry. Legislation enacted in 2006 reduced tax rates on wagers placed on certain thoroughbred races. Legislation enacted in 2009 provided a one-year extension for pari-mutuel tax rates on simulcasting that were scheduled to expire during the 2009-10 fiscal year. In addition to pari-mutuel taxes, a 4 percent tax is levied on the charge for admissions to racetracks and simulcast theaters, and a 3 percent tax is levied on gross receipts from boxing and wrestling exhibitions, including receipts from broadcast and motion picture rights.

Miscellaneous receipts and other revenues include various fees, fines, tuition, license revenues, lottery revenues, investment income, assessments on various businesses (including healthcare providers), and abandoned property. Miscellaneous receipts also include minor amounts received from the Federal government and deposited directly in the General Fund. Legislation enacted in 1997 provided for a phase-out of most of the assessments on health care providers by April 1, 2001. Legislation enacted in 1998 and 1999 accelerated the phase-out of the health care provider assessments; they were eliminated in January 2000. Legislation enacted in 2001, authorized the Division of the Lottery to license eligible racetracks to operate VLTs. The first license began operations in January 2003 and currently there are eight racetracks operating VLTs. Legislation enacted in 2002 re-imposed assessments on nursing home care providers and imposed a surcharge on State wireless communication services and increased bond issuance charges. Legislation enacted in 2003 reduced the time period for collecting abandoned property related to the demutualization or similar reorganization of an insurance company from five years to two years. In 2004, $4.2 billion in proceeds from the sale of the State's tobacco payments under the national Master Settlement Agreement was collected. Legislation enacted in 2005 increased the photo image fee and authorized New York Power Authority PILOT payments. Legislation enacted in 2006 increased certain banking fines and penalties, accelerated the dormancy period on uncashed checks and securities, and created the internet point insurance reduction program.
